ARISTON Folding Gates . . . top-hung construction using ball-bearing hangers in box type track, combined with close-spaced heavy spring-steel sheers, assures finger-tip operation and maximum life with minimum maintenance.
ARISTON Metal Products
FOLDING GATES
for use in Service Stations, Garages, Warehouses, or wherever large openings must be closed economically.
ARISTON Folding Gates are constructed of heavy steel throughout, with oversize steel rivets. Wide mote-type channel removable tracks fold up for clear opening . . . sunken or cast-in-floor type also are obtainable. Stock parts assure speedy delivery . . . easily erected by your workmen or our mechanics.
Almost any size opening may be closed with ARISTON Folding Gates. The Retail Center Garage, Oakland, California, illustrated . . . Barrett & Hilp, Contractors; Ellison & King, Engineers.

Build $5 Million Apartments

SEATTLE.—Spring winds whipped off Puget Sound and tugged at the hats of a group of Seattle and FHA officials who stood on Lake Burien Heights for a spading ceremony. The mayor tossed his hat aside, gripped a shovel and let fly with a chunk of earth. The group applauded happily; it was the year's big event in housing for the Pacific Northwest, the beginning of a $5 million development which will bring choice rental apartments to 544 Seattle families before the year's end.

The project, the second largest approved FHA rental housing development in the country, will proceed at a record pace in the hands of the construction firm of Nettleton & Baldwin, Inc. There will be 44 two-story buildings containing four, eight and twelve apartments, with 3½, 4, 4½ and 5½ rooms. War veterans will receive first choice on apartment rentals.

"As this is one of the largest mortgages ever to be insured by FHA, the Lake Burien Heights project should prove a stimulus to the drive for rental housing for veterans not only in the Northwest but throughout the United States," commented C. R. Jackson State FHA director.

The news of this speed thrilled Seattle which had 3,000 partly completed houses of which at least 600 had been standing more than a year waiting for something additional to make them habitable. The need is acute because the city is bursting with new and supposedly permanent citizens who stayed or came in after the war, shooting the city population to 470,000 and the metropolitan area past 600,000.

Conventional Yet Progressive

As an example of coordinated planning, the Seattle project has several striking advantages which make it appealing in addition to its economy and thoroughly conventional approach.

It will provide a normal, complete mode of apartment house life and yet through the use of the Ingersoll utility unit will make every dweller the master of his own home for the first time in apartment house history.

There will be basements. They will be deceptively ample though minimum excavations. By providing coin operated automatic washing machines, the operators will do away with a host of individually-owned washers. The basements include drying rooms and adequate individual locker storage space. The total excavation equals the space of 35 single apartments, or about 15 per cent of the area covered by buildings.

Coordinated planning includes the landscaping which provides for plantings to screen off-the-street automobile parking spaces for tenants. There will be service drives, children's play places and laundry yards, all protected and segregated by shrubbery and trees.

Designed by Seattle Architects

The project was designed by Miller & Ahlson, architects, of Seattle, Wash., who have for years been associated with large scale housing developments in the northwest. In their site planning every effort was made to gain full advantage of the view of Puget Sound and the Olympic Mountain ranges to the west.

The site which is part of a 54-acre tract, includes approximately 27 acres of fairly level building land which falls off steeply on the western side to a sweeping vista of forests and water in the distance. On the east it is bounded by a main highway between Seattle and the Boeing Lake Airport. An additional nine acres is too rugged for development but there still remains nearly 20 acres for future use.

The buildings are oriented to provide front garden courts and rear service courts. The entrance courts will be attractively landscaped with trees and shrubs and will have park-like sitting areas. The play areas in the service courts are designed for the safety of small children.

For special research connected with the engineering problems associated with the utility unit, the sponsors retained Lankton, Ziegele & Associates, of Peoria, Ill., the inventors of the unit, as consulting architects.

How Designs Are Set Up

The designers adopted a set of three basic floor plans plus one modified mirror reversal of the intermediate sized plan. The basics are known as "A", "B", "B reversal" and "C". In giving variety to the shapes of the resulting structures, several different combinations of the basics are put together or a basic may appear alone as an individual building.

The "B" plan is Z shaped, the "A" and "C" rectangular. A-total of. 101 of these basics are combined to make up the 44 structures.

The combination of two "B"s produces a 66-foot long front court and the insertion of an "A" or "C" between the basic "B"s enlarges this court by 61 feet.

In one case there are two of the double "B" structures facing each other across a court which is closed at one end by an "A" structure. A large court shaped like a cross is the result.

The major part of the buildings will rest on footers and a minimum of 18 inches clearance will be provided between joists and ground. Screen vents are specified near the ground level.

Cedar and plywood will be extensively used in exterior finishing. One typical plan calls for striated tongue and groove laid vertically to a level just over the first-floor windows, then cedar siding lapped with 8-inch exposure up to the roof line. Compcsition roofing will be used.

Porches will have brick piers, decorative grilles and wood trellises. Porch roofs will be single or copper sheets. The public halls will be floored with asphalt tile.

The interiors show a variety of combinations provided to link the Ingersoll utility unit kitchen with the dining area. One of the basic plans combines the dining area with the kitchen in a room more than 14 feet long.

Another basic plan make the dinette space an L shaped wing off the living room providing a total outer wall length of 24 feet with large window areas. This living room extend back 17 feet 6 inches and the dinette 7 feet 7 inches.

Clothing and storage closets and cupboards are liberally provided. Book shelves are included in some basic designs.

Interior finish will include plaster board for walls and ceilings and, in general, fir trim with incidental use of plywood. Floors will be hardwood, vertical end fir or asphalt tile. All rooms will be painted. Apartments will be separated by sound - deadening fire walls.

18 Stores Provided For

A large shopping center will be erected on the corner of the subdivision providing for 18 store spaces.

Nettleton & Baldwin, Inc., the developer and builder, is one of the most widely known firms in the Pacific Northwest and has done work for the government, the armed forces, private customers and its own account. It built a great deal of Bremerton navy housing and made notable engineering installations in Alaska. The firm had more than 2,000 construction men, besides 90 clerical workers and an engineering department.

Construction work is directed by Loren E. Baldwin, president, a man in his 40's, who formerly owned the Northern Construction Co. of Seattle and joined with W. B. Nettleton, a pioneer timberman and sawmill operator, to form Nettleton & Baldwin, Inc.

steel frame, 13-story.
Contractor—P. J. Walker Co., 3900 Whiteside Ave., Los Angeles, Cal.

9-10—EDUCATIONAL BUILDINGS

4/18/47 10
Low and Only Bidders
Insecticide Laboratory Building and Insecticide Compounding Building
RIVERSIDE, Calif., Riverside Co
Riverside Experiment Station, University of California.
Owner — Regents of the University
office Room 101 Administration Bldg., University of California, 405 Hilgard Ave., Los Angeles, Calif.
Architect — G. Stanley Wilson, 3681 6th St., Riverside, Calif.
Wood frame and concrete, one-story, tile roof, steel sash, slab and wood T & G flooring, interior stucco on metal lath, blower type heating and ventilating, sliding doors; includes greenhouses.
The bids were taken as follows:
(1) both buildings, general construction, base bid;
(2) combined general contract, including construction, elevator and dumb-waiter work, plumbing equipment, heating, ventilating and air-conditioning equipment and electrical work; base bid;

General Work

Steed Bros., P. O. Box 350, Alhambra, Calif., (1) $255,809; 300 days for completion, (2) no bid.
Elevator and Dumbwaiter Work
Elevator Maintenance Co., Ltd., (1) 39975; 190 days for completion.

Mechanical Work

(A) Winterbottom Bros., Inc., $139,789
(B) Glenn Hickman Co., $163,000.
(C) Emil O. Stice, $180,000.
(D) American Engineers & Contractors, $94,711 (heating and ventilating only).

Electrical Work

(E) Stetson Electrical Co., $31,545.
(F) Victory Engineering & Electrical Co., $34,342.
(G) Drury Electrical Co., $54,580.
(H) Newberry Electric Co., $37,585.

4/18/47 9
All Bids Rejected—Owner Will Ask New Bids at a Later Date
Classroom-Cafeteria (4)
GARVEY, Calif., Los Angeles County, Emerson, Monterey Vista and Frances E. Willard Schools.
Owner—Garvey School District, 230 W Garvey Ave., Garvey, Calif.
Architects — Kistner, Curtis and Wright, Architects Bldg., 816 W 5th St., Los Angeles, Calif.
Frame and stucco, 1-story each.
Complete bids received April 11th were:
P. A. Weeger, $164,246.
Steed Bros., $168,400.
George H. Wyhvt, $192,478.
American Construction Co., $118,377 (late bid, irregular).

4/18/47 10
Low and Only Bidders
Library Building Addition
LOS ANGELES, Calif., Los Angeles Co. University of California at Los Angeles.
Owner — Regent of the University of California at Los Angeles, Los Angeles, Calif.
Reinforced concrete two-story and basement wing addn. and interior alterations.
The total bids submitted April 15th were:

General Construction

(A) Robert E. McKee, $735,460; 360 days for completion.
(B) James I. Barnes, $742,000; 365 days
(C) W. E. Kier, $744,900; 400 days
(D) Bardon Corp., $799,455; 450 days;
(E) Sapp Construction Co., $885,000; 450 days.

Elevator Contract

Otis Elevator Co., (1) $16,241, (2) $3479.
Westinghouse Electric Corp., (1) $16,622.
Montgomery Elevator Co., (1) $17,329, (2) $2895.

Mechanical Work

(F) Kenneth Fraser Co., $102,500; 450 days for completion.
(G) Lohman Bros., $114,200.
(H) Glenn Hickman Co., $127,000; 365 days.
(I) American Engineering and Contractors, $90,000 (heating and ventilating only).

Electrical Work

(J) Korb Electric Co., $91,577; 240 days for completion.
(K) Victory Engineering & Electric Co., $93,773; 400 days.
(L) Vancott Co., $96,229.

12-13—INDUSTRIAL BUILDINGS

"When We're Working in Close Quarters We TRAXCAVATE"

says Mr. J. E. Nelson of the firm of Johnson & Nelson, Marin County Contractors. "Our IT4 TRAXCAVATOR is the ONLY RIG for close-in work around foundations and concrete forms, and that's only one of the many jobs it does for us. It's one machine that keeps busy."

TRAXCAVATE for PROFIT

All over the country contractors are calling the Traxcavator "the busiest machine on the job," and here's why: They use it for land-clearing and for leveling; they use it for excavating and for truck loading; they use it for backfilling and for cleanup work. From the time the job is started 'til the earthwork is completed the Traxcavator is busy. That spells *profit* for the contractor because the profitable machine is the one that keeps busy. That's why we say

Where can you profit by using one of these NEW, IMPROVED QUONSETS FROM PCA?

The Low-Cost Solution for PERMANENT BUILDINGS with 257 uses!

"Quonsets" are the most rugged, durable, low-cost solution to your building problem. Framed and sheathed with steel to give you a permanent return on your building investment, the "Quonset" is fire-resistant, weatherproof, rot and vermin-proof, and fills a steadily increasing demand for low-cost, all-purpose structures. These sturdy "Quonsets" are easily erected . . . the Strand-steel framing system permitting the simple addition of sections or the demounting of the building for re-erecting elsewhere. Whatever the need, the "Quonset" is the quick, economical way to obtain more building space.

Official Proposals
FIRST PUBLISHED TODAY

Highway Improvements
Humboldt County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on May 14, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing Highway in accordance with the Specifications therefor, to which special reference is made, as follows:

Humboldt County, between junction Route 20 east of Blue Lake and Korbel (1-Hum-968), about one and three-tenths (1.3) miles in length, a graded roadbed to be constructed and plant mixed surfacing to be placed on imported borrow.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less; than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions as interpreted in the light of this classification

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (G), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions).

File driver hoistman or operator	2.10
File driver man	1.86
Reinforcing steel worker	1.95
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less; than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (G), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions).

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 1120 "N" Street, Sacramento, California, up to 2:00 P. M., Tuesday, April 29, 1947, said bids thereafter on said day to be publicly opened and read for Group A Residences and Garages, Division of Beaches and Parks, to be constructed in accordance with plans and specifications therefor.

Group "A" Residences and Garages are to be located at State Parks in the following locations:

Pfeiffers Big Sur, Monterey County, 2 houses, 2 2-car garages San Juan Bautista, San Benito Co., 1 house, 1 2-car garage; Sunset Beach State Park, Santa Cruz Co., 1 house, 1 2-car garage; Big Basin State Park, Santa Cruz Co., 4 houses, 1 4-car garage; New Brighton Beach State Park, Santa Cruz Co., 2 houses, 2 2-car garage; Portola State Park, San Mateo Co., 2 houses, 1 4-car garage.

Bids will be entertained for the entire group of 12 houses with garages or separately for houses and garages in each location. The State reserves the right to award separate contracts at each location or group contracts of 2 or more locations, or a contract for the entire group, whichever may appear to be the lowest.

An Alternate Bid is required for substituting mineral surfaces roofing in lieu of tile roofing for certain houses.

Authority Notice — Approval for this construction was granted by the Federal Public Housing Authority—Serial Numbers FPHA-VI-291 to 295 and 299.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

SAN MATEO COUNTY

	Hourly Rate
Cement Finishers	$1.75
Carpenters	1.75
Electric Workers	1.875
Laborers Building	1.25
Painters (Brush)	1.75
Plasterer	2.05
Plumbers	1.875
Concrete Mixer Operators up to one cu. yd.	1.60
Sheet Metal Workers	1.75

(Rates in other Counties are the same or less)

Any classification omitted herein not less than 1.15

Overtime—One and one-half times the above rates.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Contractors who are desirous of securing plans, specifications, and proposal forms for the purpose of preparing and submitting a proposal for this work may do so subject to certain conditions hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento, California, and by the payment of $10.00 per set, which amount will be refunded to each bona fide bidder who submits a bid and returns the plans and specifications in good condition within ten days after the opening of bids. Others will be charged the cost of reproduction.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 1 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions).

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

Merced and Stanislaus Counties

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on May 7, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the Specifications therefor, to which special reference is made, as follows:

Merced and Stanislaus Counties, between three miles north of Livingston and Stanislaus County Line and between Modesto and Empire (X-Mer, Sta-4, 110-D, C), a distance of about eight and nine-tenths (8.9) miles to be resurfaced with plant-mixed surfacing.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Concrete vibrator operator	1.50
Flagman	1.375
Jackhammer operator	1.25
Laborer	2.10
Motor grader operator	1.275
Oil distributor bootman	1.60
Oiler power shovels or cranes	2.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.35
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	1.75
Painter (brush)	1.95
Painter (spray)	1.95
Reinforcing steel worker	1.875
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.15

National President Addresses Realtors On T-E-W Bill Threat

LOS ANGELES.—The Taft-Ellender-Wagner socialistic housing bill, now before congress, is a threat to sound market conditions for housing, Morgan L. Fitch, president of the National Association of Real Estate Boards, told the Los Angeles Realty Board, Inc., yesterday.

By putting ecstly government home building on the biggest scale in our history, it would bolster high construction costs, he explained. By flooding the market with additional free-wheeling credit, it would encourage home finance on little or no equity. These things would stand in the way of better values in housing.

He added that a NAREB survey showed also that there are approximately 89,000 rental units have been locked up and held unoccupied on account of rent control.

"All of these conditions are having a sobering influence on the real estate market, and I imagine they are conditions which pertain here," he said. "But I see no cause for alarm in those conditions. In fact I have grown a bit weary of all this blues singing that I hear about real estate. At no time in the history of the country were the circumstances more encouraging for a wholesale and a healthful and a sound real estate market.

Seven Engineering Societies Ask Revision of National Labor Relations Act for Professions

WASHINGTON.—Claiming that confusion and conflict with organizations of non-professional employes have developed through present wording of the National Labor Relations Act, seven representatives of engineering organizations have placed their groups on record as favoring remedial legislation.

The house committee on education and labor now has before it H. R. 1754 which would change the labor act to their advantage, these engineers believe.

Represented in the statement made before the committee giving full discussion to the effect of such a wording change on engineer status, were the following:

American Institute of Chemical Engineers, American Society of Electrical Engineers, American Society for Engineering Education, American Society of Civil Engineers, American Society of Mechanical Engineers, National Society of Professional Engineers, and Engineers Joint Council.

Among the conflicts and confusion resulting from the present Wagner Act, these groups maintain, is this fact:

Frequently the employer of non-union professional engineering employees has been faced with union picketing of construction projects he has designed.

Covers Professions

Confronted with such circumstances throughout the nation, these engineering groups feel that correction through modification of existing labor laws is sorely needed.

(The House Education and Labor committee met in executive session Thursday—today—but had a crowded list before it. It was doubtful committee recommendations on H R. 1754 would be forthcoming before next week.)

The statement of the seven engineering organizations brought before the committee these facts:

"In view of the rapid technological developments in American industry, most large scale industrial enterprises today employ large staffs of professional engineers, architects, and scientists on a full-time basis. As a result, these professionally trained and professionally minded employees come within the coverage of the National Labor Relations Act. In a lesser degree, the same trend has been occurring in the professions of law and medicine, for it is common to find banking, insurance and manufacturing corporations which have legal departments and medical departments of their own."

No Standard Output

From here, the panel presentation pointed out to congressmen that while the NLRA benefits unskilled workers in mass production and some skilled craftsmen, it does not accord recognition to special problems of professional employees.

It fails to make distinction between professional and non-professional employees despite inherent differences in their viewpoints and abilities as well as conditions of employment. These, the engineer delegates said, cannot be made subject to a common standard.

The statement continued:

"The output of professional employees cannot be standardized as can that of manual and skilled labor. It cannot be measured in terms such as the number of brick a man should lay in any given number of hours, the number of cubic yards of dirt that should be moved, the square yards of painting, the amount of type to be set, bolts to be placed, feet of conduit to be laid, or in terms of any other similar unit.

Divisions of Labor

"The production output of the professional man is largely that of his mind, while that of the non-professional depends largely on his manual skill and dexterity. No law by which professional employees and those engaged in routine, mental, mechanical and physical work must conform to the same regulatory pattern is a just law. It is unjust alike to the laborer, to the non-professional white-collar worker, to the professional man, to their employers and to society."

Helicopters to be Extensively Used In Snow Surveying

PORTLAND.—Helicopters soon will be used extensively in woodlands snow survey operations, H. A. Poulin told delegates to a joint meeting of the Columbia River Basin Water Forecast committee and the Western Snow Conference. He is president of Central Aircraft of Yakima, Wash.

Its ability to fly in weather conditions that would restrict or prohibit operation of other types of aircraft gives this machine utility where other methods of transportation fail, he pointed out.

M. W. Kyler, of Wausau, Wis., chairman of the Central Snow Conference, spoke of progress in hydrology and commented: "It is my belief that industry should appropriate more funds for research, not only to benefit its private treasuries, but for the public welfare."

The Influence of Forest Cover on Snow Melt" was discussed by H. G. Wilm, silviculturist, and W. G. McGinnies, director of forest service, both of the Rocky Mountain Forest and Range Experiment Station at Fort Collins, Colo.

Other speakers were A. R. Croft, conservationist, Intermountain Forest and Range Experiment Station, Ogden, Utah; E. R. Jackman, specialist in farm crops, Oregon State College at Corvallis; and Vincent J. Schaefer, research chemist, General Electric Research Laboratories Schenectady, N. Y.

Adoption of War Agencies to Take Place April 21st

WASHINGTON.—It seems that no government department wants to adopt the forlorn wartime agencies.

But in spite of the resistance expressed so far, it became apparent today that certain decisions for transfer already had been made, and of course, the top officials will do what congress tells them to do in this regard.

Violations Prosecuted

Reliable sources said that the Commerce Department will become the liquidator of the office of price administration, the defunct civilian production agency and the office of temporary controls, as well as the office of reconversion.

With details for the transfer worked out at the White House with the aid of Dr. John Steelman, presidential advisor, an executive order legalizing the switch is rumored to be near.

Some 13,000 cases of OPA violations (including price rule infractions in the case of building materials) awaiting review and disposition would be transferred to the Justice Department. Attorney General Tom Clark has balked at receiving these, although most of the OPA legal staff would accompany their transfer.

Just as strong opposition to accepting some of OPA's duties was heard from Commerce Secretary Averill Harriman at first. This resistance at catching some of OPA's functions along with those of other disappearing wartime agencies has diminished more recently, however.

Change Next Monday

As reported before, Frank Creedon, as housing expediter, is scheduled to get OPA's rent control division and between 6,000 and 7,000 persons to help him run it. A bill now before the senate would give congressional approval to this transfer.

Transfers now are set for April 21 and most of the personnel changes will be made in Washington.

FIRM IN SOUTH GETS GUARANTEED MARKET

Guaranteed market contracts have been recommended to the Reconstruction Finance Corporation by Housing Expediter Frank R. Creedon for Metal Homes Company of Los Angeles for the production of prefabricated houses.

The Metal Homes Company product is a one-story two-bedroom steel-panel house of conventional design containing 855 square feet. The company estimates the price of the house will be about $6660, complete and erected but without land. About 200 houses are to be built this year.

Outer walls, ceiling, gable ends and roof consist of steel panels. Gypsum board forms the interior of the walls as well as the partitions. Aluminum foil is used as insulation. The house will be marketed in southern California.

Metal Homes Company has been granter an RFC loan of $190,000.

CITY LICENSE EXAM BILL UP THIS WEEK

SACRAMENTO.—A bill requiring city license examinations for all contractors will come up for consideration in the assembly early this week. An assembly committee last Wednesday gave it a "do pass" recommendation, over vigorous objection.

Considerable testimony against the San Francisco plumbers' examination was heard by the committee. One would-be San Francisco plumber testified that he had been "shut out" for ten years.

VEHP Showdown Is Near With Committee Action on Wolcott Bill

WASHINGTON.—Showdown on the veterans' emergency housing program is nearing.

Wrapped up in the pending crisis this time is the fate of the entire housing project, according to some Washington observers.

The house banking and currency committee met in executive session Wednesday and was expected to take final action on the Wolcott bill, H.R. 2049, which would sweep away remaining government controls on construction and transfer rent control administration to advisory boards.

Amendments proposed in the Wolcott bill, already approved by a house subcommittee, would have the effect of wiping the Patman Housing Act out of existence as far as its major controls are concerned. But in this very action it would give release to pent up projects that have been hamstringing building activities since the war.

Materials Still Short

No extreme modification of the bill on the floor of congress is likely since its terms are so phrased that it will not readily lend itself to "trading". Its rent provisions have been more controversial, on the surface, at least, than the government control portions. It is believed the rent phases have kept it in committee.

Lumber still ranks as one of the most critical home building materials. Creedon estimates that if present allocations of shop grade are discontinued, the supply of this critical material available to millwork manufacturers, will fall to 100 million board feet below their minimum requirements for 1947.

Lumber is just one of the materials still in short supply, though all stocks have eased since last fall. The shop grade allocations to millwork manufacturers, along with pig iron to soil pipe makers, remains as the only material supply directly controlled by government sources.

Scraps Patman Act

Three other enameling efforts are in process, however, under voluntary agreement by industry with government. These informal allocation schedules cover steel, phenolic molding compound for electrical devices, and pig iron for uses other than soil pipe manufacture.

Without doubt, passage of the Wolcott measure would not leave an effective vestige of the original Patman Housing Act.

HOUSE COMMITTEE HAS PLEA FOR $50 MILLION TO FINISH FPHA UNITS

WASHINGTON.—The house banking and currency committee met in executive session today to consider a $50 million request from the federal public housing authority to be used in completing its veterans' temporary housing program.

Last fall the agency had to suspend work on its temporary projects from coast to coast because it ran out of funds. In many instances communities took the initiative and went ahead and finished the projects, furnishing money from their own treasuries.

Now, FPHA seeks the $50 million for finishing its temporary housing job and for reimbursing these communities as well.

COPPER IMPORT DUTY SUSPENSION OKAYED

WASHINGTON.—The senate finance committee yesterday approved a suspension of the four cents per pound import duty on copper to March 31, 1949. The senate committee made one change in the house-approved measure which will send it back to the house. It exempted copper sulphate from the suspension of duty.

GROOVER AND I

A TOWN EXPLODES

The magnitude of the disaster, the 41 years separating San Francisco from a similar catastrophe, and the 2050 miles between San Francisco and Texas City, Texas, leaves us little comprehending the stark tragedy striking so suddenly.

☆ ☆ ☆

The exact number of dead will never be known. In addition, there are the injured who are marked to die. More tragic still are the injured who must continue to live in crippled deformity.

☆ ☆ ☆

You say regrettable, but what can you do about it?

☆ ☆ ☆

We might suggest that you ask this question of the Red Cross, the Salvation Army or your local Blood Bank.

☆ ☆ ☆

They may have a suggestion, which if followed, will leave you feeling better.

Truman Price Action First Presidential Act to Avert Slide

WASHINGTON — The part of President Truman's recent hush-hush cabinet session with his top economic advisors that will interest contractors and other construction industry people was that dealing with the Economic Council's warning on price trends.

Demand Receding

For one thing, the economists whose presidential-advising capacities were approved by the last congress, told the President and his cabinet that prices have increased about 70 per cent on all commodities. This is since last July 1. The increase in raw material prices has been approximately 55 per cent.

According to Dr. Edwin G. Nourse, council chairman, some wholesalers and retailers have begun to price themselves out of the market. This does not apply, as yet, to building materials which lariely remain in short supply while the demand continues to strengthen.

But many household items, such as radios, refrigerators, washing machines and smaller electrical appliances, are on the edge as the output increases and a retarded demand is noted.

Dr. Nourse said demand for these items is tending downward, thus facing a general "pricing out".

"If something isn't done and done soon," he said, "we are riding for a fall."

But he did not think that a business recession is inevitable.

Old-time political observers in the nation's Capitol say that this marks the first time an administration has consulted the country's outstanding economists in an effort to do something about a national business emergency before it arises.

'Steel Has Key'

The President and his cabinet learned that consumers' wages have been dropping while prices increased. Profits have been increasing substantially meanwhile.

This fact has Dr. Nourse worried and it worries Secretary of Commerce Harriman and Secretary of the Interior Krug.

Harriman's comments are particularly interesting:

"We have an economy wherein about 58 million people are employed," he said, "with higher standards of living than anywhere else in the world. However, this can lead to disaster if we do not

BUTLER BUILT
Just the Building for a ... HUNDRED USES
STEEL BUILDINGS
• Massive Steel Frames
• First Run Aluminum Coverings
• Factory Made
• Easy To Erect
• Very Low In Cost
• Adaptable To All Codes
Basic size 40 ft. wide . . . Lengths variable in 20 ft. bays . . . Heights 14 ft. at ridge. From this, unlimited adaptations are possible, whether they are for small roadside shops or huge industrial warehouses.
QUANTITY PRODUCTION IN THE BIG BUTLER FACTORIES MAKE LOW PRICES POSSIBLE.

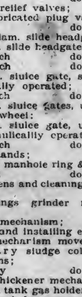
(30) 20 1¼-in. malleable iron fittings
(31) 40 2-inch do;
(32) 3 2½-inch do;
(33) 6 4-inch pipe supports;
(34) 18 6-inch do;
(35) 1 8-inch do;
(36) 4 10-inch do;
(37) 1 6-in. pipe support in trench;
(38) 6 4-in. pipe hangers;
(39) 14 6-inch do;
(40) 3 single expansion joints;
(41) 4 6-in. Dresser couplings;
(42) 1 8-inch do;
(43) 2 1½-in. screw end gate valves;
(44) 2 2-inch do;
(45) 1 6-inch hub end gate valve;
(46) 3 8-inch do;
(47) 2 10-inch do;
(48) 12 4-in. flanged end gate valves, OS&Y;
(49) 1 4-inch do;
(50) 18 6-inch do;
(51) 23 8-inch do;
(52) 7 10-inch do;
(53) 5 4-in. flanged end gate valves;
(54) 1 6-inch do;
(55) 4 8-inch do;
(56) 9 4-inch relief valves;
(57) 4 4-in. lubricated plug valves;
(58) 6 6-inch do;
(59) 1 36-in. diam. slide headgate;
(60) 2 24x24-in. slide headgates;
(61) 4 36x36-inch do;
(62) 2 48x36-inch do;
(63) 6 48x36-in. sluice gate, seating, hydraulically operated;
(64) 3 60x36-inch do;
(65) 2 48x36-in. sluice gates, unseating, hand wheel;
(66) 1 48x48-in. sluice gate, unseating, hydraulically operated;
(67) 2 72x48-inch do;
(68) 10 floor stands;
(69) 1 preservative manhole ring & cover
(70) 1 standard do;
(71) 2 bar screens and cleaning mechanisms;
(72) 2 screenings grinder mechanisms;
(73) 1 detritor mechanism;
(74) 1 moving and installing existing detritor mechanism moved;
(75) 2 primary sludge collecting mechanisms;
(76) 2 secondary do;
(77) 2 sludge thickener mechanisms;
(78) 1 digestion tank gas holder cover
(79) 3 primary sludge pumps;
(80) 3 secondary sludge pumps;
(81) 1 359 gpm recirculating sludge pump;
(82) 1 1000 gpm recirculating do;
(83) 1 primary clarified dewatering pump;
(84) 1 installing secondary clarifier dewatering pump;
(85) 1 water seal pump unit (primary pump house);
(86) 1 water seal pump unit (secondary pump house);
(87) 1 water seal pump unit (digester control house);
(88) 1 gas diesel engine, blower and auxiliary equipment;
(89) 1 sewage gas purifier;
(90) 1 heat exchanger;
(91) 1 air diffusion system (Alt. No. 1);
(92) 1 aerator structural alterations;
(93) 2 Parshall recording meters;
(94) 1 gas protective and safety devices;
(95) 1 office and laboratory;
(96) 1 primary sludge pump house;
(97) 1 secondary sludge pump house;
(98) 1 blower house;
(99) 1 digester control house;
(100) 20,000 s.f. concrete paint (Tunetank);
(101) 5800 s.f. concrete paint (floor);
(102) 8600 s.f. do (mill white);
(103) lump sum, electrical work;
(104) lump sum, paved roads, shoulder and ditch;
(105) 3600 s.f. gravel roads and paths (6-in. gravel);
(106) lump sum, alterations to existing clarifier and launder;
(107) 70 stop plank guides;
(108) 1400 lbs. misc. steel and iron (ladders, etc.);
(109) 2100 s.f. floor grating;
(110) 1.5 M. redwood baffles, boxes and board covers.

ALTERNATES
(73a) lump sum, grit collecting and washing mechanisms;
(78a) lump sum, digestion tank floating cover;
(91a) lump sum, air diffusion system (Alt 2);
(108a) lump sum, electrical work (alternate).

4/21/47 31
Bond Issue in Amount of $10,000 Approved April 15
Water Distribution System
SUMMIT CITY, Calif., Shasta Co.
Owner—Summit City Public Utility District, Eugene Black, president of board of directors, Summit City, Calif.
Includes water distribution system, pumping equipment, electric power conduits, pipes, etc.



34—DAMS, RESERVOIRS & DREDGING

Avert Depression
(Continued from Page One)

have more equality between buying power and goods produced. We can't have production outrunning buying power, and in my opinion industry must face the fact that prices will have to come down."

Most of the experts feel that the steel industry holds the key to the price picture; an applicable adage of "as steel goes so goes the industry".

Profits Are High

It is no secret that government pressure has been on the steel market for some time to reduce prices. In fact, Nourse told this meeting that it is up to steel to bring its prices into line then embark on a program of expansion. It is one industry that will have to expand, he said, if prosperity remains.

Marriner Eccles, chairman of the federal reserve board, has observed that the steel industry, on the basis of its profit index, can afford to reduce prices and profits as well.

Reclamation Bill Revisions Due in House Committee

WASHINGTON—The weekend in Washington saw the house public lands committee near the completion of its work on proposed revision of the Reclamation Act.

This legislation, along with the Rockwell bills, is claiming the close attention of contractors since it involves the use of huge funds for heavy construction projects.

Senator McCarran, Texas, democrat, ha announced that 24 western senators are solidly opposed to curtailment of essential reclamation and flood control projects.

He said the western bloc had agreed to this policy:

1—All reclamation work now underway should be completed.

2—Projects essential to the economic well-being of the west should begin at once.

3—The government should plan immediately for any projects to be undertaken when fiscal conditions permit.

This week the public lands committee will go into executive session to determine what revisions in the law, if any, shall be made.

Controversy to date revolves around the desire of the National Reclamation Association to see interests ipayments to the federal government required on funds appropriated for construction of power units. This is sought by NRA wherever the power units are a part of federal projects. The interest, said a spokesman, would come from project power revenues.

Opposition to this plan and the provisions of the Rockwell bills has developed in committee hearings-on that grounds that a lowered interest rate and extended repayment period would result in higher construction costs for future projects and necessitate canceling out some of those considered essential.

On the other hand, reclamation bureau official contend that this legislation probably would require hikes in power rates produced from reclamation projects. They say the incpease would tend to eliminate potential markets.

What's more, the reclamation people testified that loss of markets for power, on which government relies for a major part of the construction costs of these projects, would make construction of some jobs impractical.

These ideas have been expressed by Michael Straus, reclamation commissioner, and William E. Warne, assistant.

Witnesses before the Irrigation & Reclamation subcommittee yesterday included Henry P. Carstensen, master, Washington State Grange, at Seattle, and Earl Cole, a commissioner of the Cowlitz public utility district, Washington.

FEDERAL HOLDINGS A TAXPAYERS' BURDEN

"Tax-free federally owned property in San Francisco, and other communities is a serious burden on property taxpayers, but only a minor phase in California's lop-sided federal exemption system," Sidney M. Ehrman, chairman of the statewide tax committee, California State Chamber of Commerce, declared today.

"Impact of tax-free federal holdings upon rising costs of local government and climbing tax rates is reflected in federal ownership of 43 per cent of all lands within California," he asserted.

"Federally-owned and tax - exempt land, constitutes 18 per cent of al property within San Francisco county," Ehrman pointed out.

GROOVER AND I

SAFETY? WHO CARES? . . . ITS SPRINGTIME!

Many times has this [Column been devoted to Safety—safe driving and "don't step on the soap in the bath tub".

☆ ☆ ☆

Yet, take a careful look at the little guy in the air-conditioned pulpy riding along at the foot of this Column. Is he safe? You should live so long.

☆ ☆ ☆

A careful study of his picture will reveal he is traveling eastward, approaching Jacumba on Highway U. S. 80.

☆ ☆ ☆

He is on that stretch of highway where you can flip a lighted cigarette butt over the Border into Old Mexico—you careless person.

☆ ☆ ☆

Safe driving? That character is driving with one hand while looking south across the Border and waving to some "Jitomate" down Mexico way.

☆ ☆ ☆

Whether you call her the Yanqui "Tomato", the French or Spanish "Tomate" or the Mexican Jitomate" she is still a specie of the deadly nightshade family.

☆ ☆ ☆

And where can things be more deadly than under a starlit Mexican sky? (Just ask my girl Tuesday.)

☆ ☆ ☆

Safety? Who cares? Ah Sarita, 'tis springtime—again!

Officials to Consider Panama Canal Plans

WASHINGTON.—Two plans for extensive construction work in the Panama Canal area are under consideration in official quarters here. Improvements and additional construction in the Central American region have been under consideration for some time and when released, will be found to account for huge expenditures.

The principal plans now gaining favor in the inner circles are the so-called navy plan, which would cost approximately $500 million, and the alternate sea-level plan which would involve funds running between $1,121 and $1,900 billion.

The navy plan calls for the elimination of the Pedro Miguel Locks and the installation of larger locks at each end. It also would embrace construction of a terminal lake on the Pacific end.

The sea-level plan, advocated by J. D. Claybourn who is superintendent of the canal's dredging division, would eliminate alle present locks, drain the famous Gatun Lake, and install a terminal lock on the Pacific end. Its comprehensive nature accounts for the large cost volume in comparison with the navy proposal.

STEEL WAREHOUSE STOCKS DIMINISHING

WASHINGTON. — Steel warehouse inventories are diminishing to the point where, in the opinion of Walter S Doxsey, national president of the American Steel Warehouse Association, Inc., a quick recession would do them good.

Doxsey announced that the warehouse stocks now have reached a turning point in meeting supply shortages.

They are at a point where a hesitation in the draining off process would enable manufacturers to rebuild their inventories to normal levels, he explained.

Electrical Bureau Will Start Lecture Series for Industry

Raymond P. Flint, well known in the electrical industry here, has been appointed field representative of the Northern California Electrical Bureau, with headquarters in the Western Merchandise Mart, San Francisco. This was announced late Monday by John S. C. Ross, chairman of the executive committee of the bureau.

Flint will take over the activi-

RAYMOND P. FLINT

ties in the lighting field carried on by the late Clark Baker, and will also assume a leading part in the promotion of the adequate wiring program.

Prior to his affiliation with the Northern California Electrical Bureau, Flint was sales engineer for Russell and Company, manufacturers representatives. During the war he was associated with George G. Sharp, naval architect, as Pacific coast electrical field engineer. Before the war he was associated with the General Air Conditioning Company.

Initial plans for the adequate wiring program, Flint states, include a series of lectures and demonstrations before electrical contractors and other groups in the electrical industry, architects and builders, as well as units of the bureau throughout northern California.

OPERATIONAL CHIEFS FOR PITTSBURG MILL ANNOUNCED BY WHITE

Eight operational appointments for the new $25 million sheet and tin mill at the Pittsburg, California, plant of Columbia Steel Company, were announced today by Joseph A. White, general superintendent.

The appointments were D. E. Rice, division superintendent; D. W. Lasell, assistant division superintendent; C. C. Morgan, superintendent, cold reduction department; J. P. Newman, superintendent, sheet finishing department; J. H. Clark, superintendent, tin finishing department; W. L. Clark, general foreman, cold reduction department; Melvin Rush, general foreman, hot dip tinning department, and George Jedenoff, general foreman electrolytic tinning department.

CERAMIC INDUSTRY HOLDS ANNUAL MEET

Members of The American Ceramic Society, representing every branch of the seramic industry in the United States and Canada, with representation from several foreign countries, will gather in Atlantic City, N. J., April 21-25, for the 49th annual meeting of the Society. More than 1800 members are expected to attend.

Indiana Senator Announces Plan to Draw Up Bill Regulating Recruitment of Apprentices

WASHINGTON.—Senator Homer E. Capehart of Indiana has his back up over the present system of recruiting apprentices in the construction trades and plans to do something about it before the current session of congress ends.

He wants government to regulate the apprenticeship system so that eligibility may be determined by "fair and equal standards". He says that now the choice of new workers in the trades is governed by collective bargaining.

As an alternative, the Indiana senator would write into federal law a requirement that all crafts give apprenticeship opportunity to "a sufficient number of people" to maintain an adequate membership.

Unions Too Powerful

"It is not up to the labor unions or manufactures to recruit new workers," Senator Capehart told the Dodge newspapers. "If we don't want to decay as a nation through lack of trades people, we must give opportunities to a greater number to enter the arts and crafts."

He also would make certain that a sufficient amount of training was given all apprentices.

The senator's views were first made known when he expressed himself at a newsprint hearing held by a subcommittee of the senate small business committee. This investigative group was probing the labor troubles of small newspapers.

While speaking on this aspect of small business revolves, Senator Capehart revealed that he would draw up the apprenticeship measure as soon as possible to assure consideration at this 80th session.

As the situation now stands, he maintains, neither management nor government have anything to say about the selection of apprentices for the trades. Union rules prohibit management from interfering. For this reason, he is convinced that worker recruiting should be placed in the hands of the government.

Arnold Concurs

"If this is not done," he added, "the United States will not be a leading nation industrially within 25 years."

The discourse was set off by a statement by one of the witnesses that during one recent year 1,200 printers were retired while only 600 apprenticess entered the trade. This same picture, the senator said, can be applied to the construction trades. In his opinion there will be a dangerous shortage of bricklayers, carpenters, plasterers and other building workers unless the government takes action—and soon.

Thurman Arnold, attending the committee session, agreed with the Indiana law-maker, suggesting that any such legislation should be amended to prohibit unions from closing their ranks to any recruits or discriminating in any way in their apprenticeship selections.

Provisions Indefinite

Labor organizations and certain segments of industry are bound to oppose any such attempt on the part of congress to legislate inside the province of selecting new labor forces. Senator Capehart is determined to go ahead, however. He does not know yet what exact form his bill will take but he stated definitely that it would be drawn.

"I feel very strongly on this," he said.

DOYLE ANALYZES ALUMINUM COSTS

Leonard A. Doyle, assistant professor of accounting on leave of absence from the school of business administration of the University of California, will address the San Francisco chapter of the National Association of Cost Accountants, Tuesday evening, at the Engineer's Club on "Cost Accounting Problems of the West Coast Aluminum Industry."

Doyle is presently Director of economic research for the Permanente Metals Corporation.

President to Appeal For Price Reduction

WASHINGTON. — An administration appeal to a series of private industry meetings to be held soon will call on the construction industry to cut housing prices, a source close to the White House said today.

This would be considered the administration's next step in its current anti-inflation campaign.

President Truman's economic advisers have said that price cuts in such a key industry as construction would lead to similar lowering of price levels in other fields.

The President's advisors will rely on "moral persuasion" to convince the construction men that they should wore housing costs, the source said. Although several firms already have announced price reductions, the White House feels that the response to its anti-inflation appeal to date has not been satisfactory.

Senator Robert O. Taft, policy leader in congress, told reporters he endorsed fully the President's announced intention of calling on the construction industry to now take the lead in the reduction of housing costs. Taft agreed that commodity prices must be lowered but would not go along with the President in sanctioning a general wage increase if prices did not lower.

STATE REPRESENTED BY TWO ENGINEERS

WASHINGTON.—Informed that Congressman Hinshaw is not the only graduate engineer now serving in the hall of congress, the Dodge newspapers are printing the following information on Representative George P. Miller, who is Congressman Hinshaw's colleague in the house.

Sixth district representative and a democrat of Alameda, representative Miller was graduated from St. Mary's college with a bachelor of science degree in civil engineering.

He was born in San Francisco, January 15, 1891.

Congressman Miller served as a lieutenant during the first World War in the field artillery. He was graduated from the School of Fire for Field Artillery at Fort Sill, Oklahoma.

After serving as executive to the California division of fish and game, 1941-1944, he was in the California state assembly for the fifty second and fifty-third sessions. This was in 1937 and 1939.

He was elected to the seventy-ninth congress on November 7, 1944.

ROSS FUNERAL TUESDAY

Funeral services for William A. Ross, president of Columbia Steel Company, west coast subsidiary of United States Steel Corporation, who died of a heart attack at St. Luke's Hospital in San Francisco Saturday, will be held at his home at 2811 Lake, Tuesday, at 10:30 a.m.

RECORD TRUCK OUTPUT

WASHINGTON. — March commercial truck production hit a new all-time peak and automobile production established a new postwar high, the civilian production administration announced today.

33— BRIDGES

4/22/47 • 33
Owner Taking Bids—Due May 22, 2 P. M., in Los Angeles
Overhead and Undercrossings and Grading
SAN BERNARDINO COUNTY, Calif. Between Tiwanda Ave. and Mulberry Ave.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 0.9 mile grading and paving with portland cement concrete, constructing a reinforced concrete overhead crossing at Kaiser Spur and a steel beam span undercrossing at Kaiser Road.
Bids will be opened in the State Bldg., Los Angeles, Calif.
The work involves:
(1) 1690 cu. yds. remove concrete;
(2) clearing and grubbing;
(3) 128,500 cu. yds. roadway excavation;
(4) 3750 cu. yds. structural excavation;
(5) 1200 cu. yds. structural backfill;
(6) 200 cu. yds. ditch and channel excavation;
(7) 21,100 cu. yds. imported borrow, type A;
(8) 149,000 cu. yds. imported borrow, type B;
(9) develop water supply and furnish water equipment;
(10) 6800 M gallons apply water;
(11) 55 sta. finish roadway;
(12) 25,000 sq. yds. subgrade treatment;
(13) 190 tons liquid asphalt RC-2 subgrade treatment;
(14) 2400 tons minimum aggregate plant mix surfacing;
(15) 110 tons paving asphalt plant mix surfacing;
(16) 200 lin. ft. raised bars, plant mix surfacing;
(17) 5400 cu. yds. class B portland cement concrete pavement;
(18) 3180 each tie bolt assemblies;
(19) 98 lin. ft. timber bridge railing;
(20) 2291 cu. yds. class A portland cement concrete structures;
(21) 323,000 lbs. furnish bar reinforcing steel;
(22) 323,000 lbs. place bar reinforcing steel;
(23) 107,000 lbs. furnish structural steel;
(24) 107,000 lbs. erect structural steel;
(25) 278 lin. ft. steel railing;
(26) 23 cu. yds. class A portland cement concrete curbs, gutters and sidewalks;
(27) 15 each monuments;
(28) 225 each guide posts;
(29) 1.8 miles new property fence;
(30) 140 lin. ft. 12-in. reinforced concrete pipe, standard strength;
(31) 120 lin. ft. 8-in. CMP, 16-gage;
(32) 16 lin. ft. 18-in. CMP, 16-gage;
(33) 1100 lin. ft. 24-in. CMP, 14-gage;
(34) 60 lin. ft. drain tile;
(35) 5 cu. yds. filter material;
(36) 70 lin. ft. salvage existing pipe culverts;
(37) 34 lin. ft. relay salvaged corrugated metal pipe;
(38) 4 each sidewalk manhole frames and covers;
(39) engineer's office.
Specifications obtainable from the above office of the state highway engineer.

Owner Taking Bids—Due May 21, 2 P. M.
Bridge
TULARE COUNTY, Calif. Across Kings River, approximately 5.5 miles west of Dinuba.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Reinforced concrete girder bridge.
The work involves:
(1) 470 cu. yds. structure excavation;
(2) 2140 cu. yds. class A portland cement concrete;
(3) 1662 lin. ft. concrete railing;
(4) 6800 lbs. miscellaneous steel;
(5) 5940 lin. ft. furnish concrete piling;
(6) 196 each drive piles;
(7) 490,600 lbs. furnish bar reinforcing steel;
(8) 490,000 lbs. place bar reinforcing steel;
(9) 50 cu. yds. sacked concrete riprap;
(10) engineer's office.
Specifications obtainable from the above office.

34—DAMS, RESERVOIRS & DREDGING

4/22/47 • 34
Owner Taking Bids—Due May 15, 2 P. M.
Gibraltar Dam Additions and Appurtenant Structures Cost $600,000
SANTA BARBARA COUNTY, Calif.
Gibraltar Dam on Santa Ynez River, 8 miles north of Santa Barbara.
Owner—City of Santa Barbara, Faye Canfield, city clerk, City Hall, Santa Barbara, Calif.
Engineer—Leeds, Hill & Jewett, 1000 Edison Bldg., 601 W. 5th St., Los Angeles, Calif.
Includes adding 15 ft. to the height of the existing concrete arch dam, the enlargement of the thrust block at the southerly end of the dam, the addition of a thrust block at the north end of the dam, construction of a new spillway, weir, a gravity section at the left end of the spillway and the installation of three radial gates, 52x21 ft. in size, together with operating mechanisms and appurtenant facilities. A total of about 15,200 cu. yds. of concrete, 325,000 lbs. of structural steel and 142,000 lbs. of reinforcing steel and dowels will be involved in the work.
The work involves:
(1) lump sum, $10,000, access road construction and maintenance;
(2) lump sum, $20,000, camp construction and maintenance;
(3) lump sum, clearing of site and stripping of left abutment;
(4) lump sum, cutting, chipping, sandblasting and removing existing concrete;
(5) 1200 cu. yds. excavation of overburden, rock and concrete;
(6) 800 lin. ft. drilling at unit price of $3 per lin. ft. plus lump sum for drilling holes (exclusive of dowel and anchor bar holes) for pressure grouting in rock and concrete, and furnishing and installing grout pips and fittings;
(7) 800 sacks cement used in pressure grouting at unit price of $2.50 per sack of cement so used, plus the lump sum for pressure grouting (exclusive of grouting of dowels);
(8) 1300 lin. ft. drilling dowel holes in rock or concrete greater than 10 ft. in depth;
(9) 1900 lin. ft. drilling anchor bar holes in rock or concrete less than 10 ft. in depth;
(10) 29,000 lbs. furnishing, installing and grouting anchor bars and dowels in rock or concrete;
(11) 4200 cu. yds. concrete in south thrust block;
(12) 2650 cu. yds. concrete in spillway piers, parapet walls and outlet tower;
(13) 8350 cu. yds. all concrete not included in items (11) and (12);
(14) 113,000 lbs. furnishing, fabricating and placing reinforcing steel, including gate hinge anchor bars;
(15) lump sum, salvaging, furnishing and installing handrail;
(16) 325,000 lbs. furnishing, fabricating and installing structural steel spillway gates, footbridge, trash racks, floor plates and grating, and recorder house support;
(17) 500 sacks cement used in guniting at unit price of $3.50 per sacks of cement so used, plus lump sum for furnishing and placing gunite;
(18) lump sum, furnishing and installing porous concrete tile and connecting drains and other concrete pips;
(19) lump sum, furnishing and installing gate seals and seal plates ,and the mechanical assembly for operation of the spillway gates and for testing the completed gates and operating assemblies;
(20) lump sum, salvaging, furnishing and installing pipe, valves and fittings in reservoir outlet structure and removal and reconstruction of water stage recorder structure and reinstallation of facilities therein;
(21) lump sum, furnishing and installing flashboards and cleanup of site of work.
Plans and specifications obtainable from office of the engineers or from the city clerk, Santa Barbara, Calif., upon deposit of $15.

ADEQUATE WIRING IN THE KITCHEN MAKES CERTAIN YOU HAVE AN OUTLET HANDY FOR EACH APPLIANCE
Most women agree cooking is fun but it is the mixing and preparing of food that makes for fuss and bother. And that is just what kitchen planning experts have in mind when they locate cabinets and counters right handy to the refrigerator to create a food preparation and mixing center. If you are building or modernizing, no room calls for more careful planning than your kitchen. So plan and budget now, because the time is coming soon when you can buy the many beautiful and efficient appliances you have been waiting for.

Official Proposal

Enlargement of Gibraltar Dam

NOTICE TO CONTRACTORS

Sealed bids will be received by the City of Santa Barbara in the office of the City Clerk until 2:00 p. m. May 15, 1947, to be opened on the same day, for the construction of additions to Gibraltar Dam and appurtenant structures on Santa Ynez River in Santa Barbara County, California. The site of the work is at Gibraltar Dam on Santa Ynez River, 8 miles air line distance northerly from the City of Santa Barbara. The work consists generally in adding 15 feet to the height of the existing concrete arch dam, the enlargement of the thrust block at the southerly end of the dam, the addition of a thrust block at the north end of the dam, construction of a new spillway weir, a gravity section at the left end of the spillway and the installation of three radial gates 52 feet by 21 feet in size, together with operating mechanisms and appurtenant facilities. A total of about 15,200 cubic yards of concrete, 325,000 pounds of structural steel, and 142,000 pounds of reinforcing steel and dowels will be involved in the work.

Specifications, drawings and other contract documents may be obtained from the Engineer, Leeds, Hill and Jewett, at 1000 Edison Building, 601 West 5th Street, Los Angeles 13, California, or from the City Clerk of Santa Barbara, California, on or after April 21, 1947, upon a deposit of $15.00.

FAYE CANFIELD,
City Clerk.

$2,550,000 Aid for Airports

WASHINGTON.—In accordance with provisions of the Federal Airport Act, T. P. Wright, administrator of the civil aeronautics administration, has submitted to congress a detailed list of construction jobs planned by his agency at large airports of the fiscal year of 1948.

(Class IV airports are those with runways of 4,500 to 5,500 feet. The references in this report are on Class IV airports and larger.)

Submission of the CAA request for congressional approval has been approved by the bureau of the budget ,the letter of transmittal said.

It is a formality; virtually a foregone conclusion that the CAA recommendations will be carried out as scheduled.

The list of Class IV and larger airports deals exclusively with terminal type airports customarily used by the air lines.

In most states covered by the CAA request the cost of land acquisition is far overshadowed by the proposed outlay for buildings and other items.

State totals for California are given at $657,200 for land, $810,150 for buildings and $8,150,543 for other items.

While this tentative outlay bears only on the larger air fields, there is certain to be increasing activity in construction at the smaller ports as well.

Following are Pacific area totals and individual project listings:

CALIFORNIA

Location, and Name of Airport	Class Present	Class Proposed	Spnsr.	—Funds— Federal	Total	Estimated Total Land	Bldgs.	Other Items	Proposed Work

Electrical Contractors Urge That Specialists In Lighting Be Consulted On Hospital Projects

WASHINGTON.—Very few architectural and engineering firms know all the answers to proper electrification, of proper, scientific lighting and the requirements for specialized apparatus.

This is the opinion of the National Electrical Contractors Association as expressed in a recent editorial by George B. Roscoe, editor of the organization's journal.

"Consult Specialist"

Writing on the federal-aid hospital construction program, Roscoe said that in most instances the new hospital construction program will be under the most rigid inspection and specification. But even this is not enough, he maintains.

The electrical contractors feel that such an arrangement as expressed by the U. S. Public Health Service which is responsible for contract work, is not adequate to give the public full electrical health facilities.

"Use of electricity in modern hospitals has advanced spectacularly in the past few years," the editorial reads

It suggests that architectural and engineering firms seek the advice and assistance of the electrical specialty contractor who has kept informed and who has explored the specialized application.

"It is in that step," writes Roscoe, "that the qualified electrical contractor has great opportunity to insure electrical quality in his community hospital. Minimum standards for the new hospitals are, at best, minimum standards. If the architect-engineer, or general contractor regard these as maximums, then the public is going to get short changed."

Allows Quality Work

The electrical contractors are most concerned about the hospital contracting policy. Much is at stake for all parties since two billion dollars worth of hospital construction is planned in the five year health program. This means more than a quarter billion dollars worth of electrical construction business for these contractors.

Every state will get at least one ultra-modern hospital costing from $1 million to as much as $25 million, Roscoe points out, and the total program calls for building between 150 and 200 structures in every part of the nation.

"This is a grand opportunity for the electrical contracting industry," the editorial comments. "Furthermore, this hospital construction is quality electrical work."

Skimp on Specialties

The U. S. Public Health Service lets either general contracts or prime contracts to specialty contractors in the $1.125 billion community hospital setup.

The contractors say that PHS construction men realize that the mechanical part of a modern hospital is more than a third of total cost. The electrical work is estimated to be around 10 to 12 per cent of the total, from $400 to $900 per bed.

The health service knows the tendency of a general contractor to "save his skin or make a profit by shopping and chiseling on specialty subcontractors which, in turn, make it necessary for them to skimp on quality," the editorial continues. "Therefore, they know the value of direct dealing with specialty contractors."

Dispute Bid Policy

The NECA already has come out in a strong stand against methods employed by army engineers in awarding contracts for construction of Veteran Administration hospitals in the billion-dollar program. These objections are directed at the practice of rejecting exorbitant bids, then negotiating contracts at lower figures. This, the electrical contractors feel, is not economy, nor in the public interest.

"We trust that the chief of engineers will scrap this ill-advised policy," says NECA.

Chemical Society to Sponsor Industrial Conference In Fall

Dr. Robert Matteson, chairman of the California section of the American Chemical Society, announced Tuesday that the Pacific Industrial Conferences will run concurrently with the Pacific Chemical Exposition to be held in the San Francisco Civic Auditorium from October 21 to 25, 1947.

The California section of the American Chemical Society will be host to ten organized groups which have offered to provide the bulk of the program material for the Pacific Industrial Conferences by conducting one- and two-day conferences on industrial applications of recent scientific developments.

Organizations participating are: American Institute of Chemical Engineers; American Society for Testing Materials; Analytical Group, California Section, American Chemical Society; Golden Gate Paint & Varnish Production Club; Institute of Food Technologists; Northern California Rubber Group; Pacific Insecticide Institute; Petroleum Group; California section, American Chemical Society; Technical Association, Pulp & Paper Institute; and Western Chemical Market Research Group.

Additional conferences will be arranged by the California section of the American Chemical Society on special subjects not covered by cooperating groups.

BAY CITY MANAGERS ORGANIZE COMMITTEE

City managers from nine bay counties have organized a bay area committee of city managers, to be affiliated with the Bay Area Council in projects of community development and civic welfare.

Members include city managers from Mill Valley, Redwood City, San Jose, Oakland, Martinez, Alameda, Santa Rosa, Pittsburg, San Leandro, Berkeley, San Mateo, Richmond, Vallejo, Hillsborough, and San Francisco.

$2,550,000 Aid for Airports

WASHINGTON.—In accordance with provisions of the Federal Airport Act, T. P. Wright, administrator of the civil aeronautics administration, has submitted to congress a detailed list of construction jobs planned by his agency at large airports of the fiscal year of 1948.

(Class IV airports are those with runways of 4,500 to 5,500 feet. The references in this report are on Class IV airports and larger.)

Submission of the CAA request for congressional approval has been approved by the bureau of the budget ,the letter of transmittal said.

It is a formality; virtually a foregone conclusion that the CAA recommendations will be carried out as scheduled.

The list of Class IV and larger airports deals exclusively with terminal type airports customarily used by the air lines.

In most states covered by the CAA request the cost of land acquisition is far overshadowed by the proposed outlay for buildings and other items.

State totals for California are given at $657,200 for land, $810,150 for buildings and $8,150,543 for other items.

While this tentative outlay bears only on the larger air fields, there is certain to be increasing activity in construction at the smaller ports as well.

Following are Pacific area totals and individual project listings:

CALIFORNIA

Location, and Name of Airport	Class Present	Class Proposed	Spnsr.	—Funds— Federal	Total	Land	Estimated Bldgs.	Total Other Items	Proposed Work
San Francisco: Municipal	7	7	$2,433,476	$2,550,000	$4,983,476	$491,200	0	$4,492,276	Land, grade, pave, lights
Los Angeles: Municipal (mines)	4	6	899,000	1,050,000	1,949,000	0	0	1,949,000	Grade, pave, lights.

CAA, Nation's Mayors Oppose Brewster Bill To Give Airport Administration to States

WASHINGTON. — The civil aeronautics administration was on record here this week as opposed to Senator Brewster's bill, S. 1038, which would turn more more administration of the Federal Airport Construction Act over to states, taking much of the detail work away from CAA.

A similar measure to amend the Federal Airport Act passed on the senate floor last session but died in conference.

Crux of the Brewster bill, on which a hearing date has not been set, is the part that would amend the Federal Airport Act as follows:

Deal Direct With Cities

"In order that such funds may be expended in conformity with state plans and programs for airport construction, all United States sums thus apportioned for expenditure in the states shall be alloted to each state airport agency, or pending the establishment of such an agency, shall be alloted to the chief executive of the state, and the state airport agency, or the chief executive of th state, shall accept, receive, receipt for, and administer such funds."

This proposed change in handling of federal funds for airport work has brought a letter from T. P. Wright, CAA administrator, to Donoh Hanks, American Municipal Association. In it Wright states that Senator Brewster's proposed change in the law to provide for channeling to the states of the federal appropriations for administration is controversial and not recommended by CAA..

Wright wrote Hanks: "You likely are aware that prior to the passage of the Federal Airport Act of 1946, CAA took a middle-of-the-road course between the extreme opposite proposals in the house and senate bills."

At that time, too (March of 1945) CAA was placed on record before the senate interstate and foreign commerce committee which now has S. 1038, as preferring to deal with the larger class IV and V airports directly with the cities concerned. In construction of the smaller airfields, however, CAA expressed tis willingness to deal with state sponsorship. A witness said, "We believe that a better solution would be division of the program into two parts—an urban program and a state program."

Sees Speedy Action

It is the duty of the CAA administrator to recommend changes in the airport act which he feels will better accomplish its purpose. But Wright argues that with most state legislatures nearing the close of their sessions, such a radical change in administration procedure would "hamper and further delay" necessary airport development.

But Senator Brewster has written at least a partial answer to this one into his bill—that part which would give any state's chief executive power to administer the funds until an appropriate agency could be established.

Senator Brewster's statement on the floor when he introduced S. 1038 April 3, reads in part:

"In brief, I think the federal airport program, by bringing the states back into this picture, will proceed much faster, will be better planned, will be more economically managed than if we by federal law continue to encourage the federal government and particularly CAA to deal directly with thousands of the states' political subdivisions without paying any consideration to the state's plans, programs and financial obligations."

Mayors Are Opposed

He pointed out that 15 states already have state laws enacted to allow them to control use of federal funds allocated for airport construction. It is his wish that all states in the union might have similar legislation.

Senator Brewster is scheduled to return to the capitol Wednesday from an extended foreign trip and hearings may get underway next week. U. S. Conference of Mayors endorses CAA opposition.

March Building Tops February's Record —Commerce Dept.

WASHINGTON.—New construction put in place in March 1947 totaled $785 million, an increase of 6.9 per cent over February, but slightly below the January volume, the construction division, Department of Commerce, announced today.

The March figure represented an increase of 30.6 per cent over March 1946.

Privately financed construction in March amounted to $616 million, or 4.1 per cent above February, and 23.2 per cent above March, 1946. Of this total, private residential building (exclusive of farm construction) accounted for $260 million, a 6.1 per cent increase over February. Private nonresidential building during March totaled $246 million, a decrease of 5.4 per cent from February.

March farm construction totaled $20 million, an increase of 100 per cent over the previous month. Privately financed public utility construction in March amounted to $90 million, up 16.9 per cent from February.

The value of new public construction in March was $169 million, a gain of 19.0 per cent over February. Of this total, public residential construction accounted for $36 million, an increase of 5.9 per cent over February. Public non-residential building, such as industrial, educational, hospital and institutional, amounted to $23 million in March, an advance of 21.1 per cent from February.

New military and naval construction in March totaled $14 million, or 16.7 per cent above the February figure. New public highway construction totaled $51 million, or 18.6 over February. Sewer and water construction amounted to $19 million or 26.7 per cent above February.

Conservation and development building totaled $17 million, a gain of 30.8 per cent over February; miscellaneous public service, $7 million, up 40.0 per cent, and all other federal, $2 million, up 50.0 per cent over February.

#

Hot Rolled Steel Sheets Plentiful

WASHINGTON. — Eastern industrial sources have reported an uptrend in the supply of hot rolled steel sheets, first encouraging note in an otherwise gloomy steel production picture.

The Pressed Metal Institute, in a confidential memorandum, gave its members assurance that a modification is due in hot rolled steel output, a modification, that is, of the "present stringency".

At least one eastern manufacturer has announced that he is temporarily out of the market for oil-protected hot rolled sheets because he has a stock adequate to see him through the next quarter.

An Institute spokesman complained of the current supply system holding prices at their maximums. He said:

"New England stampers are trying to hold prices down, but if we have to arrange for transshipping for special pickling and shearing and take stock that will only lay out wastefully for our blanks, and continuously adjust our tools to accept off-gauge, off-temper, crowned and similar stock, we cannot quote margins to stamping users."

Purchasing executives agreed that from the fabricators' standpoint, mill limitations force stamping plants to use materials wastefully. They do permit the mills to ship more tonnage, however.

#

86% OF AGREEMENTS REQUIRE CLOSED SHOP

SACRAMENTO.—Approximately 86 per cent of 1,107 California collective bargaining agreements on file with the department of industrial realations cointain closed shop and union shop provisions, Paul Scharrenberg, director of industrial relations, announced. In addition, nine per cent of the agreements include maintenance of membership clauses. Thus, 95 per cent of the California collective bargaining agreements contain some provision for union membership as a condition for continued employment.

Electrical Contractors Urge That Specialists In Lighting Be Consulted On Hospital Projects

WASHINGTON.—Very few architectural and engineering firms know all the answers to proper electrification, of proper, scientific lighting and the requirements for specialized apparatus.

This is the opinion of the National Electrical Contractors Association as expressed in a recent editorial by George B. Roscoe, editor of the organization's journal.

"Consult Specialist"

Writing on the federal-aid hospital construction program, Roscoe said that in most instances the new hospital construction program will be under the most rigid inspection and specification. But even this is not enough, he maintains.

The electrical contractors feel that such an arrangement as expressed by the U. S. Public Health Service which is responsible for contract work, is not adequate to give the public full electrical health facilities.

"Use of electricity in modern hospitals has advanced spectacularly in the past few years," the editorial reads

It suggests that architectural and engineering firms seek the advice and assistance of the electrical specialty contractor who has kept informed and who has explored the specialized application.

"It is in that step," writes Roscoe, "that the qualified electrical contractor has great opportunity to insure electrical quality in his community hospital. Minimum standards for the new hospitals are, at best, minimum standards. If the architect-engineer, or general contractor regard these as maximums, then the public is going to get short changed."

Allows Quality Work

The electrical contractors are most concerned about the hospital contracting policy. Much is at stake for all parties since two billion dollars worth of hospital construction is planned in the five year health program. This means more than a quarter billion dollars worth of electrical construction business for these contractors.

Every state will get at least one ultra-modern hospital costing from $1 million to as much as $25 million, Roscoe points out, and the total program calls for building between 150 and 200 structures in every part of the nation.

"This is a grand opportunity for the electrical contracting industry," the editorial comments. "Furthermore, this hospital construction is quality electrical work."

Skimp on Specialties

The U. S. Public Health Service lets either general contracts or prime contracts to specialty contractors in the $1,125 billion community hospital setup.

The contractors say that PHS construction men realize that the mechanical part of a modern hospital is more than a third of total cost. The electrical work is estimated to be around 10 to 12 per cent of the total, from $400 to $900 per bed.

The health service knows the tendency of a general contractor to "save his skin or make a profit by shopping and chiseling on specialty subcontractors which, in turn, make it necessary for them to skimp on quality," the editorial continues. "Therefore, they know the value of direct dealing with specialty contractors."

Dispute Bid Policy

The NECA already has come out in a strong stand against methods employed by army engineers in awarding contracts for construction of Veteran Administration hospitals in the billion-dollar program. These objections are directed at the practice of rejecting exorbitant bids, then negotiating contracts at lower figures. This, the electrical contractors feel, is not economy, nor in the public interest.

"We trust that the chief of engineers will scrap this ill-advised policy," says NECA.

Chemical Society to Sponsor Industrial Conference In Fall

Dr. Robert Matteson, chairman of the California section of the American Chemical Society, announced Tuesday that the Pacific Industrial Conferences will run concurrently with the Pacific Chemical Exposition to be held in the San Francisco Civic Auditorium from October 21 to 25. 1947.

The California section of the American Chemical Society will be host to ten organized groups which have offered to provide the bulk of the program material for the Pacific Industrial Conferences by conducting one- and two-day conferences on industrial applications of recent scientific developments.

Organizations participating are: American Institute of Chemical Engineers; American Society for Testing Materials; Analytical Group, California Section, American Chemical Society; Golden Gate Paint & Varnish Production Club; Institute of Food Technologists; Northern California Rubber Group; Pacific Insecticide Institute; Petroleum Group; California section, American Chemical Society; Technical Association, Pulp & Paper Institute; and Western Chemical Market Research Group.

Additional conferences will be arranged by the California section of the American Chemical Society on special subjects not covered by cooperating groups.

ABUNDANCE IS KEY IN BATTLE AGAINST INFLATION——C OF C

WASHINGTON. — "This is no time to toss a wrench into the production wheels!"

This summarizing statement in the weekly report from the United States Chamber of Commerce carries a warning note against hasty and ill-advised action in congress or administration circles on price adjustment.

In the battle against inflation, the greatest force working in favor of the under-supplied consumer is the huge productive capacity of the United States, the C of C stated. Stability in prices, and lower prices, will be attained most quickly and effectively by keeping production at flood tide, it maintained.

PLANS and Speculations

An application has been filed with the San Francisco office of the army engineers to construct a highway fill and three open-pile crossings over East Creek Slough at the north end of San Leandro Bay, on the route of the East Shore freeway.

oOo

Proposed sites for a new juvenile hall in or near Martinez, are being investigated by County Supervisor Ray Taylor.

oOo

Hanford city council has purchased an 80-acre tract for a sewer farm expansion.

oOo

Gilroy needs four traffic signal lights, according to a state division of highways report, and it will have to give up $20,500 of its gas tax money to get them.

oOo

A meeting of the California Planners Institute was held in Stockton over the weekend.

oOo

A study of possible sites in Santa Clara County for a new $7 million dollar state prison was started recently by James S. Dean, state director of finances.

oOo

The backlog of work before the state department of architecture was blamed by Fresno fair officials for delay in preparing plans for a $2 million program of reconstruction.

oOo

Buildings and grounds of the Los Altos Country Club will be remodeled, Manager Charles Ferbert announced. Architect is Wilton Smith.

oOo

Survey work on reconstruction of downtown Sacramento streets has been completed, but reconstruction work will not be started until fall. Some will be let to contractors.

oOo

The Salvattion Army's $650,000 fund drive is being made to make possible construction of a new wing to the Booth Memorial Hospital for unwed mothers, a new youth center, and several other facilities.

oOo

Veterans groups in Palo Alto and San Mateo have started a housing survey to find shelter for housing registrants.

oOo

Seventy-eight bids were received for purchase of 155 buildings and fixtures at the Salinas Army Airbase, WAA disclosed.

oOo

Work has started in Folsom Park (Sacramento County) in preparation for the Pioneer Festival on May 24-25. The city council will finance grading for a softball field and a volleyball court.

oOo

A public hearing will be held in Oakland on May 19, by the traffic and transportation committee of the Bay Area Council on locations for the next bay crossing. San Francisco's hearing is scheduled for May 21.

oOo

Petersburg, Alaska will be loaned $10,000 for preparations of plans and specifications by the bureau of community facilities of FWA, on a $300,000 high school building project.

oOo

Five far-western properties were declared surplus last week. Included are Hubbs Army Airfield, Lea County, Nevada (buildings only); Long Beach Army Airfield, Los Angeles County, Calif.; vacant land (.91 acres at Railroad & Castro in Richmond; land in Siskiyou National Forest, Coos County, Ore., (1,000 acres), Smith Wood Products Inc.; and John W. Winingham Tract, Grays Harbor (2 acres), Washington.

MECHANICAL ENGINEERS HEAR CHAS. ROBINSON

The American Society of Mechanical Engineers, San Francisco section, will meet at the Engineers' Club, 206 Sansome, at 6 p. m., next Thursday to hear Charles B. Robinson speak on "Stainless Steel Welding".

He will describe various welding processes including the relatively new Heliarc welding and flux injection cutting.

A field engineer for Air Reduction Company, he is a graduate of the University of California ('39), and formerly was employed at Mare Island.

Heavier Planes Necessitate New Techniques Of Airfield Soil Compaction for Runways

WASHINGTON.—The recent announcements of new and heavier air lines equipment for operation over the nation's airways has provoked consideration of new construction methods for runways.

In many instances contractors are already engaged in revamping their building processes to accommodate the added weights.

This change in construction procedure so far has been relatively simple. According to Walter Macatee of the American Road Builders' Association, stepping up the load bearing capacity of airport pavements in most instances has meant only thickening the present strips by laying additional slabs.

Often the original pavements are basically wrong, he points out, but with good compaction to start with, the strengthening process becomes quite simple.

There is a difference between flexible and rigid types which is being considered in the road builders' operations at air fields.

Laying new rigid pavement on old strips that are of either the flexible or rigid variety results in certain inherent stresses in the new that is transmitted from deficiencies in the old, Macatee said. Temperature and other stresses than load stresses make it necessary for contractors to go to practically the same thickness in putting down overlays of the rigid type—the thickness of the earlier slab, that is.

This is not true in use of the flexible type pavement, however. This type of added layer can be thinner and achieve comparable strength.

Much work of strengthening air strips is already in progress and a great deal more of this construction will be undertaken as the air lines expand their operations, flying into more and more municipal ports from coast to coast.

The recent announcement of United Air Lines' new DC-6, the Mainliner 300 which will be in extensive use domestically in the near future, brings new attention to the runway construction problems confronting builders.

Problems Vary

United lists a maximum gross weight of 93,200 pounds for this new airliner. Operating weight empty approximates 55,000 pounds; useful load is 37,200 pounds, payload 12,850 pounds and allowable landing gross weight, 73,000 pounds. Undeniably, larger and larger equipment for the certified carriers is going to be placed on regular schedules. This fact has the construction industry dealing with ever-changing technical problems in runway building.

The Department of Commerce recently issued a statement on methods of compacting soil to bear temporary heavy traffic loads.

John C. Green, chief engineer of the National Inventors Council, is quoted in the D of C statement as saying:

"In spite of the magnificent network of roads and airports built by our engineers, the mechanics of soil compaction are still not clearly understood. Some say that soils are best compacted by superheavy equipment. Others believe that soil becomes most stable when its particles are compacted by vibration. Treating the soil with chemical agents, freezing it temporarily, and even the application of atomic energy to soil compacting equipment, are other possible methods. The best method has yet to be demonstrated to meet this urgent problem of the armed forces.

"In lightning warfare, roads and airbases must literally be installed overnight. There is no time to lay pavements. Temporarily, at least, simple soil-compacted bases must serve, and they must be strong enough to bear wheel loads of tens of thousands of pounds. A modern B-36 plane has a wheel load of 150,000 pounds. For such loads soils must be compacted from two to four feet or more."

Test at Sacramento

The road builders believe in laboratory methods of soil compaction in some instances—where the material is not of cohesive nature. There is some need, Macatee says, for certain airport soils to be compacted to a depth of five or six feet when work is laid on a granular type sub-grade. In some cases the new type compaction equipment is required to do an adequate job but if the subsoils are suitable a good job can be accomplished with the old type of compactors.

The army is experimenting with increased compaction at a station near Sacramento, Calif. It, too, is anticipating increased wheel load demands.

From the office of the chief paving engineer of the civil aeronautics administration comes word that CAA foresees no important change in runway strength regulations. Compaction control now is based on standard tests; the same as those used by the army during World War 11. The American Association of State Highway Officials standard test for density, slightly modified, is being followed in CAA specification.

CAA Collaborates

The agency takes the attitude that while gross plane loads will continue to increase, wheel loads will not go up appreciably because plane manufacturers are using more wheels to bear added weight.

However, CAA definitely plans meetings with airline technicians in the future to discuss this subject.

One important limiting factor in airport development is the amount of money municipalities are able to spend on strengthening their local runways.

Investigator Finds "Waste, Inefficiency, Fraud" In the FPHA

WASHINGTON.—A house appropriations subcommittee yesterday took under consideration an investigators' report alleging waste, fraud and inefficiency in the operation of the federal public housing authority.

The report has listed the following infringements of congressional intention:

1—Witholding of large cash reserves from the treasury for use later should congress fail to provide additional money.

2—Violation of circumvention of slum clearance provisions of the Housing Act.

3—Attempts to perpetuate the FPHA by transferring public housing projects to mutual ownership programs requiring continued government supervision.

4—Failure adequately to convert and re-locate temporary veterans' housing thru delays, faulty planning and excessive administrative costs.

5—Lack of proper control over expenses for travel, communication, and absenteeism.

The report was prepared by committee staff employes. In their research they were aided by other government investigators.

The charges will be considered by the appropriations subcommittee in its deliberations over a pending appropriation bill.

Announcement of the startling accusations followed close on the heels of a house banking and currency committee decision to give FPHA $35,500,000 to complete its veterans' temporary housing program.

APPRENTICE PAINTERS IN CITY 99% VETERANS

Ninety-nine per cent of the 125 apprentice painters and decorators in San Francisco are veterans, John L. McGrath, chairman of the joint apprenticeship committee disclosed this week. The committee's program was the first in the nation inaugurated under the joint federal-state program.

Painting apprentices are indentured under a four-year contract, and a minimum of two hours vocational school training a week is required. Classes are held at Buena Vista school under the auspices of Samuel Gompers Trade School.

By Alan Dunn for ARCHITECTURAL RECORD

"Now see here, I was analyzed for this house—you should have thought of changing my ways before it was built."

Did You Know That . . .

The American Monorail Company of Cleveland, Ohio, have opened an office at 1920 Addison Street, Berkeley 4, phone ASHberry 5288. It will be managed by Larry Schultz, who comes to California from Chicago, where he has been actively engaged in the engineering, installation and sales of cranes, hoists and monorail systms for the past 22 years.

oOo

American Mutual Liability Insurance Company has moved to new and larger quarters at 785 Market Street, Suite 403-4-5.

FLOOD CONTROL ACT APPLICATION ARGUED

WASHINGTON. — The army corps of engineers and the budget bureau currently are engaged in arguing out whether or not the flood control act applies to lakes as well as rivers.

Just in case the controversy goes against the inclusion of lakes in the provisions of the flood control measure, Congressman Ramsey of Ohio has a bill ready for hearings which would put the Great Lakes, at least, in the same category with rivers and harbors.

AWARD CONTRACT FOR REINFORCEMENT BARS

WASHINGTON. — Steel reinforcement bars, totaling 1,930,000 pounds, have been ordered by the bureau of reclamation for embedding in concrete of the spillway and outlet structure at Davis Dam and Power Plant in Arizona. The contract was awarded to the Sheffield Steel Corporation, Kansas City, Missouri, on its bid resulting in a net delivered cost to the government of $93,242.

Even a Child Can Open Them!

STRAND-STEEL OVERHEAD-TYPE GARAGE DOORS

YES, these new Strand-Steel Overhead garage doors are so simple to operate that a mere child can handle them. At a finger's command these modern overhead doors open and rise gracefully and smoothly... lowering with like precision. Although constructed of steel for strength and endurance, Strand-Steel Overhead-Type doors are perfectly balanced to permit easy opening and closing. Ready now for immediate installation, these garage doors are always out of the way, protecting your car from fender knocks so often received from swinging doors. For additional information regarding the Strand-Steel Overhead garage door, call your local P. C. A. office or mail the coupon below.

Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1717 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Odair, Wash., one (1) 3333-kva., 115,000-volt to 6900/11,950 wye-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type transformer for the local power substation, Grand Coulee power plant, Columbia Basin Project, Washington. The apparatus will be installed by the government:

General Electric Co., Denver, Colo., item 1, $15,397; ship 900 days and oil in 10 days; 32,000 lbs. Pittsfield, Mass., and 21,600 lbs. Richmond, Calif.; f.o.b. destination; item 2, engineer 50 and mechanic $40; terms net. Equalization is offered. 30% price clause.

Wagner Electric Corp., St. Louis, Mo., item 1, $16,242; ship 790 days; no weight given; f.o.b. destination; item 2, engineer $45 and cannot supply mechanical services; terms net. No equalization offered. Price clause is given.

Westinghouse Electric Corp., East Pittsburgh, Pa., item 1, $15,619 plus $831 for spare parts, totaling $16,450; ship 900 days and oil in 10 days; 52,250 lbs. Sheron, Pa.; and no weight given on oil; f.o.b. destination; item 2, engineer $40 and mechanic $35; terms net. Equalization is offered. 30% price clause.

4/21/47 43
Disconnecting Switch
Low Bidders

FORT PECK PROJECT, Montana.—The following submitted low bids April 15 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1730 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Savage, Mont., at the option of the bidder, one (1) 69,000-volt, 600-ampere, 3-pole, single-throw, manually-gang operated, outdoor type disconnecting switch with manually-gang operated grounding blades for the Savage pumping plant 69-kv. transmission line, Fort Peck Project, Montana. The apparatus will be installed by the government:

Pacific Electric Manufacturing Corp., San Francisco, Calif.; General Electric Co., Denver, Colo.; Delta Star Electric Co., Chicago, Ill.; Graybar Electric Co., Inc., Denver, Colo.; Westinghouse Electric Corp., East Pittsburgh, Pa.; A. B. Chance Co., Bowie Switch Division, San Francisco, Calif.; Electric Power Equipment Corp., Philadelphia, Pa.; Railway & Industrial Engineering Co., Greensburg, Pa., and Southern States Equipment Corp., Hampton, Ga., all bid $1443; f.o.b. destination; terms net. 30% price clause. Equalization is offered. The exceptions are listed below:

Pacific Electric Manufacturing Corp., ship 180 days; 4327 lbs., San Jose, Calif. For mechanical test add $300.

General Electric Co., ship 280 days; 3075 lbs. Philadelphia and 1254 lbs. Baltimore, Md.

Delta Star Electric Co., ship 420 days; 2966 lbs. Chicago and 1463 lbs. Barberton, Ohio.

Graybar Electric Co., Inc., ship 120 days; 2930 lbs. Melrose Park, Ill., and 1400 lbs. Baltimore, Md.

Westinghouse Electric Corp., ship 365 days; 4329 lbs. East Pittsburgh.

A. B. Chance Co., ship 120 days; 2500 lbs. and 1254 lbs. San Francisco.

Electric Power Equipment Corp., ship 120 days; 3600 lbs. Philadelphia, Pa.

Railway & Industrial Engineering Co., ship 270 days; 2950 lbs. South Greensburg and 1385 lbs. Baltimore, Md.; Lima, N. Y., or Barberton, Ohio.

Southern States Equipment Corp., ship 120 days; 4300 lbs., Hampton.

4/21/47 43
School Bus
Bids Wanted

SALINAS, Calif., Monterey Co.—Until May 13, 8 P. M., bids will be received by the Alisal School District, Francis W. Paul, clerk, Alisal School, Salinas, Calif., for one school bus with 57-passenger capacity.

Specifications obtainable from the above office.

4/21/47 43
Substation—Due Date Extended From April 17 to May 2, 2 P. M.

COLUMBIA BASIN PROJECT, Washington.—Until May 2, 2 P. M., bids will be received b ythe U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1733 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Almira, Wash., one (1) 150-kva. load-center type unit substation for indoor operation for warehouse "A," Grand Coulee Dam, Columbia Basin Project, Washington. The apparatus will be installed by the government.

No charge for copies of the specifications to prospective bidders; to others, $0.75, not returnable.

4/18/47 43
Truck Dump Body
Contract Awarded

OAKLAND, Calif., Alameda Co.—F. A. B. Manufacturing Co., 2149 67th St., Oakland, Calif., at $1239.34, was awarded contract by the East Bay Municipal Utility District, Room 312, 512 16th St., Oakland, Calif., under Spec. 1829 for furnishing truck dump body.

44— SUB-CONTRACT INFORMATION

4/22/47 44
Remodeling Veterans Administration Offices—Bids Wanted

LONG BEACH, California, Los Angeles County.—Until May 7, 2 P. M., bids will be received by the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California, for remodeling Veterans Administration Offices in the U. S. Post Office Building, Long Beach, California. Plans and Specifications obtainable from the above office of the District Engineer.

4/22/47 44
Oil Burning Equipment—Bids Wanted

SANTA ANA, California, Orange County—Until May 7, 2 P. M., bids will be received by the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California, for furnishing and installing new oil burning equipment in the U. S. Post Office Building, Santa Ana, California. Plans and specifications obtainable from the above office of the District Engineer.

4/22/47 44
Boiler & Oil Burner Repairs—Bids Wanted

CHICO, California, Butte County.—Until May 7, 2 P. M., bids will be received by the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California, for relining boiler fire box and overhauling oil burner at the U. S. Post Office Building, Chico, California. Plans and specifications obtainable from the above office of the District Engineer.

4/22/47 44
Plumbing Repairs—Bids Wanted

HONOLULU, Hawaii.—Until May 21, 2 P. M., bids will be received by the Custodian of the Building, for plumbing repairs at the U. S. Post Office, Courthouse and Custom House, Honolulu, Hawaii. Plans and specifications obtainable from the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California.

4/22/47 44
Partition Changes—Bids Wanted

HONOLULU, Hawaii.—Until May 21, 2 P. M., bids will be received by the Custodian of the Building, for partition changes in room 241, U. S. Post Office, Courthouse, and Custom House, Honolulu, Hawaii. Plans and specifications obtainable from the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California.

4/22/47 44
Dragline Boats (Reconversion) Contract Awarded

SACRAMENTO, Calif., Sacramento Co.—Sausalito Shipbuilding Co., Sausalito, Calif., at $43,652.28 awarded contract by the Sacramento District Corps of Engineers, War Dept., Wright Bldg., Sacramento, Calif., under Spec. 67-0 for reconversion of three steel barges to 70 ton dragline boats.

4/22/47 44
Sump Pump—Bids Wanted

REDDING, Calif., Shasta County—Until May 7, 2 P. M., bids will be received by the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California, for new sump pump at the U. S. Post Office Building, Redding, California. Plans and specifications are obtainable from the above office of the District Engineer.

4/21/47 44
Planting Grass—Contract Re-Awarded

STOCKTON, Calif., San Joaquin Co.—Bernard Gayman, 850 Geary San Francisco, Calif., at $3650 awarded contract by the Stockton Unified School Dist., Thos. C. McCandless, Purchasing Agent, 324 No. San Joaquin St., Stockton, Calif., for planting grass at the Lottie Grunsky School. Contract was previously awarded to Louis Tsunekawa, Stockton.

4/21/47 44
Installation (Only) of Elevator and Traveling Crane
Bids Wanted

PORTLAND, Ore.—Until May 13, 10 a. m. bids will be received by the Oregon State Board of Higher Education, Dr. Chas. D. Byrne, Secretary, Benson Hotel, Portland, Ore., for installation of elevator and traveling crane for engineering wing of the Oregon State College.

The college will supply the elevator and traveling crane.

The elevator when installed will service three floors and have a 3000 lb. capacity. Installation of the 5-ton crane will involve a steel supporting rail on the second floor. The run will be 106 feet long and when the crane is installed it will service the basement and first floor laboratories.

Specifications obtainable from office of Architects Jones & Marsh, Concord Bldg., Portland, Ore., upon deposit of $10 per set.

4/21/47 3
Contract Awarded
Warehouse **Cost $39,592**

OAKLAND, Calif., Alameda County. 2130 90th Ave.
Owner—Arnold B. Anderson, Walnut Creek, Calif.
Architect — John B. Anthony, 178 Grand Ave., Oakland, Calif.
Brick, 1-story.
Contractor—D. W. Nicholson Corporation, 1701 San Leandro Street, Oakland, Calif.

GROOVER AND I

SPRINGTIME IN APRIL

When this Country Boy first saw coconuts growing it was on a tropic island where a silver crescent of beach met a thick green turf.

☆ ☆ ☆

I though of how pleasant life would be drowsing beneath the Coconut Palm while a soft tradewind gently stirred the lazy tropic air.

☆ ☆ ☆

I soon found you do not sleep under Coconut Palms. Coconuts grow at least 30 feet up, weigh many pounds and are educated—they know all about Newton's Law of Gravity.

☆ ☆ ☆

It's springtime when you see Phil Spitalny lower his baton on his all-girl orchestra. You think "what a sweet racket that guy invented for himself".

☆ ☆ ☆

Spitlany was not first. Johannes Brahms, the squat little immortal of German music, led a women's orchestra about 100 years ago.

☆ ☆ ☆

Here in San Francisco we swelter for about 3 days with the thermometer flirting with 84, and then over night there is a change. We awaken with—

☆ ☆ ☆

San Francisco's hills shivering delightedly in their thin meringue of fog.

#

Denies Allegation Texas City Plant's Foundation Faulty

....TEXAS CITY, Tex.—Lee Palmer president of Eschlinger-Misch Company of Detroit, construction contractor which built the styrene plant here in 1942, a plant which has been operated by Monsanto Chemical Company, issued a statement early today branding as false press reports of yesterday which said destruction of the Monsanto plant might have been due to foundation failure.

After hearing that J. Leonard Davidson, identified as night construction engineer for Eschlinger-Misch, had been quoted as blaming the foundations under the Monsanto Plant, Palmer issued this statement:

"The destruction of the Monsanto Plant at Texas City was not due to foundation failure and therefore the statement of Davidson is not factual. Also, the towers (fractional towers) operate under vacuum, and obviously the figure quoted—namely, 1000 pounds pressure per square inch—is also grossly exaggerated." This latter phase also refers to a statement made earlier by Davidson.

Monsanto operated the styrene plant for the government during the war as part of the synthetic rubber program, and bought it from the government for almost $10 million last year.

#

JOHNSON WILL ADDRESS WELDING SOCIETY MON.

Wallace Johnson, consulting engineer, will address the American Welding Society on "The Chance for Small Business" at its meeting Monday night. It will be held at the Engineers' Club, at 6:30 p. m.

Johnson is a graduate of California Institute of Technology. He is engaged in the manufacture of "Up-Right Scaffolds", made by inert gas welding of aluminum with high frequency AC.

Rec Bureau's CVP Budget Slashed in House Committee

WASHINGTON.—The house appropriations committee reduced the requested $20 million for the reclamation bureau's Central Valley Project to $6,900,000 this week. It already had been shaved by the budget bureau from $49 million.

The committee's action was particularly severe with the estimate for transmission line construction, cutting its bid for $5,220,000 for two Shasta - Delta high voltage lines and for additional construction on the line from Shasta Dam to the Delta by way of Oroville and Sacramento, to only $256,680.

Here are other allowances, item by item:

Joint facilities including Shasta Dam and reservoir, $690,000; irrigation, including Contra Costa canal system, Friant - Kern canal and Madera canal, $5,134,986; Shasta power plant, $427,800; Keswick Dam, $100,740; and Keswick power plant, $218,040.

#

Housing Demand Is Slackening—Creedon

WASHINGTON. — Emphasizing the inherent dangers of present inflationary trends, Housing Expediter Frank R. Creedon, in his monthly public report issued today stated that:

1—Continuance of high-cost trends may well result in pricing construction out of the market";

2—Completions of dwelling units are progressing at a postwar record rate;

3—Demand for housing has receded somewhat from the peak of late 1946, but at the beginning of 1947 about 2,500,000 families were still in the market for homes;

4—Despite shortages of a few materials, production is "much better" than it was a year ago and "should" support unprecedented housing completions in 1947;

5—There are numerous signs that the time period required to build a house is being shortened, an important factor in construction costs.

If restraint and sound judgment are exercised to stabilize building costs, Creedon said, the home-building industry should be able to carry through a sustained program of homebuilding in 1947—but a prices and cost levels higher than those prevailing in the 10 years preceding World War II.

#

DESIGN HANGAR FOR LARGEST ARMY PLANE

WASHINGTON. — A reinforced concrete, fire-proof hangar, reputed to have the largest span of any hangar of this type constructed to date, 340 feet wide, is being designed for immediate construction at the very heavy bomber base at Rapid City, South Dakota, under the supervision of the corps of engineers, the war department announced today. The new hangar, which will cost approximately $1 million, is the engineers' answer to the request of the army air forces for a hangar of sufficient size to accommodate their largest aircraft for repair.

#

CPA APPROVES EIGHTY COMMERCIAL BUILDINGS

Eighty applications for non-residential construction in the northern California area, involving $2,090,395 estimated cost, were approved in the week ended April 17. This was announced Wednesday by Gilbert H. Kneiss, district manager of the non-residential construction division of office of housing expediter. In the same period 48 projects for a cost of $813,161 were denied authority.

Washington Building Features Use Of Glass, Aluminum; Is Ultra Modern In Appearance

WASHINGTON.—The newest trends in architectural design and engineering will be incorporated in a building to be erected in Washington, D. C., largely of glass and aluminum.

Howard Wright Cutler, Washington architect, has drawn plans for the builder, Richard J. Riddell. Said to represent the finest in functional architecture, the 12-story structure will cost more than $3 million.

Because lease arrangements stand in the way of immediate erection, work will not begin on the proposed office building until sometime after the summer of 1949. Three buildings on the site must be razed.

Reduce Heat Loss

Perhaps the greatest innovation Cutler has worked into the plans is the location of all heating, air-conditioning and the entire mechanical system in a roof penthouse. This will free all space in below-ground floors for other uses. The basement will contain a restaurant and small shops, all accessible by escalator. Except for escalator and elevator space and rest rooms, the entire basement and sub-basement areas will be available for general use.

In the sub-basement ,for example, the designers have planned the location of conference rooms and projection rooms for use by tenants who do not desire to tie up large areas of "outside-inside" office space for far-between meetings.

Another departure from generally accepted architectural practice is the use of slanted glass throughout the structure to obtain complete light control. This, say the planners, will afford maximum light utilization with "anti-sun" glass in prefabricated double glazing.

"This will obviate all sun glare and reduce loss of interior heat or cooling," Cutler said. "Combined with air conditioning it will provide an outdoor, temperature-regulated atmosphere within the building giving maximum comfort the year around."

The glass and aluminum construction will be placed on a welded steel structural frame. This method will avoid noise of riveting in a hospital area such as that where the site is located. While this procedure is not entirely new in quiet zones, still its adaptation to any 12-story structure is worthy of notice.

Modern Show Windows

Another aspect in which the building will stand unique is the syste mof partitioning rooms. In their drawings the architects have provided soundproof division walls between rooms and offices. These are to be so installed that they can be changed in a matter of hours to meet wants and requirements of tenants. Thus virtually all the permanent wall space will be used for lighting sources with all artificial lighting coming from the same direction as daylight.

Complete acoustical treatment of the entire building will be employed making it sound-conditioned as well as heat- and light-conditioned.

The street floor will be occupied by 10 shops, four fronting on the main thoroughfare. Six will open from a shopping promenade extending 150 feet, the interior depth of the building.

And here, again, new methods have been employed to present window displays in modern fashion. The front portion of the second floor is so designed that its shops facing the main street and the interior promenade will have show windows on an overhanging slant. This angle will be sufficiently extreme that pedestrians on the ground level will have full view of the window space of second-floor shops.

Glass Cocktail Lounge

Part of the back portion of the second floor will contain office space, as will the nine floors above it. Because of the employment of modular petitioning methods, this space will be readily adjustable to tenant desire and requirement.

The top of the proposed building presents still another unique arrangement—new at least for the nation's capitol.

At the 12th floor level there will be a setback with the level space devoted to a large, luxuriously appointed dining salon and cocktail lounge.

According to Cutler, the innivotion there will be glass walls, affording "an uninterrupted view of the Potomac river, the Washington Monument, the Jefferson Memorial, the Lincoln Memorial, Alexandria, Va., and beyond."

This gives Washington its first year-around, roof-top, glass-enclosed lounge and salon.

Has Large Site

For summer use a space has been designed on the roof to give "another beauty spot to Washington's already popular summer roofs."

The site has an 82-foot frontage on the main street with its depth running 150 feet.

Price Reduction to Require Participation Of Entire Industry

WASHINGTON.—A major part of the effort to lower building costs will necessarily be accomplished locally in each community through cooperative action, Andrew L. Harris, executive secretary of the Producers' Council, stated today.

"In some cities ,the work can be done through existing building congresses or local construction industry advisory councils," Harris said. Where such organizations do not already exist ,they should be formed promptly, so that the force of all branches of the industry can be brought to bear on this and other problems.

Industry to Participate

"Reducing building costs is no short-term problem. We are not concerned merely with offsetting the increases which have taken place since just before the war. We also must continuously keep at work on the problem, so that construction — including new homes, offices, stores, schools, roads, public buildings, and other structures—can be brought within the reach of a maximum number of buyers.

"Effecting more favorable working relationships with labor, modernizing building codes, adoption of time-saving techniques in construction, use of modern engineering principles in construction — these and other means of reducing costs must be put into effect in the individual community to be truly effective.

"The entire industry should participate actively—financing organizations, materials manufacturers, materials dealers, builders and contractors, designers and engineers, and everyone else concerned.

"Every factor in this widely scattered industry can and should work toward lower costs, without loss of quality or incentive.

Is Personal Task

"This simply means achieving greater output during the working hours, supporting research and making use of its discoveries, and through friendly understanding and cooperation between the many elements comprising our industry. The job of cost reduction cannot be left to someone else. It is a personal task in which all segments of the industry can participate."

Deny Responsibility For Construction Costs Trend Upward

WASHINGTON—The statement of Edward R. Carr, president of the National Association of Home Builders, before the house small busines subcommittee Friday, answers in part for the building industry the White House request that it take the lead in reducing costs.

Notice that the administration intends to follow through on its approach to the building interests for lower construction costs was served here Friday when Housing Expediter Frank R. Creedon was called to the White House to confer with party leaders on this point. Shortly after he left, his office issued a statement on housing program starts which was said to mirror opinion as expressed at the White House conference.

But Carr's remarks on Capitol Hill indicated just as clearly that any effort to drive housing costs down by appeal to the contractors who build homes would meet price snarls that are currently tying up the smooth operation of home building.

"Home builders are striving to produce housing at the lowest possible cost," Carr said, "but are faced with constantly increased cost factors beyond their control. For example, land in many areas brings nearly double its pre-war price.

"Building materials which constitute 45 per cent of the cost of the finished home, have risen in price and, with the exception of framing lumber, do not appear to have reached their peak as yet. On-site labor is now receiving the highest wages in history and is producing ar less per working day.

"Every item of overhead, including the services of engineers, land planners and architects, administrative costs and sales expense, have increased, with the result that the price of the finished house is from 50 per cent to 100 per cent above the pre-war dollar figure."

Carr gave the subcommittee comparative cost figures on construction of brick group houses as averaged in an eastern seaboard open shop city.

#

FPHA SILENT ON FRAUD, INEFFICIENT CHARGES

WASHINGTON.—With the spotlight of congressional investigation turned in its direction, the federal public housing authority today would make no formal statement on a report charging the agency with inefficiency, waste, and fraud.

The office of Commissioner Dillon S. Myer said he had not seen the report as ordered by a house appropriations subcommittee. "I'm not sure of the source of the charges," he was quoted as saying. "If any charges have been made, we'd like to know what they are and study them."

#

NEXT MONDAY IS RENT CONTROL PROTEST DAY

WASHINGTON.—"Rent Control Protest Day" has been proclaimed for April 28th by Arthur W. Binns, president of the National Home and Property Owners Foundation. In a proclamation issued to the nationwide membership of the National Foundation, Binns urged all owners of rental property to "rise and protect their rights to ownership".

"Rent control," Binns added "has become the major objective of left-wing organizations that are trying to impose a regimented socialized economy upon the American people."

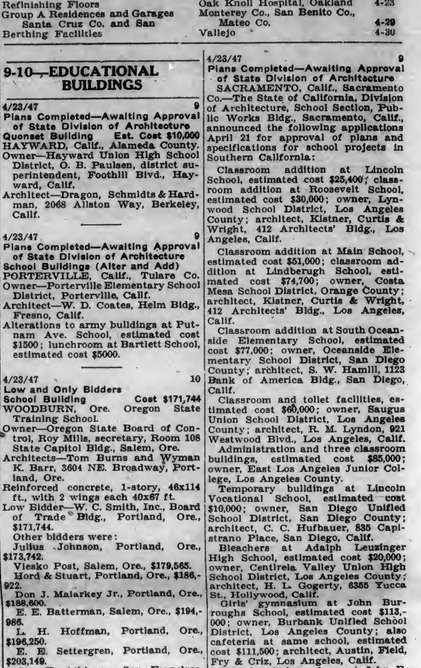
Architect—Dragon, Schmidts & Hardman, 2068 Allston Way, Berkeley, Calif.



4/23/47 9
Plans Completed—Awaiting Approval of State Division of Architecture
SACRAMENTO, Calif., Sacramento Co.—The State of California, Division of Architecture, School Section, Public Works Bldg., Sacramento, Calif., announced the following applications April 21 for approval of plans and specifications for school projects in Southern California:
Classroom addition at Lincoln School, estimated cost $25,400; classroom addition at Roosevelt School, estimated cost $30,000; owner, Lynwood School District, Los Angeles County; architect, Kistner, Curtis & Wright, 412 Architects' Bldg., Los Angeles, Calif.
Classroom addition at Main School, estimated cost $9,000; classroom addition at Lindbergh School, estimated cost $74,700; owner, Costa Mesa School District, Orange County; architect, Kistner, Curtis & Wright, 412 Architects' Bldg., Los Angeles, Calif.
Classroom addition at South Oceanside Elementary School, estimated cost $77,000; owner, Oceanside Elementary School District, San Diego County; architect, S. W. Hamill, 1123 Bank of America Bldg., San Diego, Calif.
Classroom and toilet facilities, estimated cost $60,000; owner, Saugus Union School District, Los Angeles County; architect, R. M. Lyndon, 921 Westwood Blvd., Los Angeles, Calif.
Administration and three classroom buildings, estimated cost $85,000; owner, East Los Angeles Junior College, Los Angeles County.
Temporary buildings at Lincoln Vocational School, estimated cost $10,000; owner, San Diego Unified School District, San Diego County; architect, C. C. Hufbauer, 835 Capistrano Place, San Diego, Calif.
Bleachers at Adaiph Leusinger High School, estimated cost $20,000; owner, Cerritos Valley Union High School District, Los Angeles County; architect, H. L. Gogerty, 6355 Yucca St., Hollywood, Calif.
Girls' gymnasium at John Burroughs School, estimated cost $113,-000; owner, Burbank Unified School District, Los Angeles County; also cafeteria at same school, estimated cost $111,500; architect, Austin, Field, Fry & Criz, Los Angeles, Calif.
Two 2-unit bungalwos at John B. Monlux School, estimated cost $55,-000; two 2-unit bungalows at Westport Heights School, estimated cost $55,000; owner, Los Angeles City School District; architect, A. S. Nibecker; Los Angels, Calif.
Additions at Magnolia School, estimated cost $150,000; owner, Riverside City School District, Riverside Co.; architect, G. S. Wilson, 3681 6th St., Riverside, Calif.
Gymnasium floors and basketball court, estimated cost $80,000; owner, Santa Ana Junior College, Orange County; architect, R. C. Flewelling, 816 W. 5th St., Los Angeles, Calif.
One 1-unit bungalow and one 2-unit bungalow at North Hollywood High School, estimated cost $18,000; owner, Los Angeles City School District; architect, A. S. Nibeker, Los Angeles, Calif.

4/23/47 9
Low and Only Bidders
School (Partially Construct)
Estimated Cost $350,000
STOCKTON, Calif., San Joaquin Co.
Elmwood Elementary School, Main and Cardinal Ave.
Owner—Stockton Unified School District, Andrew P. Hill, city superintendent of schools, San Joaquin and Lindsay Sts., Stockton, Calif.
Structural Engineer—F. W. Kellberg, 320 Market St., San Francisco, Calif.
Electrical Engineer—A. A. Coddington, 251 Kearny St., San Francisco, Calif.
Reinforced concrete, one-story, includes 17 rooms, cafeteria, kitchen facilities, play area, etc.
Present work involves shell of building and finishing seven classrooms, heating plant, cafeteria, clubroom and toilets.
Low Bidder—Dan Nomellini, 304 W. Jackson St., Stockton, Calif., $201,-614.
Three low total bids and alternates were:
Dan Nomellini, Stockton, Calif., $201,614; Alt. A, $35,729; Alt. B, $8208; Alt. C, $14,028; Alt. D, $19,203.
Wallace D. Harkins, Inc., San Francisco, Calif., $223,000; Alt. A, $35,000; Alt. B, $8000; Alt. C, $14,000; Alt. D, $18,000.
S. C. Giles, Stockton, Calif., $240,-980; Alt. A, $37,543; Alt. B, $7704; Alt. C, $13,571.

Contractor—C. M. Allen, 897 Washington St., Fairfield, Calif.

34—DAMS, RESERVOIRS & DREDGING

4/23/47 31
Low and Only Bidders
Scotts Flat Dam and Appurtenances Cost, $519,740.75
NEVADA COUNTY, Calif. About 4.5 miles east of Nevada City.
Owner — Nevada Irrigation District, Elizabeth E. Frey, Secrctary, Grass Valley, Calif.
Engineer—Blackie & Wood, 544 Market St., San Francisco, Calif.
Low Bidder—Chas. C. Brown, 1958 6th St., San Fernando, Calif., $319,740.75.
Other bids submitted April 22 were T. E. Connolly and Construction Equipment and Walsh & Puccetti, San Francisco, Calif., $677,954.
Fredericksen & Kasler, Sacramento, and E. B. Bishop, Orland, Calif., $681,237.
Mat Teichert & Son, Sacramento, Calif., $728,850.
D. Gerald Bing and Geo. Pollock, Sacramento, Calif., $843,752.50.
Bressi & Bevanda, Los Angeles, Calif., $881,821.
Morrison-Knudsen, San Francisco, Calif., $1,040,055.60.

4/23/47 34
Owner Taking Bids—Due April 23, 8:15 P. M.—Compocated Fill
VALLEJO, Calif., Solano County.
Owner— City of Vallejo, Melvin F. Brooke, City Clerk, City Hall, Vallejo, Calif.
City Engineer—T. D. Kilkenny, City Hall, Vallejo, Calif.
Furnish earth and make compacted fill on waterfront lands.
Specifications obtainable from the above office of the city engineer upon deposit of $10, refundable.

4/23/47 34
Owner Taking Bids—Due May 21, 10 A. M.
Dikes and Water Tank; Spec. 1793
HUNGRY HORSE PROJECT, Montana, Lion Lake about 3½ miles north of Coram, Montana.
Owner—U. S. Bureau of Reclamation, Hungry Horse Government Camp, Montana.
Plans by engineering dept of owner.
Includes construction of Lion Lake dikes and erection of 150,000-gal. water tank.
Work involves:
(1) diversion and care of creek during construction and unwatering foundations, lump sum;
(2) 2,700 cubic yards excavation, common, for foundations of dikes outlet works, and tank;
(3) 100 cubic yards of excavation, rock, for foundations of dikes, outlet works, and tank;
(4) 9,200 cubic yards of excavation, common, in borrow pits and transportation to dike embankments;
(5) 80,000 station cubic yards of overhaul;
(6) loading and hauling 3,000 cubic yards of stock-piled rock to dike embankments;
(7) 7,400 cubic yards of earth fill in embankments;
(8) tamping 250 cubic yards of earth fill;
(9) 1,500 cubic yards of riprap and rock fill in embankments;
(10) furnishing and placing 300 cubic yards of gravel filter;
(11) placing 1,650 cubic yards of rock filter;
(12) 20 cubic yards of concrete in outlet works;
(13) furnishing and placing 22,000 pounds of reinforcement bars;
(14) furnishing and placing 100 linear feet of precast reinforced-concrete pipe, 56 inches in diameter;
(15) furnishing and placing 500 linear feet of precast concrete pipe, 42 inches in diameter;
(16) furnishing and placing 55 square feet of joint filler;
(17) furnishing and installing slide gate and hoist, lump sum;
(18) furnishing and installing trashrack metalwork, lump sum;
(19) furnishing and installing miscellaneous metalwork, lump sum; and
(20) erecting 150,000-gallon water tank, lump sum.
Specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customs House, Denver 2, Colo.; R. J. Newell, regional director, P. O. Box 937, Reclamation Bldg., Fairgrounds, Boise, Idaho; Paul A. Jones, project engineer, Hungry Horse Government Camp, Montana, and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the project engineer.
No charge for prospective bidders for specifications; to others $1.25, not refundable.

4/23/47 34
Owner Taking Bids—Due May 1, 2 P. M. (time extended from Apr 15)
Dredging
PORTLAND, Ore., Columbia River
Owner—Portland District Corps of Engineers, War Dept., Col. O. E Walsh, District Engineer, Pittock Bldg., Portland, Ore.
Includes dredging and disposing of 33,000 cu. yds. dredged material.
Specifications obtainable from the above office.

4/23/47 34
Bond Issue in Amount of $1,000,000 Approved April 19
Scotts Flat Project (Completion)
NEVADA COUNTY, Calif. Five miles east of Nevada City on Deer Creek.
Owner—Nevada Irrigation District, William Durbrow, manager; Elizabeth P. Frey, secretary, Grass Valley, Calif.
Engineer—Blackie & Wood, 544 Market St., San Francisco, Calif.
Includes completion of Scotts Flat project and appurtenances, including completion of the Combie-Ophir canal and D-S canal.

4/23/47 34
Low and Only Bidders
Bank Protection; Spec. 1273 Cost $17,014
SAN JOAQUIN RIVER, California. Four sites on Bradford Island.
Owner—Sacramento District Corps of Engineers, War Department, Wright Bldg., Sacramento, Calif.
Plans by owner.
The work involves:
(1) 30 derrick barge hours clearing, backfilling and sloping;
(2) 5660 tons furnish and deliver and place quarry stone.
Low Bidder—Hutchinson Co., 7360 Schmidt Lane, El Cerrito, Calif., $17,014.
Complete bids submitted April 22 were:

Nishkian Offers 'Pay-as-You-Go' Plan

New Transbay Crossing Toll Free in 10 Years; Engineer Says A-N Board Exceeded Authority

By PHILIP G. BRADY

A "Pay-As-You-Go" crossing plan which would solve this area's transbay traffic problems for all time and create a valuable vast new industrial area for San Francisco was offered today by L. H. Nishkian. In an exclusive interview with the Daily Pacific Builder, the famed San Francisco engineer unveiled an improved version of a Bay Land Crossing which meets and overcomes objections raised earlier after a "cursory" hearing by the Joint Army-Navy board.

At the same time, he charged that the board exceeded the authority under which it was formed and failed to carry out the provisions of the Congressional resolution which activated it. Nishkian stated that neither he nor any other of the planners received an impartial, unbiased hearing and evaluation of their plans.

The six-man Army-Navy board, three of whose members are now retired, summarily rejected all plans presented at hearings some months ago and urged adoption of a low bridge crossing from Army Street to Alameda at a cost of $134,468,000.

"In presenting a plan of their own, the members of the board relinquished their authorized duties as judges and became contestants."

A perspective view of the new Bay Land Crossing plan conceived by L. H. Nishkian, showing the modifications and improvements he has adopted to overcome earlier objections. The ship channel at the Eastern end has been widned from 2000 to 3000 feet, a 3000-foot open water covered channel has been incorporated at the Western end, and a 60-acre Union terminal has been added on the San Francisco side. Not completely shown in the lower left hand corner are the freeways which would permit efficient dispersal and collection of crossing traffic. A freeway to the Golden Gate bridge would run along the Embarcadero, tunnel under Telegraph Hill and Lombard Street, emerging West of Van Ness Avenue. A second freeway to the South would connect with the Penhandle. Both freeways would feature runoffs on alternate streets designed to take some of the burden of crosstown local traffic.

Nishkian declared. "In endeavoring to support its own crossing plan, the board apparently leaned backward to emphasize minor objections in competing plans. Their impartiality can best be judged by the fact that the board, while listing inconsequential points at great length, failed even to mention obvious advantages of other plans."

In addition, he said, the joint board did not carry out express Congressional instructions to consider the economic development of the area as part of the overall picture. He added that evidently little consideration was given to the studies and conclusions of the various planning commissions as to the future growth of Bay area cities.

In Nishkian's new plan, he has retained the basic features of his earlier proposal but has modified them to overcome even minor objections voiced earlier. His plan essentially is a fill from San Francisco across the bay with tubes leading directly to Oakland and Alameda. Total cost would be about $124,000,000 which would be liquidated in "eight to ten years".

The fill would be at least 2000 feet wide, perhaps wider, with 500 feet reserved in the center for 24 lanes of vehicle traffic and railroad rights-of-way if the latter are desired. At the Eastern (Oakland-Alameda) end, opposite the Oakland estuary, a 3000 foot wide navigation channel is provided.

A new feature in the plan is an open water channel, 3000 feet wide, at the San Francisco side to permit free tidal flow and prevent undue silting along the San Francisco waterfront. Heeding the demands for both a Union Station and eventual transbay mainline railroad traffic into San Francisco, Nishkian proposes a 60-acre fill on which could be constructed a Union Station with all the necessary freight and marshalling yards.

The present plan calls for the San Francisco approaches to be north of China Basin in the vicinity of Townsend Street. An integral part of the plan is the building of freeways to collect and disperse traffic without additional congestion. A freeway north would lead directly from the crossing along the Embarcadero, tunnelling under Telegraph Hill and Lombard Street, to the Golden Gate Bridge. A freeway south would lead to the Panhandle.

Since both freeways would have runoffs on alternate streets, Nishkian believes that not only would transbay traffic be dispersed quickly and efficiently but that local traffic would save much time in crosstown travel.

Specific advantages claimed for the Nishkian plan are that it would divert at least 50 per cent of the traffic from the present Bay bridges; it is self-liquidating and would be toll-free in ten years; it would provide for all future needs; would prevent dumping of traffic into already congested downtown areas; it would provide both Oakland and Alameda with direct routes to San Francisco, relieving traffic congestion in both those cities; it would create an industrial section of San Francisco and Alameda which would provide $3 million in land rentals yearly plus taxes and wharfage fees which would cut the tax rate; it would permit mainline trains to come into San Francisco on a free right-of-way; the industrial development of the crossing would create an incentive for the railroads to extend their facilities; it provides for a Union Terminal in San Francisco; it would keep all the money expended on it in the Bay area instead of being diverted to Eastern fabricators.

"The important point to bear in mind is that an additional Bay crossing must answer three basic problems," Nishkian said. He said the problems were (1) it must divert traffic from the present structure without increasing traffic congestion; (2) it must provide for all future needs; and (3) it must be financially sound and self-liquidating.

"For instance," he explained, "without going into the other questions at all, the Army-Navy board

(Continued on Page 8)

Preliminary Specifications	
Land crossing, length	15,000-ft.
Maximum width	2,000-ft.
Width at S. F.	1,000-ft.
East ship channel	3,000-ft.
West tide channel	3,000-ft.
Roadways, 24 lanes, RRs.	500-ft.
Tubes to Oakland and Alameda	4-lane
Union Station	60-acres
Approaches: Freeways north and south, with runoffs on alternate streets, includes tunnels through Telegraph Hill and Lombard Street	

Estimated Cost (in millions)	
Fill: dredged	$11.7
Fill: rock	13.75
Roadways	1.7
Tubes	48.0
West channel	15.0
Approaches	30.0
Engineering, plans	4.0
Total	$124.15

Estimated Annual Revenue (in millions)	
Tolls (40,000 daily)	$3.65

R.R. freight yards	...
Minimum Ann. Total	$12.15 plus

Supervisors Give Final Action on Posting Ordinance Next Monday; Fee Is Cut to $2.50

San Francisco's home builders will find another expense added to the cost of new homes if the board of supervisors passes Bill 4627, which will be on Monday's legislative calendar for final passage.

The bill provides that notice of intention to build (either new construction or alterations and repairs) must be posted on the site within two days after issuing of building permits and "shall remain so posted until the expiration of the ten (10) day period for appeal from the issuance of said permit."

The measure originally carried a ten dollar fee for each posting, on recommendation of the board of permit appeals. It was passed on first reading in that form, but was returned to the judiciary committee when the Associated Home Builders protested that they had not been notified nor heard in committee.

Monday it was amended, reducing the permit fee for both new work and repairs to $2.50; and one permit may be used for new construction on adjacent lots located in the same block.

The reduction was largely due to the vigorous opposition of the home builders, who contended that a $10 fee would bring in thousands more than was needed to pay costs of the posting. It is not the duty of the home builder—and ultimately, the buyer—to support the board of permit appeals, they argued.

Supervisor Marvin E. Lewis had introduced a motion to limit the posting of notices to commercial and industrial structures only, but it was defeated by a large majority of votes. Proponents were Lewis, Mead and Meyer.

Urge Employment of Structural Engineer In School Building

SACRAMENTO.—The Structural Engineers' Association of Central California has recommended that school districts planning new buildings require each architect to nominate a structural engineer and present his contract for board approval.

The Structural Engineers' statement read: "Earthquakes in various places in this state have exposed serious deficiencies in structural design and supervision of construction of public school buildings.

"These deficiencies have cost the taxpayers millions of dollars. State laws now require adequate structural design and it has become standard practice for architects to retain licensed structural engineers.

GROOVER AND I

HAY AND PEANUTS

It's a custom for Party Stalwarts and those who hope for Political Appointments to get together at a $100-per-plate dinner. It is called a Jackson Day or a Jefferson Day dinner, depending upon whether you are buying hay for the Donkey or peanuts for the Elephant.

☆ ☆ ☆

(Andy Jackson or Tom Jefferson, in their day, could have bought dinners for an entire year for $100.)

☆ ☆ ☆

This is just an idea as to how the Democrats could collect a tremendous campaign fund for 1948:

☆ ☆ ☆

Suggested is a phonograph record—piano selection—the Missouri Waltz—played by Harry S. Truman.

☆ ☆ ☆

All of the Democrats and all of the Republicans would buy copies of this record—but for entirely different reasons.

OKAY PARKING METERS

Salinas voters in a special election recently approved installation of parking meters in the downtown district.

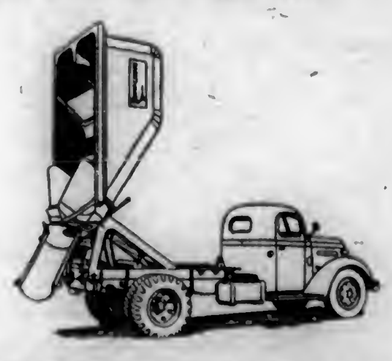
(Continued from Page One)



proposal desn't say how it's going to pay for itself. With tolls as its sole source of revenue, it will be almost impossible to finance. At a top income of $3,650,000 yearly, it would never be paid off at 2¼ per cent bonds and it would take 100 years with 2 per cent bonds. Even if no interest at all was charged, it would still take 50 years to pay off the investment and maintenance."

(Tomorrow Nishkian will present a point-by-point rebuttal to the objections raised by the Army-Navy board showing how his modifications meet even the most minor point.)

Hiring of Private Architects, Civil Engineers Okayed

SACRAMENTO. — A bill permitting state departments and agencies to let contracts for state projects to private architectural, civil engineer and contracting firms was approved Wednesday by the assembly committee on governmental efficiency and economy.

It now goes to the floor of the lower house. By a vote of 9-3, the legislative group gave a "do pass" recommendation to the measure (A. B. 2117), overriding opposition to the bill from the state department of public works and department of finance.

Supporters of the legislation, offered by Assemblyman Thos. W. Caldecott (r., Berkeley) and others, included Perry Taft, of the Associated General Contractors, John S. Bowles, San Francisco, representing the California Council of Architects, and A. J. Kennedy, American Society of Civil Engineers.

Although admitting under questioning the bill was merely "permissive", C. R. Montgomery, attorney for the state department of public works, asserted its provisions were in conflict with state constitutional provisions requiring such projects to be done under civil service.

Montgomery said: "There is only one question before us, that is whether such work should be under civil service or be 'farmed out'. Assemblyman John E. Collier (r., Los Angeles), moved the bill out "do pass", saying: "This is another opportunity for us to take one more step away from too much government and to help private enterprise."

The motion was seconded by Bernard R. Brady (d., San Francisco), and was carried.

Irvington sanitary district has received an appropriation of $3500 from Alameda county board of supervisors from an allocation by the state to help defray engineering costs for the new sanitary unit to be built near Warm Springs.

Trade Commission's Policy Established In Mahogany Cases

WASHINGTON. — The federal trade commission closed its proceedings in the Philippine mahogany cases today with a statement declaring that its "fixed and definite policy" is to "proceed vigorously" against all person celling Philippine hardwoods as mahogany without using the qualifying word "Philippine".

This qualification had been the basis of orders issued in 1931 dismissing complaints alleging misrepresentation on the part of Black & Yates, Inc., New York; Frank Paxton Lumber Co., Kansas City, Kans.; Gillespie Furniture Co., E. J. Stanton & Son, and Western Hardwood Lumber Co., all of Los Angeles; Carl Wendelstein, trading as Carl Wendelstein and Co., Boston; Cadwallader-Gibson Co., Inc., San Francisco; and Matthews Co., Inc., Port Clinton, Ohio. These companies entered into stipulations not to sell the Philippine hardwoods as mahogany without using the modifying term "Philippine".

The 1931 proceedings also resulted in dismissal of complaints against F. H. Gillespie, M. L. Gillespie and A. F. MacDougall, partners trading as Gillespie Furniture Co., Los Angeles, and against Furniture Corporation of America, Portland, Ore. The Gillespie partnership had been dissolved upon the organization of the Gillespie Furniture Co., a corporation, whose assets were subsequently acquired by Furniture Corp. of America.

The cases were reopened in 1939 on motion of counsel for the commission for the purpose of taking further evidence to determine whether the woods might be properly described as "Philippine mahogany" or whether use of the term "mahogany" should be banned absolutely.

The order closing these proceedings was issued with the concurrence of all the commissioners after consideration of the record, including testimony and other evidence taken befre a trail examiner, the report of the trial examiner with exceptions thereto, briefs of counsel and oral argument.

GROOVER AND I

RELATIONS-IN-LAW

The Senate is being pressured into ratifying a Peace treaty which it is claimed, will strip Italy of her military power—and Italy will no longer be able to do for herself the things we are now planning to do for Greece and Turkey.

☆ ☆ ☆

(Isn't this the same treaty which gives Russia 100 million dollars in reparations, and which we promised Italy 100 million dollars in credits if she would sign?)

☆ ☆ ☆

We are promising to spend millions by the hundreds for the purpose of resisting Communism wherever it threatens—and in 1948 the Communist Party will run a candidate for President of the United States!

☆ ☆ ☆

If I were the Doyen of some little ragged and barefoot nation—brother, I'd be sitting pretty!

Kraftile of Niles Slashes Prices On Glazed Wall Units

Kraftile Company of Niles, Cal., announced a scaling down on prices of clear glazed wall units in the popular two and four inch thickness, by 5 per cent, Monday.

According to C. W. Kraft, president of the firm, an up-to-date cost analysis of the firm's manufacturing operations made a readjustment of the price structure advisable to achieve a more equitable distribution of plant burden. Price reductions were made possible on high-production items such as clear glazed wall units in two and four inch thicknesses, and ceramic glazed units in two inch thickness. Prices remained unchanged on most other Kraftile items, while certain specialties such as acid brick, patio tile, and quarry tile were advanced.

In announcing the new price schedules, Kraft pointed out that the firm retained pre-war prices until early 1946, at which time a six per cent raise had to be made. Improvements in plant layout and methods during the past year, plus full production schedules, promoted such efficient operation that five per cent reductions in high-production items were made possible. As a result, the firm's average prices are virtually back to pre-war levels.

The firm will continue to quote firm prices on all lump sum bids, a policy it has consistently followed despite the popularity of so-called "escalator clauses".

#

PROMULGATE ASPHALT TILE RECOMMENDATION

WASHINGTON. — A voluntary simplified practice recommendation for asphalt tile has been approved for promulgation, according to an announcement of the division of simplified practice of the National Bureau of Standards.

Effective May 15, 1947, and identified as R225-47, Asphalt Tile, the recommendation will be available in printed form, from the office of the Superintendent of Documents, Government Printing Office, Washington 25, D. C., on or about May 24, for 5 cents each.

Senate Bill 418 Would Provide Federal Aid For Clearing Rivers, Streams of Pollution

WASHINGTON.—The federal works agency, through its administrator, Major General Philip B. Fleming, has protested the congressional proposal to hand to the U. S. Public Health Service administration a $100 million per year construction program aimed at clearing American rivers and streams of pollution.

The senate sub-committee on flood control and improvement of rivers and harbors of the committee on public works should wind up this week its hearings on S. 418, a measure that would bring millions of dollars worth of work to contractors throughout the country.

Opposes Mechanism

FWA based its objections primarily on the charge that S. 418 authorizes the federal security agency (parent of public health) to extend the federal aid in the form of grants-in-aid, loans or both, to any state, municipality or other public body.

One additional stipulation is highly important. The bill also provides that FSA extend the federal funds in the form of loans to any industrial enterprise for the construction of necessary sewage treatment works and for the preparation of engineering reports, plans and specifications in connection with these jobs.

General Fleming states that this is a public works function, not a public health function. His objections do not, however, carry over to the bill's plan of national attack on the pollution problems.

"I am entirely in sympathy with the purpose it seeks to achieve," General Fleming testified. "However, I am opposed to the mechanism which the bill provides for accomplishing the purpose. Specifically, it mixes together and confuses two separate and distinct functions—one is the function related to public health, the other is a public works function."

Committee Chairman Revercomb hopes to complete hearings on the sub-committee's part by late this week, he said.

$300 Million in Jobs

Widely sanctioned by river basin interests, the bi-partisan measure is sponsored by Senators Barkley, Kentucky democrat, and Taft, Ohio republican. Simply put, S. 418 provides for federal aid for treatment works construction in preventing discharge of pollution into American streams and rivers.

Its particular interest to contractors is the appropriation annually of up to $100 millions for such grants-in-aid, and appropriation of $1,500,000 for the next fiscal year to be expended by state health authorities.

The grants-in-aid so provided could not be used to exceed 33 1/3 per cent of the cost of any project and the loans would bear interest. This means that, potentially, construction of treatment plants for cities and towns would run up to $300 million each year.

Among those indorsing the proposal is the Interstate Commission of the Potomac River Basin, a 4-state anti-pollution agency which includes the federal government and the District of Columbia.

Federal works also is claiming that preparation of plans and specifications for the sewage treatment works is an engineering and architectural function that should not go to public health. It is willing to give the FSA the job of determining need for these improvements.

Split Functions

Getting into the advance planning phase, General Fleming said.

"I strongly recommend . . . a radical revision of S. 418 for the purpose of assigning the various phases of the contemplated program to the federal agencies in which they logically belong, that detailed planning in all of its engineering aspects be authorized to proceed at the earliest possible date, and that actual construction

Health Service Men Address Local AIA

The American Institute of Architects, San Francisco chapter, will hold a dinner meeting on Thursday, May 8 ,(in the Garden Room of the Fairmont Hotel. Cocktails will be served at 5:45, and dinner at 6:30.

The federal-aid hospital program's operation will be discussed by four prominent administrators. Marshall A. Shaffer, AIA, chief architect of the U. S. public health service and chairman of the seminar on hospitals at the recent national AIA convention, Charles H. Coogan, district architect of U. S. public health service, and Dr. J. B. Askew, chief of the state bureau of hospital inspection, will discuss the functions of their respective offices.

Nat Owings, of Skidmore, Owings & Merrill, Chicago architects, will give an illustrated lecture on hospital design.

HOME BUILDERS URGE ADOPTION OF 44-HOUR BUILDING TRADE WEEK

CHICAGO. — Representatives of the nation's home builders, meeting here today, called on labor in the building trades to adopt the Bernard Baruch "Doctrine" of full productivity and a 44-hour work week as the primary step in stabilizing housing construction costs and assuring an adequate volume of new homes.

Rodney M. Lockwood of Detroit, chairman of the labor committee of the National Association of Home Builders, announced that the adoption of the Baruch proposal by American Federation of Labor leaders was urged by the Home Builders representing affiliated local associations throughout the country. "There is nothing seriously wrong with the construction picture today which cannot be cured by a full week's work at a fair wage by labor in the mines, forests, in the factories producing building materials and on the building site," Lockwood stated.

#

BUILDING CODES' FIRE PROVISIONS IMPORTANT FEATURE OF CONFERENCE

WASHINGTON.—Building construction and city codes governing the regulation of building types and standards will be an important part of the President's Fire Prevention Conference considerations here this week.

On Tuesday afternoon committees will meet to discuss final content of their reports which will be submitted to the conference later in the sessions.

This coordinated program will be taken to each state by conference members. There it will implement fire prevention and fire safety, at the same time focusing attention on need for building code changes.

LAUDS WOLCOTT BILL

WASHINGTON. — Morgan L. Fitch, Chicago, president of the National Association of Real Estate Boards, praised the house of representatives' adoption of the Wolcott Bill as "the most important step yet taken to end the nation's housing troubles."

Economist Tells PUC Industrial Gas Cutback Would Foster Unemployment, Idle Industry

By PHILIP G. BRADY

Widespread unemployment and cessation of industrial expansion in California would follow immediately any action curtailing or eliminating natural gas as an industrial fuel, Stuart Walsh, director of Industrial Survey Associates, told the public utilities commission Tuesday as the commission reconvened hearings on the "future of natural gas".

Over 50 Bay area industrialists and gas company officials crowded the session which will be reopened this morning at 9 a. m. at the State Building.

Walsh, a private and government economist for 30 years, said the building material producers would be the ones most vitally affected by any conservation order. Among these he listed the brick, tile, cement, glass, paper, and chemical manufacturers.

"The major problem in California," he told the commission, "is to provide jobs for our expanding population." This problem, he intimated is even more important than curtailing gas for domestic use only. "After all," he said, "if the people don't have a job, they can't pay for their household gas."

After declaring that his firm advised national firms on the advisability of relocating in California or expanding here, Walsh said, "We are now in a breathing spell. The high building costs and other factors have led a great many major companies to hold in abeyance their decisions on where to locate. However, we don't have more than a few months to make conditions here as favorable as possible."

The economist was placed on the stand by Gardiner Johnson, counsel for the Coast Counties Gas & Electric Company, which is opposing a petition for industrial gas curtailment by the other utility companies. Under Johnson's questioning, Walsh testified that he believed Contra Costa county "to be the most promising area in the state for industrial expansion." Other areas are reaching the saturation point, he explained, while Contra Costa still abounds in space, raw materials, good fuel supply and transportation facilities.

"I know many companies who won't come to California and many others which will leave California if they are forced to convert to fuel oil." He urged conservationists to take the long view—"atomic power within ten years".

The picture for southern California was outlined by Roy M. Bauer, gas supply supervisor of the Southern California Gas Company, who opened the morning's testimony. According to Bauer, a moderately cold day next January will mean curtailment of all industrial users and an indefinite amount of domestic and commer-

NEW Improved SCOOPMOBILE
Five NEW IMPROVEMENTS!
1 **NEW "Shovel Action" BUCKET**
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!
2 **HAND LEVER CONTROL**
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.
3 **DISCHARGE ACTION**
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.
4 **NEW COUNTER BALANCE**
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.
5 **CONTROLLED DIGGING ACTION**
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

River Pollution

(Continued from Page One)

be deferred until a more propitious time.

"It seems to me that the advisability of undertaking at this time a program of providing federal loans and grants for the construction of sewer facilities is highly dubious. Construction costs at present are high and we are in a period of nearly full employment. I suggest the wisdom of deferring such a program as this until costs are more reasonable, and until there is greater need for the employment that would be involved in carrying it out."

Plan Now

But the administrator left no doubt with the senators that he favors preparation of plans now. Detailed working drawings and specifications should be prepared, he said, and held on the shelf until the time arrives when the actual construction will dovetail with other programs to maintain production and employment at a high level.

FIRST PUBLISHED TODAY

Highway Improvements
Contra Costa County at Rodeo

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 2001 Van Ness Avenue San Francisco, California, until Two (2) o'clock P. M. on Tuesday, May 20, 1947 at which time and place they will be publicly opened and read, for performing work as follows:

Contra Costa County at Rodeo, between Sixth Street and Fourth Street (IV C, C-14-B) about three-tenths (0.3) mile in length, existing pavement to be widened with asphalt concrete and shoulders to be constructed with crusher run base.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each old must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1775 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.55
Flagman	1.25
Jackhammer operator	1.375
Laborer	1.25
Motor grader operator	2.10
Oil Distributor bootman	1.275
Oiler power shovels or cranes	1.60
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Roller operator	1.95
Tractor driver	1.95
Truck driver (8 cubic yards water level capacity or more)	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2625
Any classification omitted herein not less than	1.25

Overtime one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

State Highway Engineer's Estimate

Item 1. 50 cubic yards removing concrete.

Item 2. 800 cubic yards roadway excavation.

Item 3. Developing water supply and furnishing watering equipment.

Item 4. 54 thousand gallons applying water.

Item 5. 1½ stations finishing roadway.

Item 6. 1,380 tons crusher run base.

Item 7. 5 tons liquid asphalt SC-1 (prime coat).

Item 8. 180 tons plant-mixed surfacing.

Item 9. 3 tons asphaltic emulsion (paint binder and seal coat)

Item 10. 250 cubic yards concrete (leveling course).

Item 11. 240 tons asphalt concrete (Type A surface courses).

Item 12. 20 each, guide posts.

Item 13. Extending existing corrugated metal pipe culverts.

Gas Hearing

(Continued from Page One)

cial users, in that area.

He said there would be a deficiency of 769 million cubic feet for domestic users alone even if some 125 million cubic feet were piped in from Texas on schedule. Under cross examination by Attorney Johnson, Bauer admitted that curtailment of all industrial users during a cold period would not prevent stoppage of domestic gas, in those circumstances.

Considerable testimony revolved around the use of gas by oil producers to repressure oil fields with Bauer stating that this gas is not lost but is eventually recovered when the field is exhausted. He admitted under questioning that the gas company contracts allowed the oil producers to use any amount of gas at any time without notice.

Bauer declared that no "major" gas fields had been discovered since 1939 although he said under cross examination that he had heard of additional wells which had been brought in and then capped. He said that it was the policy of the gas companies to provide a market for whatever gas supplies were economically available.

PLANS and Speculations

California state personnel board announced that an assistant estimator of building construction ($310-$370) will be selected thru exams given June 21. Four years' experience and high school graduation are requisites.

oOo

Five years of mechanical engineering experience is required for a state position as mechanical engineer with the division of architecture. Its salary range is $435-$535. Exams will be given June 7.

oOo

Westinghouse Electric Corporation expects to build $30 million worth of electrical and steam equipment in its Sunnyvale plant in 1948. The plant was very recently acquired from Joshua Hendy Iron Works.

oOo

The present Farmer's Market site near the mint will be abandoned on July 1. The city is in the process of acquiring a new site at Alemany and Bayshore Blvds.

oOo

The San Francisco Real Estate Board has complained that the mayor's budget is too high. SPEER favors spending $20 million for rehabilitation of muny railway; $2,200,000 for restoring Market Street Railway purchase debt; $2,736,000 for traffic signals; $5 million for off-street parking; $6,400,000 for the Market - Portola Freeway, and $2 million for the Thirteenth St. lateral freeway.

oOo

Formation of a water user organization in Butte County was decided upon by 28 citizens who voted to have the board of supervisors appoint a five-man committee to study different types of organization and report at a meeting May 15 at 8 p. m.

oOo

The war assets administration has signed a lease turning over 58 acres of land and 18 army buildings to the Linda Elementary School of Yuba County

oOo

Directors of the Tahoe City public utility district have voted to improve the water service and furnish street lights within the district.

#

TILE OUTPUT IS UP IN FIRST QUARTER

LOS ANGELES. — Ceramic tile production for the first quarter of 1947 was 47 per cent greater than in the corresponding period last year and totalled more than 12,745,000 square feet. March output of more than 6,588,000 square feet, 11 per cent over the February total, resulted in the highest annual production rate since 1929.

West coast members of the Tile Council are Gladding, McBean & Co., Pacific Clay Products, Pomona Tile Manufacturing Co., all in Los Angeles; General Tile Corporation in El Segundo, and Pacific Tile and Porcelain Company in Hynes.

#

INCREASE SLIGHTLY OFF

WASHINGTON—New construction put in place in April 1947 totaled $846 million, a 7.0 per cent increase over March, the construction division, Department of Commerce, announced today.

The April figure represented less than a normal seasonal rise from March but was a gain of 19.7 per cent over April of last year.

#

ADDRESSES CED MEET

R. M. Gillis, construction engineer for the state division of highways, will address a meeting of the Construction Equipment Distributors on Monday, May 12, at the St. Julian Cafe.

San Diegan Elected President of State Plumbers Association

More than 1,000 California plumbing contractors urged manufacturers, jobbers and wholesalers to quote firm prices on materials so they can bid on projects without including escalator clauses. The resolution was passed in the closing session of the 46th annual Master Plumbers Association convention late Wednesday at the Palace Hotel.

Ed Shafer, of San Diego, was elected president of the California association.

Harold Newman, Modesto, will serve as vice - president for the 1947-48 term. William Toner of Pomona, was elected secretary-treasurer. J. B. Hawley, of Sacramento, is the new regional director.

A banquet and grand ball was held Wednesday evening. The convention was supervised by Convention Chairman Daniel Hayes, of San Francisco. The 1948 convention will be held in San Diego in May.

Painters Win 25c An Hour Increase; Work 35 Hours In Bay Area

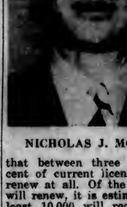
The painters' and decorators' joint committee today announced Bay Area ratification of a union agreement raising the hourly wage of the painting trades from $1.75 to $2.09 an hour.

The painters will have a 35-hour work week, working seven hours a day. Formerly, they worked eight hours a day on a special permit. Overtime will be allowed on emergency work only.

The agreement covers Marin County, Contra Costa County, San Francisco County, the Peninsula and Santa Clara County, and becomes effective June 1.

Licenses End July 1 for 45,000 Contractors; Urge Speed and Care in Returning Renewals

By NICHOLAS J. MORRISEY
Deputy Registrar, Contractors State License Board
(As Told to Philip G. Brady)



The greatest renewal activity in the history of the contractors state license board got underway during the past week when license renewal applications were mailed out to some 45,000 California contractors. To handle the record - breaking number, the preliminary processing period has been extended from 30 to 60 days. Unless renewed, the licenses will expire July 1.

The number of state licenses already far exceeds the previous high of 1938-39 when close to 40,000 licenses were issued. After a slump during the war, the number of licensed contractors in the state has increased more than fifty per cent in only three years.

Examinations for original licenses will be held as scheduled during May and June. Successful applicants during May will receive a regular renewal form along with their licenses. Those passing the June exams will not receive their licenses until the start of the next fiscal year in July unless the necessity is clearly shown. This will allow that small group to dispense with filing a renewal.

Under the law, licensees who do not renew before July 1 are allowed 90 days to obtain a renewal before being forced to apply as an original applicant. These delinquent renewals, it might be pointed out, must be accompanied by a $10 fee, which represents a 100 per cent penalty, as the regular renewal fee is only $5.

Based on past records, Registrar Eugene E. Zeiss forecasts

NICHOLAS J. MORRISEY

that between three and six per cent of current licensees will not renew at all. Of the number who will renew, it is estimated that at least 10,000 will require address changes.

It has been our experience that thousands of contractors will find their license renewals placed in a suspended status because of mistakes or omissions in the appli-

(Continued on Page 7)

GROOVER AND I

SEE WHAT I MEAN?

Turkey and Greece 400 million—Korea 100 million—Mexico 336 million—Philippines 600 million—Great Britain 3.5 billion (surprise!)—France 250 million—China 500 million—Russia ???—Poland ???—and here's a pay-off: Czechoslovakia 60 million!

☆ ☆ ☆

Just think of a number — any number — and the State Department can dig down in its fish bowl and come up with a loan - plan matching your number.

☆ ☆ ☆

These gifts and grants may be necessary or expedient, but is it necessary to continue sugar-coating them with the name "loan"? Just whom are we kidding?

☆ ☆ ☆

While we are passing out these gifts and grants, Congress is refusing to INVEST in Western Reclamation Projects — bringing life-giving waters to parched and thirsty lands—projects which would repay and return themselves a thousand-fold!

PIPE IN TEXAS GAS, SAYS PUC OFFICIAL

A suggestion that a natural gas pipeline from Colorado or Texas be used to augment northern California supplies was made by Roy A. Wehe, assistant director of the public utilities department of the state public utilities commission, as the commission closed its San Francisco hearing Thursday.

Wehe testified that within ten to fifteen years California's natural gas supply would be insufficient for industrial usage, and that it would be exhausted in 25 years, if depleted at the present rate. The commission closed the hearing and took the testimony under advisement.

Building Materials Cost Has Been Advanced Through Increased Freight Rates This Year

WASHINGTON.—While it is impossible to ascertain exactly how much, percentage-wise or in any other way, the cost of building materials has been advanced by the increased freight rates imposed the first of this year, it is certain these prices generally have reflected the rate boost, Washington spokesmen said today.

The story really begins July 1, 1946, when the first post-war raise, a general six per cent increase, was made effective. But the heaviest burden for shippers came January 1, 1947, when a 20 per cent boost was announced for most of the nation. The raise was up to 25 per cent in an area north and east of the Mississippi and a line roughly east from St. Louis, through Lexington Kentucky, and Lynchburg, Virginia.

(The January 1 increase in rates included the previous six per cent.)

In all other building materails except the structural clay products, the rise was felt keenly and, it may be assumed, promptly passed on to jobber, yard or consumer as the case might have been. A spokesman for the Structural Clay Products Institute said he doubted if any difference in price of these items would be felt anywhere because of the freight rate change. A peculiar circumstance applied to structural clay products which did not force the maximum rate over the previous charges.

The Building Products Institute said it had tried to ascertain affect of the freight boost on commodities but could not arrive at an estimation even in a general, percentagewise way.

The scarcity in most building items, however, already forcing prices up to a straining point, tends to minimize the addition of freight costs whenever they are included.

Following are the January 1 freight rate increase for major building materials:

Structural clay products: 20 per cent subject to maximum of 30 cents per ton.

Refractories: 20 per cent subject to maximum of $1.20 per ton.

Building blocks (cement and cinder): same rates as structural clay.

Sand and gravel: Flat increase of 12 cents per ton, gross or net.

Lumber and lumber items, including millwork: 20 per cent increase throughout the country subject to maximum of 10 cents per 100 lbs. or two dollars per ton.

Cement, lime and plaster: 20 per cent subject to six cents per 100 pounds or $1.20 per ton.

Iron and steel (including cast iron pipe and fittings), nails and wire: 20 per cent subject to maximum of $2 per net or gross ton.

Aluminum: 20 per cent subject to maximum of 12 cents per 100 pounds or $2.40 per ton for bars, castings or sheet.

Aluminum: 20 per cent subject to maximum of 10 cents per 100 pounds or $2.00 per ton for ingot, pig or slab.

A few simple recollections indicate that most of the increases, if not all of them (wherever they represent real increased cost to the shipper) will be passed along. For example, the defunct office of price administration, during its operative days, allowed manufacturers to pass along many rate changes and a host of wage increases, as well.

The increases thus reflected in consumer price as a result of the freight charges newly announced, are bound to vary from industry to industry, depending on previous rates charged compared with newly permitted maximums.

Those who study the freight rate fluctuations say that another raise in charges is expected later in 1947. They point out that the railroads now are before the Interstate Commerce Commission seeking passenger rate boosts. The best opinion says there will be forthcoming. In natural sequence they probably will be followed by another hike in the freight charges.

Wolcott May Delay T-E-W Legislation In Bank Committee

WASHINGTON—The great game of politics seems to be shaping the destiny of the Taft-Ellender - Wagner long - range housing bill, now reported to be nearing senate floor debate.

The prospects for passage of this controversial piece of housing legislation through congress and successful Presidential approval seemed more remote today as Chairman Jesse P. Wolcott, of the house banking and currency committee, announced there was little or no chance of his group getting around to consideration of it before adjournment. This would be the case, he intimated, even if the senate passed the bill to project government subsidization of housing for the middle and lower income groups.

'Deflating Tendency'

"There are more pressing matters in the immediate future," he is quoted as saying.

He acceded to the public housing proponents in only one detail. He said his committee may find time for the "necessary five or six weeks" for hearings on the housing measure in the second session.

Meanwhile, the senate banking and currency committee offered a 50-page report urging prompt approval of the T-E-W bill. It gave as one of its chief reasons for demanding quick action the contention that the proposed law would bring "more housing more quickly," lower prices, and a stabilized economy.

The committee's majority report held that such a program of construction could avert a boom and bust condition in the construction industry. Further, it claimed that passage of the T-E-W measure would assure decent living for low and middle income families.

'Aids Redevelopment'

Charles W. Tobey, republican from New Hampshire and chairman of the senate committee reporting out the bill, denied it would cost fantastic sums and said it would prove to be self-liquidating.

Rent subsidies are a necessity if slum elimination is to be achieved Tobey said.

Renew Licenses

(Continued from Page One)

cations. In fact, our Sacramento office has devised fourteen form letters to achieve correction of the most consistent errors.
Foremost among these errors are: 1) failure to enclose fee with application; 2) failure to enclose application with fee; and 3) requesting change in name without stating whether there is a change in the business entity.
While the first two errors may be ascribed to carelessness, the "change in name" problem probably arises over a misunderstanding. If the old license was granted to a partnership or coporation and during the past year a change in personnel has occurred, it is important to note whether there has been a change in entity.
If a new business entity is created a new license is required,—the old license cannot be renewed.
While an original application is required from a new entity, a new examination is not required if a principal in the new entity has taken the exam within the past two years. Even if that condition is not met, upon proper showing of experience and other qualifications, the registrar, at the direction of the board, may waive the examination requirement.
The board assumes no responsibility for cash sent with renewals. Checks, preferably certified, or postal orders should accompany the applications. At any rate, all renewals are held three weeks until the checks have cleared.
A new question on the renewal form this year should command the attention of all contractors: It requests the name of the compensation insurance carrier, the policy number and the expiration date. If no insurance is carried, contractors are required to explain their failure to do so. A footnote points out that failure to carry such insurance is adequate grounds for suspension or revocation of license.
One question has been dropped: Contactors are required no longer to state whether they are "active" or "inactive". This question was asked only during the war years to secure statistical data.
We urge all contractors to take care of their license renewals as soon as possible for the most efficient handling. Mail it in early and correctly and you'll have a valid license on July 1.

NOW You Can Get that "EXTRA" building You've Wanted!

ALL-STEEL "QUONSETS" AT LOW-COST
Versatile, rugged— Easy to use and maintain

Yes, an economical, durable "Quonset" is the answer to your building problem. In its simplest form with an open front, it makes a fine loafing barn for livestock, or a roadside stand; equipped with sliding doors, the fire-resistant, weatherproof "Quonset" provides protection for implements and vehicles; fitted with a solid front panel, it becomes a sturdy toolroom, workshop, or warehouse. If additional space is needed, the building is easily extended by adding as many 12-foot sections as you wish.

ETS-HOKIN & GALVAN

"When We're Working in Close Quarters We
TRAXCAVATE"

says Mr. J. E. Nelson of the firm of Johnson & Nelson, Marin County Contractors. "Our IT4 TRAXCAVATOR is the ONLY RIG for close-in work around foundations and concrete forms, and that's only one of the many jobs it does for us. It's one machine that keeps busy."

TRAXCAVATE for PROFIT

All over the country contractors are calling the Traxcavator "the busest machine on the job," and here's why: They use it for land-clearing and for leveling; they use it for excavating and for truck loading; they use it for backfilling and for cleanup work. From the time the job is started 'til the earthwork is completed the Traxcavator is busy. That spells *profit* for the contractor because the profitable machine is the one that keeps busy. That's why we say

Official Proposals

FIRST PUBLISHED TODAY

Marin County, across Lagunitas Creek in Samuel P Taylor State Park

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the Bridge Engineer, Room 338, Public Works Building, Sacramento, California, until 2:00 P. M. o'clock on May 20, 1947, at which time and place they will be publicly opened and read, for performing work as follows:

Marin County, across Lagunitas Creek in Samuel P. Taylor State Park (IV-Mrn-State Park) a structural steel and timber bridge to be constructed.

Plans and specifications, and forms of proposal bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the Bridge Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and having type)	1.90
Concrete vibrator operator	1.575
Flagman	1.17
Jackhammer operator	1.575
Laborer	1.15
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Painter (brush)	1.375
Painter (spray)	1.75
Pile driver man	1.86
Reinforcing steel worker	1.75
Roofer	1.75
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.15
Overtime — One and one-half (1½) times the above rates.	
Sundays and holidays—one and one-half (1½) times the above rates.	

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the Office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are desirous of securing plans, specifications, and proposal forms for the purpose of preparing and submitting a proposal for this work may do so subject to certain conditions hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. A deposit of $25.00 will be required to guarantee safe return of plans and specifications.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 1 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said proposal Requirements and Conditions.)

The Highway Commission of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on June 4, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the Specifications therefor, to which special reference is made, as follows:

Alameda County, over East Shore Freeway at 23rd Avenue in the City of Oakland (IV-Ala-69-Oak), an overcrossing to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Unskilled Labor	
Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Derrick operator	2.10
Flagman	1.15
Jackhammer operator	1.375
Laborer	1.15
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity or more)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.15
Overtime one and one-half (1½) times the above rates.	
Sundays and holidays—one and one-half (1½) times the above rates.	
Operator of power shovel or other excavating equipment shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.40
Painter (brush)	1.50
Painter (spray)	1.75
Pile driver man	1.86
Reinforcing steel worker	1.75
Roofer	1.75
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25

(Continued from Page 13)

fications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the Office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on June 4, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing Highway in accordance with the specifications therefor, to which special reference is made as follows:

El Dorado County, between Georgetown and U. S. Ranger Station (Int-E, D-1099), about three and six-tenths (3.6) miles in length, to be graded and surfaced with imported base material and penetration treatment and seal coat applied thereto.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt dryerman or fireman	$1.60
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work hereinproposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Repairing and Hauling Steel Truss Members for future use as a bridge across Redwood Creek

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the Bridge Engineer, Room 338, Public Works Building, Sacramento, California, until 2 P. M. o'clock on May 20, 1947, at which time and place they will be publicly opened and read for repairing and hauling steel truss members for future use as a bridge across Redwood Creek, about 20 miles east of Eureka (I-Hum-20-C).

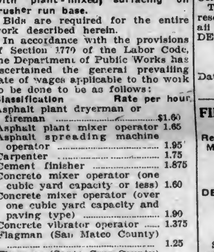
Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the Bridge Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.



In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Derrick operator	$2.40
Flagman	1.15
Laborer	1.15
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Painter (brush)	1.4375
Painter (spray)	1.6875
Tractor driver	1.95
Truck crane operator	2.10
Truck driver, flat racks carrying under 18,000 pounds	1.275
Truck driver, flat racks carrying over 18,000 pounds	1.40
Any classification omitted herein not less than	1.15
Overtime one and one-half (1½) times the above rates.	
Sundays and holidays—one and one-half (1½) times the above rates.

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

DEPARTMENT of PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 12th and "N" Streets, Sacramento, California, up to 2:00 P. M., Tuesday, May 20, 1947, said bids thereafter on said day to be publicly opened and read for Erection and Completion of Swine and Sheep Barn, 1 A District Agricultural Association, San Francisco, California, in accordance with plans and specifications therefor.

The structure is to be 200 x 240 approximately with reinforced concrete walls, wood timber trusses, and protected corrugated metal roof.

Separate bids will be entertained for the following segregations of the work:

General work
Plumbing Work
Electrical work.
Alternate bids will be required.

Authority Notice: Approval for this construction is authorized under CPA order WHF-1, Serial number 5-1-6893.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Mason Tenders	$1.37½
Bricklayers	2.05
Carpenters	1.75
Cement Finishers	1.75
Cement Mixer Operator (up to One Cu. Yd.)	1.60
Cement Mixer Operator (over One Cu. Yd.)	1.90
Electric Workers	1.87½
Iron Workers (Ornamental)	1.85
Iron Workers (Reinforcing)	1.75
Laborers (Building)	1.25
Painters (Brush)	1.75
Plumbers	1.87½
Sheet Metal Workers	1.75
Any classification omitted herein not less than	1.25

Overtime—one and one-half times the above rates.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are desirous of securing plans, specifications, and proposal forms for the purpose of preparing and submitting a proposal for this work may do so subject to certain conditions hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. A deposit of $25.00 will be required to guarantee safe return of plans and specifications.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 1 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

Nevada State Prison in Carson City, Nevada

BIDS WANTED FOR STATE BUILDING IMPROVEMENTS

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned, at his office, in Carson City, Nevada, until and opened at 2:00 o'clock P.M., on the 20th day of May, 1947, for the construction of a new cell block, remodeling and alteration of an existing building and building a new second floor and gas house at the Nevada State Prison in Carson City, Nevada. Such sealed proposals as are received will be publicly opened and read in the Governor's office at the above hour and date.

The minimum wage to be paid for labor on this contract shall be as follows: $1.0625 per hour for unskilled labor, $1.25 per hour for intermediate grade labor, and $1.50 per hour for skilled labor.

All labor employed under this contract shall be free labor as long as it is available from the Union or employment agency having jurisdiction.

The Nevada State Employment Office at Carson City, Nevada, is the local agency designated to prepare the employment lists.

Plans and specifications may be examined at the office of the undersigned: The Associated General Contractors of America, 216 Pine Street, San Fragcisco, California; and the Golden Hotel, Reno, Nevada; and Edward S. Parsons, Architect, 210 West Second Street, Reno, Nevada. Plans, form of proposal, contract and specifications may be secured by qualified bidders through the office of the undersigned and Edward S. Parsons, Architect, 210 West Second Street, Reno, Nevada. A deposit of fifteen dollars is required for each copy of the plans with proposal form, which will be refunded upon return of the plans, in good condition, within fifteen days after the opening of bids. Additional sets may be had at the rate of $10.00 per set, $5.00 of which will be refunded upon their return in good condition within fifteen days after opening of bids. Bids must be on the proposal form furnished by the State Planning Board and must be accompanied by a certified check, a cashier's check, or cash in the amount of five percent of bid. Checks shall be made payable to the State of Nevada, State Planning Board.

The right is reserved to reject any or all bids.

ROBERT A. ALLAN, chairman,
Nevada State Planning Board,
Carson City, Nevada.

PLANS and Speculations

District Attorney Edmund G. Brown announced his office would investigate high housing costs in the Bay area, including "feather bedding" practices by unions whereby unnecessary workers are hired; collusive bidding; manufacturers' refusing to sell except through several middlemen, and builders' profits.

oOo

Kern County voters voted six to one a bond issue to finance a school improvement program totaling nearly eight million dollars.

oOo

Eight Humboldt and Mendocino County redwood lumber companies, operating despite AFL picket lines have granted a wage increase of 7½ cents an hour for more than two thousand non-union maintenance employes. It is a three cent increase, effective May 16.

oOo

Supervisor Chester R. MacPhee will ask for stricter city legislation making strict inspections of dynamite dumps mandatory. He will ask that a fee be charged for dynamite storing permits and that the funds be used to finance inspections.

oOo

Berkeley officials have informed the Bay Area Council that they favor the state proposal for a second Bay crossing paralleling the present bridge, and possibly a third bridge at another site later.

oOo

Creation of a Monterey County flood control and water conservation district would be authorized upon passage of a bill which is being considered in the state senate. The assembly already has passed it.

oOo

Site of the proposed trestle-tube crossing of the bay, recommended by a joint army-navy board, was inspected recently by members of the Bay Area Council traffic and transportation committee.

oOo

The executive committee of the Contra Costa Memorial Hospital Association has gone on record as recommending that a fund raising campaign contract we awarded to a promotional firm.

oOo

Committees have been appointed in the Manteca area's drive for a community hospital. The group met Wednesday.

oOo

The Contra Costa county surveyor has been empowered to apply to the state director of finance for $15,200 to obtain rights-of-way for realignment of two miles of Crow Canyon Road. The estimated cost of the project, which will be financed from state and federal treasuries, is estimated at $229,000.

oOo

A Colusa County Farm Bureau committee meeting yesterday afternoon with the county supervisors, contractors and highway engineer, recommended that rebuilding of the Colusa Bridge across the Sacramento River be done between July 15 and September 1. It is a $150,000 project.

oOo

Joint Highway District No. 9 has signed a contract with the state highway division for construction of 1.4 miles of the new Coast highway in the Waddell Bluffs sector in upper Santa Cruz County.

oOo

In Humboldt County Frank E. Kelly, county surveyor, has drafted plans for improvement and reflooring of the bridge across the south fork of Eel River at the entrance to Whitemore Grove State Park, at an approximate cost of $45,000, including engineering and contingencies.

California Cities Lead the Nation in Urban Construction

WASHINGTON.—Los Angeles stood way out in front in dollar volume of urban construction in February, 1947, according to figures released by the bureau of labor statistics.

In the breakdown, the west coast city led all other in total dollar volume, in residential construction as well as in additions, alterations and repairs.

Only in public works and utilities, among the principal categories, did the California center yield its place of prominence—to Norfolk, Va.

According to these tabulations, Los Angeles recorded permit valuations of $16,890,321 for February, all non-federal work.

San Francisco was fourth with $4,797,140 worth of work, including $2,565 in federal construction.

Commercial Jobs

BLS listed these cities in order of total permit valuation for the second month of 1947: Los Angeles, Detroit, Cleveland, San Francisco, Norfolk, New York City, Washington, Chicago, Miami, and Dallas.

The residential classification lists seven cities. Los Angeles tops with $8,805,531, Detroit stands second, and San Francisco third with $2,366,660. Washington follows, then Miami, New York City and San Antonio, Texas.

Quincy, Ill., takes preference in the construction of churches for February with a permit valuation of $750,000, while Los Angeles is second in this category.

The two principal west coast staged a two-entry run for new office building space but San Francisco, with $936,500, was far outstripped by the down-state rival, Los Angeles, which showed $2,781,150 in permit valuations for this purpose.

Only in public works and utilities did Los Angeles fade out of the BLS picture entirely. Here, eight towns were listed. Norfolk topped with $3,000,000 to lead Elkhart, Ind., was second with $650,000. But again, California was represented, Alhambra running third with $60,000.

Following in the public utilities and public works were Chattanooga, Comerville, Mass., River Grove, Ill., with $478,800, Chicago with $273,200, and El Paso. All this work was given as non-federal in character.

Tops Remodeling List

Finally, in additions, alterations and repairs, Los Angeles repeated its top billing with, $2,958,92, to lead a list of seven places.

San Francisco was second in the room in surveying existing facilities. Dr. P. K. Gilman, 42d Phelan Building is the state survey director in California. His report, nearly completed, will cite a need for 18,000 beds in the state. Seven hundred of these, which may be got underway this year, have an estimated cost of $50 million in construction work, based on present costs. The extent of the 1947-48 progam will depend upon the amount of state and local aid which is available to be matched on a one-third each basis with one-third federal aid.

This was pointed out by Dr. J. B. Askew, chief of the California bureau of hospital inspections. The inspection bureau participates because the law provides specifically that aid can be granted only to hospitals licensed by the state.

Vincent Palmer, president of the California Council of Architects, pointed out that hospitals owned by cities and counties are not required to be licensed by the state, but merely to conform with state

(Continued on Page 7)

GROOVER AND I

ADIOS, DON MIGUEL, —'TWAS A PLEASURE

This nation has just been host to a most charming guest—Presidente Miguel Aleman of Mexico. And "Mike" didn't do so bad for himself, either! Free trip, including transportation, room and board, an honorary college degree, and the clincher on a $385 million "loan".

☆ ☆ ☆

It was reported that while in Kansas City, Senor Aleman sent President Truman's mother "a basket of roses and carnations". This charming gesture was very timely—so near Mother's Day. The touching tribute was on the state department itinerary from the beginning; however, it was first mentioned as "a basket of carnations". (There will get you seven that this sentimental bit of corn was not only dreamed up by the state department, but they also paid for the flowers.)

☆ ☆ ☆

While Aleman was in Washington, the vice-president of the Philippines arrived on the Pacific Coast en route to Washington to put the touch on the U. S. Treasury. (Yes, even vice-presidents are doing it now!)

☆ ☆ ☆

This would have made Washington crowded so the protocol boys "pulled the board" on the vice-president and headed him into a California siding until Aleman had cleared Washington.

☆ ☆ ☆

What this country needs is a vice-president—then he could visit President Truman and perhaps get some grants and loans for the United States.

☆ ☆ ☆

It would be nice if the taxpayers of the United States could invest some of their own money in this nation and its future.

Detroit Steel Cuts Prices 5%; Scraps Escalator Clauses

DETROIT.—The building industry's response to President Truman's appeal for lower construction costs was marked this week by the announcement that Detroit Steel Products Company had wired President Truman announcing a five per cent reduction in the list price of Fenestra residential steel casement windows—and even more important—the elimination of escalator clauses in all material contracts.

Company list prices had advanced only 30 per cent over prewar prices. The steel company has the largest backlog of orders in its history and is in peak production at its plants. It is the country's largest producer of steel windows.

BIG INCREASE IS SEEN IN FRESNO STREET WORK

FRESNO.—Fred M. Ashley, commissioner of public works, today disclosed that the city will spend about 35 per cent more on street maintenance this fiscal year than last.

Much resurfacing work will be required, he added, and these streets will have priority: Tulare from Van Ness to the Santa Fe crossing and Van Ness from Stanislaus to Divisadero.

Mammoth Hospital Aid Plan Operation Told at AIA Dinner

The billion dollar five-year hospital aid plan is entirely a state program, Marshall Shaffer, chief architect of the U. S. public health service, told nearly seventy-five members of the Northern California chapter of the American Institute of Architects holding a dinner meeting at the Fairmont Hotel, Thursday night.

The federal government participates only in an advisory capacity, because federal money is involved. That will mean red tape, he warned, but the administrative set-up of the program can reduce this to a minimum.

Shaffer stressed the need for close cooperation between the architectural profession and the state agency administering the program, declaring:

"The pattern that your state agency is establishing at this very minute will affect the future of every man here as far as hospital planning goes."

He outlined a four-point program to insure the success of the hospital aid program in California:

1—**Maintain good contact between the state hospital agency and the architectural profession;**

2—**Render every assistance possible to the state agency technically;**

3—**That architects be placed immediately on the state council or agency;**

4—**That the AIA inaugurate well planned joint seminars of the Northern and Southern California chapters to study intensively the design of hospitals.**

The PHS chief architect decried the scant knowledge of hospital planning. There are more hospital men in California than anywhere, he said. Although hospital architecture is a very little known subject, any architect who applies himself diligently can learn the game.

Shaffer participates in the hospital aid program as top man. His office makes the final check in the plans submitted before money may be allocated. If the plans meet the requirements of the public health service, they are okayed and the money is allocated. If not, they are returned with comments on their shortcomings.

Shaffer has headquarters in Washington. His office is represented locally by Charles H. Coegan, district architect, whose job it is to consult with architects who have never done hospital planning before, and to look over all plans before they are forwarded to the Washington office.

The primary step in the program is surveying existing facilities. Dr. P. K. Gilman, 42d Phelan Building is the state survey director in California. His report, nearly completed, will cite a need for 18,000 beds in the state. Seven hundred of these, which may be got underway this year, have an estimated cost of $50 million in construction work, based on present costs. The extent of the 1947-48 progam will depend upon the amount of state and local aid which is available to be matched on a one-third each basis with one-third federal aid.

This was pointed out by Dr. J. B. Askew, chief of the California bureau of hospital inspections. The inspection bureau participates because the law provides specifically that aid can be granted only to hospitals licensed by the state.

Vincent Palmer, president of the California Council of Architects, pointed out that hospitals owned by cities and counties are not required to be licensed by the state, but merely to conform with state

ASME MEMBERS TOUR MAMMOTH TUNNELS AT MOFFETT FIELD SOON

The American Society of Mechanical Engineers will feature an inspection trip to Ames Aeronautical Laboratory at Moffett Field for its May meeting the twenty-second, Morrough P. O'Brian announced today.

The engineers will take guided tours through the supersonic wind tunnel, the 12-foot low turbulence wind tunnel and the world's largest (40x80-ft.) wind tunnel. Part of the tour will be devoted to flight research and investigation exhibits. Moving pictures will be shown in the main auditorium on "Transonic Flutter" and "Deicing". Dinner will be served at the laboratory's cafeteria.

Creedon, in Northwest Ignores Criticism of General R. Littlejohn

WASHINGTON.—General Robt. M. Littlejohn, who has upset many an administration applecart during his brief, but stormy, career as administrator of the war assets administration, today loosed his latest criticism at Housing Expediter Frank R. Creedon.

Testifying before Senator Ferguson's war investigating committee, Littlejohn said Creedon's office was, in his estimation, "not in good order", when the new housing expediter worked for WAA. The witness went on to say that he had conferred with Creedon a number of times about the alleged inefficiency and that later Creedon resigned of his own initiative.

A war assets spokesman told the Dodge newspapers that press reports quoting Littlejohn as telling the committee that Creedon's WA activities were "unsavory" were untrue. This official said Littlejohn had reference to other activities than Creedon's when he used the unsavory wording.

Ferguson pressed Littlejohn about Creedon's quitting WAA, asking if it was not true that Creedon was fired. The WAA administrator said no, that Creedon finally quit on his own.

Creedon was on the west coast talking to manufacturers of building materials and dealers in an effort to persuade them to reduce prices.

Senate Resolution Lashes Douglas Bill

SACRAMENTO.—A resolution voicing sharp disapproval of Congresswoman Helen Gahagan Douglas' bill setting aside 2,316,000 acres in northwestern California for a redwood memorial park in honor of President Roosevelt is pending before the state senate committee on natural resources.

The resolution states that the state itself has acquired more than 43,000 acres of redwood forest, that the state enforces reforestation regulations for conservation of redwood areas subject to lumbering; and that the Douglas bill would take more than half the taxable areas of Del Norte, Humboldt and Mendocino Counties and 85,000 acres in Sonoma County, and would place "almost the entire lumbering industry in this part of California under federal control."

SLASH $300 MILLION FROM FPHA BUDGET

The senate banking and currency committee approved S. 1154, a bill introduced by Senator Capehart of Indiana, reducing the authorization for the veterans emergency housing program under the Patman Act. The figure was lowered in the approved bill by $300 million—lowered from $400 million to $100 million. Most of this money includes subsidy payments.

The senate committee also approved a companion bill to the house resolution giving the federal public housing authority $35,500,000 with which to complete its temporary housing program. This represented a reduction, in both instances, from the $50 million which President Truman had requested for FPHA.

PROJECTS FOR HAWAII

HONOLULU, T. H.—This territory's house of representatives is considering a $10,500,000 public works appropriation, which would provide a $5,500,000 overseas freight terminal in Honolulu harbor, a $4 million traffic tunnel through Koolau mountain range on Oahu, and a $1 million overseas terminal at Kawaihae harbor on Hawaii.

Fund Return Bill to Senate Simultaneously With Wolcott Measure

By Ernest J. Mickel

WASHINGTON. — Senator Homer E. Capehart's bill to reduce the authorization for subsidy payments under the Veterans Emergency Housing Act from $400 million to $100 million was reported out of the senate banking and currency committee yesterday.

The need for such a bill was not readily apparent in view of Housing Expediter Frank Creedon's announcement recently that only $65 million of the authorized funds would be used by June 30, this year. Senator Capehart's office said the legislation was aimed at "removing a potential treasury obligation".

The Veterans Emergency Housing Act of 1946 authorized the housing expediter to draw on reconstruction finance corporation funds to the extent of $400 million for the duration of the housing program. These funds were to be used as incentive payments to producers of scarce building materials in an effort to bolster the supply of these items.

A few weeks ago Creedon wrote to RFC Director Henderson, informing him that OHE would use no more than $65 million of the authorized $400 million before July 1, 1947. Subsidies are no longer paid out except to producers of cast iron soil pipe and for pig iron in foundry grade.

With the demise of price control in the middle of November, 1946, it became obvious that the subsidy program, as intended by congress, would no longer be effective. Its range of application soon dwindled to only the very scarce building items.

Senator Capehart's attempt to amend the housing act and reduce the subsidy authorization by three-fourths its original amount can only be interpreted as a buffer against indiscriminate use of the RFC funds.

There is political significance in the timing of the amending measure. It appeared this week it would come onto the senate floor about the time the Wolcott bill is received strikes from the hous passage. S. 154 certainly would give a conference session material for trading purposes since the Wolcott legislation already has wiped out subsidies along with most of the other Patman bill provisions as it passed the lower body.

So, there may be considerably more in the amendment than just an attempt to "remove a treasury obligation".

Senator Morse's bill to provide subsidies for continued access road building into remote timber regions is not related to the Capehart measure in any way, it was said.

Creedon Asks Mayors Aid on Paper Liner For Gypsum Board

WASHINGTON — Housing Expediter Frank R. Creedon has requestered mayors emergency housing committees to assist producers of gypsum board and lath in obtaining paper liner where shortages of such board and lath now exist.

Seattle's committee, under the chairmanship of F. R. McAbee, has been the first of the mayors' committees to work out a plan whereby 200 tons of paper will be obtained monthly from the Pacific Paperboard Company of Longview Wash., and shipped to the National Gypsum Company's plant at Ft. Dodge, Ia. The Fort Dodge plant has been operating on a 5-day week because of the shortage of paper liner. The additional paper liner will enable it to work a sixth day, and the production of this sixth day will be sent to Seattle where it will bring into balance the gypsum board and lath requirements for housing in that city.

ROAD BUILDERS PLAN FIRST EXHIBIT IN 9 YEARS AT CHICAGO

WASHINGTON. — The most spectacular road show in the history of the American Road Builders' Association is scheduled for Soldier Field, Chicago, July 26-24, 1948.

In announcing the first outdoor summer show, J. T. Callaway, ARBA president, states that for the first time in the long series of road shows the construction equipment manufacturers will have unlimited outside space for proper display of their machines, while exhibits requiring cover will be amply taken care of in expansive enclosed exhibition halls.

"Because of the lapse of eight years since the last road show", Callaway says, "we have decided to extend the show to nine days to give the entire construction and road building industry and profession a chance to see the new developments in the machines and materials of construction and maintenance."

GRAND JUNCTION JOB DELAYED UNTIL PIPE DELIVERED IN 1948

Grand Junction, Colo.—Work on the 8 million-gallon water system plan here is being held up pending delivery of pipe. The latest report stated that delivery on 18-inch cast iron pipe for increasing flow line capacity is the first quarter of 1948.

Coupled with the delay in delivery of the pipe is the fact that the bid price on pipe now ordered is $6.48 per foot compared to a bid price last year of $5.57.

#

MAY INTRODUCE BILL FOR SEAWAY PROJECT

WASHINGTON.—A spokesman for the National St. Lawrence Associated predicted that a bill for international development of the St. Lawrence Seaway would be introduced in congress next week. It would have to be approved jointly in principle by Canada.

Other bills on the St. Lawrence Seaway, without the self-liquidating feature contained in this one, including the financing clause, have been allowed to die.

Severe Budget Cut To Curtail Mining Research Drastically

Dr. R. R. Sayers, director of the bureau of mines, today informed Secretary of the Interior J. A. Krug that he had alerted his field staff to prepare for closing four large and eight small pilot plants, abandoning or sharply curtailing exploration and research on fissionable and other strategic minerals, and discontinuing numerous services to industry and the public, as a result of budge reductions voted by the house of representatives.

As approved by the house, the Interior Department Appropriation Bill carried $10,583,875 for the bureau of mines, a cut of $6,360,125.

Major plants scheduled for closing July 1, 1947, are the electrolytic manganese pilot plant at Boulder City, Nev., the bauxite beneficiation mill at Bauxite, Ark., the rotary kiln sponge iron pilot plant and laboratory at Laramie, Wyo., and the lignite gasification pilot plant at Grand Forks, North Dakota.

Smaller pilot plants to be abandoned are the zinc dithionate, vanadium, and antimony plants at Salt Lake City; electrothermic magnesium plant at Pullman, Wash.; nonmetallurgy plant at Boulder City, Nev., and the alumina plant at Rolla, Mo.

In addition, construction will be halted on a zirconium pilot plant at Albany, Ore. and metallurgical research will be drastically curtailed—50 per cent in most instances—in remaining plants.

SURPLUS BUILDINGS TO PROVIDE STUDY SPACE FOR 600 STUDENTS

LOS ANGELES — Additional study hall space for approximately 600 students will be provided in the near future by two temporary buildings to be erected on the Los Angeles campus of the University of California.

These buildings are among the 40 or more being trucked to the campus from the Santa Ana army air base.

#

MORTGAGE REFUNDS

WASHINGTON. — Refunds to borrowers amounting to $332,264 on 1,576 foreclosed homes financed under FHA's insured mortgage system have been or are ready to be made under provisions of the National Housing Act, it was announced today by FHA Commissioner Raymond M. Foley.

$35,000 Cyclotron Building Is Begun On Southern Campus

LOS ANGELES.—Work on the $35,000 Cyclotron Building on the Los Angeles campus of the University of California got under way this week with the calling in of construction bids and the pouring of foundations for the 85-ton instrument.

The structure will house the 37-inch cyclotron which is to be transferred from the Berkeley to the Los Angeles campus of the University.

The building will be made of metal-frame construction with precast-concrete sides and a metal-trussed roof. It will contain a cyclotron room and shop, an instrument control room, a counter room, a chemical laboratory, and two offices.

Water baffles will protect researchers in the building, and radiation is not expected to be effective beyond 60 feet. The building will be located south of the present physics-biology building.

Construction Recession Indicated by Contract Analysis of States East of Rocky Mountains

NEW YORK.—Evidence of a recession from the high volume of construction indicated earlier in the year was reported today by F. W. Dodge Corporation on the basis of a study of data compiled from project contracts awarded in the 37 states east of the Rocky Mountains.

The severity of the drop is shown in a compilation of contract volume, which was maintained at a rate of $24 million per business day in the first three weeks of April compared to $28 million in March and $33 million in April of last year. The decline is general, affecting nonresidential building, residential building, and heavy engineering construction.

An analysis of the trend, prepared by Thomas S. Holden, president of the Dodge corporation, states:

"Despite the favorable record for the first quarter as a whole, the month of March actually marked the beginning of the downward movement. This readjustment was accelerated in April.

"In view of the known demand, the only important reason to which the recession can be ascribed is the rapid rise in costs in the last six months. Early hopes that price and wage increases would be moderate after removal of controls were not realized. There was evidence of stabilization of some prices in the first quarter, but progress was too slow to stimulate a second-quarter upturn.

Increases Efficiency

"It is now obvious that the stabilization of costs essential to full construction industry recovery is being affected by the refusal of buyers. Buyers have assumed control of the construction market.

"Depth and duration of the current recession will depend on the speed with which price and cost adjustments are made. There has been a wide variation in the rises of various materials, some having been moderate, others fantastic when compared with prewar levels. Price adjustments in varying degree will have to be made by producers, wholesalers and retail dealers.

"Hourly wages in the building trades are not likely to be reduced. In fact, increases are being asked by a number of trades in scattered areas. The strongest hope for reduction of site labor costs lies in improved efficiency. Production per man-hour has been reported as 10 to 50 per cent below normal in recent months. With stabilized material markets and normal or near normal labor efficiency, contractors should be enabled to make competitive lump sum bids.

Adjustment Brief

"While the present recession has the characteristics of a post-war price stabilization movement, it is believed by many economists for important reasons that necessary adjustments will be made this time without the extreme deflation of 1920 and 1921.

"Duration of the recession is varously estimated. If present maladjustments in construction costs can be corrected in six months, which is conceivable, the industry should come thru without serious trouble. Construction demand and available investment funds are factors favoring a short, rather than a prolonged, adjustment period.

Dollar Volume Less

"The big second-quarter bulge in contract volume last year is not likely to be repeated this year. There is some question whether the total dollar volume of work started in the current year will exceed that of 1946 appreciably."

SAN FRANCISCO REALTY BOARD IS REPRESENTED

CHICAGO. — Committees and governing councils of the National Association of Real Estate Boards and of seven of its affiliate organizations will meet here May 13 through 17. The National Committee of Land Developers and the National Committee on Mortgage Brokerage, two newly organized groups, will have sessions also.

San Francisco realtors who will attend the meetings are Willard Johnson, vice president of the San Francisco chapter, and also vice president of the Brokers' Institute; and David D. Bohannon, regional NAREB vice president. John Breedon will attend a meeting of the secretarys' council.

Mechanical Engineers To Discuss Newest In Aviation, 26-29th

LOS ANGELES.—Featuring the latest scientific advances in aircraft engineering, meetings of the American Society of Mechanical Engineers will be held on the campus of the University of California here May 26 to 29, it was announced today by Dean L. M. Boelter of the college of engineering.

Principal speakers include Dr. Lee A. DuBridge, president of the California Institute of Technology, who will speak on "Increased Safety in Aviation Through Radar"; Dr. H. J. Stewart, California Institute of Technology, who will discuss "The Present Status of the Guided Missile", and E. H. Heinemann, chief engineer, Douglas Aircraft Company, who will talk on "Development of Aircraft for Supersonic Flight".

Following the principal speakers, section meetings will be held to discuss such subjects as applied mechanics and metallurgy, heat transfer, instruments, management, rubber and plastics, fuels and lubricants, production and tooling, steam power and missiles.

General meetings will be held in Chemistry Building 10 while section meetings will be held in the Chemistry and Physics-Biology Buildings.

(1) lump sum, construct complete auxiliary service buildings, units 3, 4 and 5, including miscellaneous iron and steel, electrical work thereto, the electrical work, piping and drainage, to remove all concrete work interfering with the new construction and to perform all other related work; (alt. 1) same as (1), except delete sugar solubility test;
(2) price per cu. yd. structural concrete for mat;
(alt. 2) same as (2), except delete sugar solubility test;
(3) price per cu. yds. other structural concrete;
(alt. 3) same as (3), except delete sugar solubility test;
(4) price per lb. reinforcing steel in place;
(5) price per cu. yd. excavation by hand;
(6) price per cu. yd. excavation by machine;
(7) price per cu. yd. backfill outside building;
(8) price per lb. miscellaneous iron and steel;
(9) price per sq. yd. waterproofing;
(10) price per sq. yd. waterproofing membrane, 3-ply;
(11) price each, galvanized iron pipe sleeves or formed openings in walls or floors of sizes and including 10-in. round;
(12) price each, galvanized iron pipe sleeves or formed openings in walls or floors of sizes over 10-in. round;
(13) price per lb. anchor bolts, ¾-in. to 1-in. diameter, inclusive;
(14) price per lb. anchor bolts over 1-in. diameter;
(15) price per lin. ft. ¾-in. conduit, installed;
(16) price per lin. ft. 1-in. conduit, installed;
(17) price each, 4-in. steel outlet box with cover, installed;
(18) price each, 4 11/16-in. steel outlet box with cover, installed;
(19) price per lin. ft. 1½-in. conduit, installed;
(20) price per lin. ft. 4-in. conduit, installed;
(21) price each, conduit nipples with couplings at each end, installed flush with concrete, ranging in size from ¾-in. to 2-in. and from 8-in. to 18-in. long;
(22) price each, conduit nipples with couplings at each end, installed flush with concrete, ranging in size from 2½-in. to 5-in. and from 8-in. to 18-in. long;
(23) price each, Truscon adjustable inserts for ¾-in. and 1¼-in. bolts;
(24) price per lb. sheet steel piling.

The total bids submitted were:
(A) Guy F. Atkinson Co. (Alt. 1), $383,000.
(B) Contracting Engineers Co. (Alt. 1), $444,000.
The unit bids were:

Three Low Bioders
Highway Cost, $662,872.77
ELKO COUNTY, Nev. From ¼ mile east of North Fork bridge to Deeth Route 1, Sections B, C and D2.
Owner—State of Nevada, Department of Highways, Heroes Memorial Bldg., Carson City, Nevada
State Highway Engr.—Robt. A. Allen, Carson City, Nevada.
Low Bidder—Silver State Constr. Co. S. Main St., Fallon, Nev., $662,-872.77.
Second and third low bids submitted May 6 were:
W. W. Clyde & Co., Springville, Utah, $663,057.81
Dodge Constr., Inc., Fallon, Nev., $666,666.66.

5/6/47 40
Contract Awarded
Highway Improvement Cost $85,226
TACNA - TYSON HIGHWAY, Ariz. From Tacna on U. S. Route 80, about 40 miles east of Yuma and extending about 6.66 miles northeasterly to Mohawk Valley School.
Owner—Arizona State Highway Commission, 17th Ave. and Jackson St., Phoenix, Ariz.
Plans by engineering department of owner.
Includes road-mixed bituminous surface, furnishing and placing selected material, etc.
Contractor—Bartel & Shearer Contracting Co., 1350 S. 7th St., Phoenix, Ariz.

5/7/47 • 40
Owner Taking Bids—Due May 12, 8 P. M. (Unit Quantities)
Street Improvement
ANTIOCH, Calif., Contra Costa Co. 10th St. between L and O Sts.
Owner — City of Antioch. M. V. Jones, city clerk, City Hall, Antioch, Calif.
Engineer—John S. Bates, 3134 Eton Ave., Berkeley, Calif.
Includes excavating, filling and grading, providing and placing to a depth of 12-in imported borrow as foundation material and crusher run base to a depth of 6-in. and surfacing a 24-ft. wide strip with armor coat surface, and the application of penetration oil treatment to the 7-ft. shoulders constructed as part of the work on either side of the paved street, and the grading and paving necessary to join together O St. with D St.
Work involves:
(1) 1129 cu. yds. street excav., placed in fill;
(2) 1421 cu. yds. street excav., dispose as directed;
(3) 1967 tons imported borrow foundation material;
(4) 1086 tons crusher run base;
(5) 2944 sq .yds. armor coat surfacing;
(6) 34 tons penetration oil treatment on shoulders.
Specifications obtainable from the office of the city clerk and city engineer; no deposit required.

5/9/47 40
Contract Awarded—Construction Will Start Soon
Street Improvement; Res. No. 3 Cost $2,294.20
VALLEJO, Calif., Solano Co. Stutz Alley from Sacramento St. to Marin St.
Owner — City of Vallejo, Melvin F. Brooks, city clerk, City Hall, Vallejo, Calif.
City Engineer—T. D. Kilkenny, City Hall, Vallejo, Calif.
Includes paving for width of 17 feet with one inch plain portland cement class A concrete pavement five inches thick.
Contractor—A. E. Lowell, Box 148, Vallejo, Calif.

5/6/47 40
Contract Awarded Cost $373,016.94
PEGNEY-ROCK SPRINGS HIGHWAY, Arizona.
Owner—Arizona State Highway Commission, 17th Ave. and Jackson St., Phoenix, Ariz.
Plans by engineering department of owner.
Includes removing existing timber bridge and constructing new concrete bridge on concrete piling.
Specifications obtainabe from the above office upon payment of $3.75.

41—GAS, WATER AND OIL PIPE LINES

5/6/47 41
Owner Taking Bids—Due May 28, 10 A. M.
Pipeline Tunnels and Structures; Spec. 1813
PROVO RIVER PROJECT, Utah. Salt Lake Aqueduct, Aqueduct Division.
Owner—U. S. Bureau of Reclamation, Provo, Utah.
Plans by owner.
Station 0 plus 30.5 to station 296 plus 49.1, station 1764 plus 967 to station 1875 plus 50, station 1907 plus 00 to station 1992 plus 10, and station 2012 plus 40 to station 2201+74.5, and Blowoff at Station 1743+90, and Wasteway at Station 1746+65.
(60) 165,500 cu. yds. benching, common, for pipeline construction;
(61) 47,600 cu. yds. benching, rock, for pipeline construction;
(62) 155,000 cu. yds. excavation, common, for pipe trench;
(63) 11,900 cu. yds. excavation, rock, for pipe trench;
(64) 8900 cu. yds. excavation, common, for structures;
(65) 1000 cu. yds. excavation, rock, for structures;
(66) 6300 cu. yds. compacted embankment;
(67) 20,000 sts. cu. yds. overhaul;
(68) 119,800 cu. yds. backfill;
(69) compacting 14,000 cu. yds. backfill;
(70) 175 sq. yds. dry-rock paving;
(71) 665 cu. yds. riprap;
(72) 900 cu. yds. concrete in structures;
(73) 650 cu. yds. concrete in foundation for concrete pipe;
for pipe trench;
(7) 12,000 cu. yds. excavation, common, for structures;
(9) 7200 cu. yds. excavation, all classes, in tunnels;
(10) 500 cu. yds. compacted embankments;
(11) 40,000 sta. cu. yds. overhaul;
(12) 108,700 cu. yds. backfill;
(13) furnishing and placing 3 cu. yds. of pea-gravel backfill;
(14) compacting 19,400 cu. yds. backfill;
(15) 100 sq. yds. dry-rock paving;
(16) 500 cu. yds. riprap;
(17) removing and replacing riprap, lump sum;
(18) furnishing and installing 65,000 lbs. permanent steel tunnel supports;
(19) furnishing and erecting 28 M b.m. of permanent timbering in tunnels;
(20) furnishing and installing 10,000 lbs. of plate steel tunnel-liner plates;
(21) 30 cu. yds. washed gravel or spalls outside of plate steel tunnel-liner plates;
(22) constructing 2200 lin. ft. 6-in. diameter tunnel drains;
(23) laying 450 lin. ft. 6-in. diameter sewer pipe with cemnted joints;
(24) drilling 300 lin. ft. grout holes not more than 10 ft. deep;
(25) placing 100 lbs. grout pipe and connections;
(26) 400 cu. yds. pressure groutings;
(27) 1300 cu. yds. concrete in structures;
(28) 2000 cu. yds. concrete in tunnel lining;
(29) 1830 cu. yds. concrete in foundations for concrete pipe;
(30) furnishing and handling 24,840 bbls. cement;
(31) placing 250,000 lbs. reinforcement bars in structures;
(32) placing 150 sq. ft. elastic filler material in joints;
(33) placing 40 lin. ft. rubber water stops in joints;
(34) dampproofing 175 sq. yds. of walls;
(35) furnishing and placing 155 sq. ft. of insulation and roofing;
(36) furnishing and installing 200 lin. ft. embedded electrical conduit, 1¼-in. and less in diameter;
(37) furnishing and installing 250 lin. ft. buried conduit, 2-in. in diameter;
(38) furnishing and installing 25 lbs. conduit boxes, junction boxes and cabinets;
(39) furnishing and installing 25 lbs. of embedded ground wires;
(40) furnishing and placing 3300 lbs. of metal thimbles in precast concrete pipe;
(41) laying 100 lin. ft. 24-in. diameter corrugated metal pipe;
(42) laying 100 lin. ft. 30-in. diameter corrugated metal pipe;
(43) installing 2300 lbs. frame and guides for fixed-wheel gate;
(44) installing 2200 lbs. fixed-wheel gate;
(45) installing 1200 lbs. fixed-wheel gate hoist;
(46) installing 7500 lbs. trashrack metal work;
(47) installing 8000 lbs. of standard metal pipes;
(48) furnishin gand installing control-house metal work, lump sum;
(49) installing 40,000 lbs. miscellaneous metal work;
(50) transporting and placing 110 pipe sections now in storage;
(51) manufacturing and laying 12,-560 lin. ft. of 60-in. diameter precast concrete pipe, symbol A-50;
(52) manufacturing and laying 1460 lin. ft. 60-in. diameter precast concrete pipe, symbol A-75;
(53) manufacturing and laying 40 lin. ft. 60-in. diameter precast concrete pipe, symbol A-100;
(54) manufacturing and laying 4880 lin. ft. 60-in. diameter precast concrete pipe, symbol B-50;
(55) manufacturing and laying 560 lin. ft. 60-in. diameter precast concrete piep, symbol B-75;
(56) manufacturing and laying 40 lin. ft. 60-in. diameter precast concrete pipe, symbol B-100;
(57) manufacturing and laying 4300 lin. ft. 60-in. diameter precast concrete pipe, symbols C-50 and D-50;
(58) manufacturing and laying 640 lin. ft. 60-in. diameter precast concrete pipe, symbols C-75 and D-75;
(59) manufacturing and laying 40 lin. ft. 60-in. diameter precast concrete pipe, symbols C-100 and D-100.
Schedule No. 2
Station 1764+66.7 to Station 1875+50, Station 1907+00 to Station 1992+10, and Station 2012+40 to Station 2201+74.5, and Blowoff at Station 1743+90, and Wasteway at Station 1746+65.
(60) 165,500 cu. yds. benching, common, for pipeline construction;
(61) 47,600 cu. yds. benching, rock, for pipeline construction;
(62) 155,000 cu. yds. excavation, common, for pipe trench;
(63) 11,900 cu. yds. excavation, rock, for pipe trench;
(64) 8900 cu. yds. excavation, common, for structures;
(65) 1000 cu. yds. excavation, rock, for structures;
(66) 6300 cu. yds. compacted embankment;
(67) 20,000 sts. cu. yds. overhaul;
(68) 119,800 cu. yds. backfill;
(69) compacting 14,000 cu. yds. backfill;
(70) 175 sq. yds. dry-rock paving;
(71) 665 cu. yds. riprap;
(72) 900 cu. yds. concrete in structures;
(73) 650 cu. yds. concrete in foundation for concrete pipe;
(74) furnishing and handling 30,950 bbls. cement;
(75) placing 121,000 lbs. reinforcement bars in structures;
(76) placing 25 sq. ft. elastic filler material in joints;
(77) placing 415 lin. ft. rubber water stops in joints;
(78) dampproofing 70 sq. yds. of walls;
(79) removing 60 cu. yds. existing concrete paving in Sam Park Reservoir;
(80) furnishing and laying 1700 lin. ft. 4-in. diameter concrete pipe;
(81) furnishing and laying 90 lin. ft. 24-in. diameter concrete pipe;
(82) furnishing and laying 740 lin. ft. 42-in. diameter concrete pipe;
(83) furnishing and placing 8500 lbs. metal thimbles in precast concrete pipe;
(84) installing 1610 lbs. flap gate;
(85) installing 66,600 lbs. standard metal pipes;
(86) installing 34,100 lbs. miscellaneous metal work;
(87) manufacturing and laying 5680 lin. ft. 60-in. diameter precast concrete pipe, symbol A-50;
(88) manufacturing and laying 2920 lin. ft. 60-in. diameter precast concrete pipe, symbol A-75;
(89) manufacturing and laying 5540 lin. ft. 60-in. diameter precast concrete pipe, symbol A-100;
(90) manufacturing and laying 1680 lin. ft. 60-in. diameter precast concrete pipe, symbol A-125;
(91) manufacturing and laying 1900 lin. ft. 60-in. diameter precast concrete pipe, symbol A-150;
(92) manufacturing and laying 80 lin. ft. 60-in. diameter precast concrete pipe, symbol A-165;
(93) manufacturing and laying 8560 lin. ft. 60-in. diameter precast concrete pipe, symbol B-50;
(94) manufacturing and laying 2160 lin. ft. 60-in. diameter precast concrete pipe, symbol B-75;
(95) manufacturing and laying 1720 lin. ft. 60-in. diameter precast concrete pipe, symbol B-100;
(96) manufacturing and laying 1430 lin. ft. 60-in. diameter precast concrete pipe, symbol B-125;
(97) manufacturing and laying 2900 lin. ft. 60-in. diameter precast concrete pipe, symbol B-150;
(98) manufacturing and laying 60 lin. ft. 60-in. diameter precast concrete pipe, symbol B-165;
(99) manufacturing and laying 2200 lin. ft. 60-in. diameter precast concrete pipe, symbols C-50 and D-50;
(100) manufacturing and laying 300 lin. ft. 60-in. diameter precast concrete pipe, symbols C-75 and D-75;
(101) manufacturing and laying 160 lin. ft. 60-in. diameter precast concrete pipe, symbols C-100 and D-100;
(102) manufacturing and laying 100 lin. ft. 60-in. diameter precast concrete pipe, symbols C-125 and D-125;
(103) manufacturing and laying 160 lin. ft. 60-in. diameter precast concrete pipe, symbols C-150 and D-150;
(104) manufacturing and laying 40 lin. ft. 60-in. diameter precast concrete pipe, symbols C-165 and D-165.
Specifications obtainable from the above office; no charge to prospective bidders; to others, $3.50, not returnable.

5/9/47 • 42
Three Low Bidders
Water Distribution System Cost $46,960
SHASTA COUNTY, Calif. About 8 to 10 miles north of Redding (from Shasta Dam to Toyon).
Owner—Shasta Dam Area Public Utility District (Box 1000, Central Valley, Calif.), Bruno Kloss, clerk; J. C. Tibbitts, chairman of board of directors; Stanley Silcock, engineer; Daniel C. Carlton, district attorney (Carter Building, Redding, Calif.), c/o Jonathan C. Tibbitts, justice of the peace, Justice Court, Central Valley, Calif.
Plans by engineering department of owner.
Low Bidder—Coast Wide Pipe Line Co., 2211 E. Firestone Blvd., Los Angeles, Calif., $46,960.
Second and third low bids submitted May 7 were:
D. E. Stutsman, Stockton, Calif., $57,000.
Wixson & Crowe, Redding, Calif., $57,838.

5/5/47 41
Contract Awarded—Water Supply Facilities (Reconstruct) Serial 47-30 Cost, $164,361.70
Cost $164,361.70
MUROC, Calif., Kern County. Muroc Air Base.
Owner—Los Angeles District Corps of Engineers, War Department, 751 S. Figueroa St., Los Angeles, Calif.
Plans by owner.
Contractor—Edw. R. Sipie Co., 2545 San Fernando Road, Los Angeles.
Total bids Apr. 25 were:
Edward R Sipie Co., $104,367.70, Alt. total, using Item (40) $100,472.70; Alt. total using Items (40), (41) and (43), $88,818.70; Alt total using Items (42 and 44), $103,500.70; Alt. total, using Items (40), (42) and (44), $99,-518.70.
A B C Construction Co., $106,137.75; alternate total, using Item (40) $100,221.75.
Pacific Pipeline & Engineers, Ltd. $82,179.50 (omitting Item 25); alternate total, using Item (44) in lieu of Item (25), $110,304.50.
N. P. Valkenburgh Co., $114,625.50; alternate total, using Item (40) $114-625.50; alternate total, using Items (40), (41) and (43) $111,406; alternate total, using Items (42) and (44) $112,803; alternate total, using Items (40), (42) and (44); $112,903.
Edward Green, $127,449.59; no alternate totals.
J. F. Cummins, $137,799; no alternate totals.
OFFCO Construction Co., $161,-606.85; alternate total, using Item (40), $154,396.85; alternate total, using Items (40), (41) and (43), $153,-906.85.
P & J Artukovich, $175,920; no alternate totals.

5/5/47 41
Contract Awarded
Water Distribution System
SHARP PARK, Calif., San Mateo County.
Owner—North Coast County Water District, Patricia B. DeNio

stalling and testing complete at the department's Harbor steam plant all of the material and equipment required by these specifications, for a total lump sum price, inclusive of state sales tax and use tax on materials:
(Alt 1a) cost of excav. and backfilling;
(Alt. 1b) cost of furnishing, delivering and driving all piling;
(Alt. 1c) cost of all concrete work to be done by the contractor;
(Alt. 1d) cost of furnishing, delivering, installing and testing complete the 42-in. and 24-in. pipe, valves and fittings.
The total bids submitted May 5 were:
M. F. Kemper Construction Co., (2) $1090, (Alt. 1) $872,850, (Alt. 1a) $34,853, (Alt. 1b) $10,586, (Alt. 1c) $18623, (Alt. 1d) $508,476.
Humiston - Rosendahl, Inc., (2) $872, (Alt. 1) $578,130, (Alt. 1a) $36,-176, (Alt. 1b) $7569, (Alt. 1c) $15,-385, (Alt. 1d) $519,000.

5/8/47 41
Low and Only Bidders
Pipeline Cost $591,676
TACOMA, Wash.
Owner—City of Tacoma, Public Works Commissioners, Tacoma, Wash.
Plans by engineering department of owner.
Furnish and install 23,143 ft. 58-in. lock joint steel cylinder concrete pipe and furnish 23,143 ft. 58 5/16-in. steel pipe.
Low Bidder—American Pipe & Construction Co., Tacoma, Wash., $591,-676.
Western Pipe & Steel Co., at $638,-499, submitted only other bid.

Portland Cement
Low and Only Bidder
COLORADO-BIG THOMPSON PROJECT, Colorado.—Colorado Portland Cement Co., Denver, Colo., at (1A) $2.35, (1B) $2.55, (1C) $2.72, ship all items five days, 376 lbs. per bbl., f.o.b. Boettcher, Colo., 10c per bbl. 20 days, if desired in paper sacks increase 25c per bbl., price clause of 15c per bbl., submitted only bid May 2 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Inv. No. F-46-410-A-1 for 40,000 bbls. of portland cement in bulk, f.o.b. (a) cars at shipping point, (b) f.o.b. trucks at shipping point, (c) f.o.b. cars at Loveland, Colo., and (d) in a ground-level unloading hopper at east porta lof Ramahorn tunnel and/or south portal of Prospect tunnel, approximately three miles south of Estes Park, Colo.

43—MACHINERY AND EQUIPMENT

5/12/47 43
Tank Truck Rental
Low and Only Bidder
ALAMEDA & CONTRA COSTA COS., Calif.—Hayward Building Material Co., Atherton & Jackson, Hayward, Calif., at 54.50 per hr., for operation and standby time, submitted only bid May 8 to State Division of Highways, 2001 Van Ness Ave., San Francisco, Calif., for rental of one fully insulated bituminous tank truck of not less than 2000-gallon capacity for approximately 300 hours' use in Alameda and Contra Costa Counties.

5/12/47 43
Rock Bunker Rental
Low and Only Bidders
SAN LUIS OBISPO and MONTEREY COS., Calif.—D. Gerald Bing, 2440 Marshall Way, Sacramento 17, Calif., at $6 per hr., submitted low bid May 6 to the State Division of Highways. L. H. Gibson, district engineer, 50 Higuera St., San Luis Obispo, Calif., for rental of one portable rock bunker with shaker screen attachment for approximately one month's use in San Luis Obispo and Monterey Counties.
McIntosh & Glass, Chico, Calif., at $12.50 per hr., submitted only other bid.

5/12/47 43
Motor-Driven Fans
Bid Opening Extended from May 8 to May 22, 2 P. M.
CLUMBIA BASIN PROJECT, Wash.—Until May 22 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Customhouse, Denver, Colo., under Spec. 1778 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Odair, Washington, none (9) centrifugal type, motor-driven fans, each with a capacity of not less than 12.-500 cubic feet per minute; one (1) centrifugal-type, motor driven fan with a capacity of not less than 10,-000 cubic feet per minute; one (1) centrifugal-type motor-driven fan with a capacity of not less than 8,-600 cubic feet per minute; one (1) centrifugal-type, motor-driven fan with a capacity of not less than 7,-500 cubic feet per minute; one (1) centrifugal type, motor-driven fan with a capacity of not less than 2,-000 cubic feet per minute; one (1) centrifugal - type motor - driven fan with a capacity of not less than 1,500 cubic feet per minute; four (4) propeller-type, motor-driven fans each with an operated shutter and each with a capacity of not less than 20,-000 cubic feet per minute, automatic fire louver and hand-operated dampers; for Grand Coulee Right Power Plant, Columbia Basin Project, Wasnington. The apparatus will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others $0.75, not returnable.

5/9/47 43
Transformers
Three Low Bidders
DAVIS DAM PROJECT, Arizona.-Nevada.—The following submitted low bids May 6 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1754 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Hannamic, Calif., five (5) 45,000/56,250/60,000-kva., 13,600- to 132,800/230,000 Y-volt, 3 - phase, 60 - cycle, oil - immersed, self-cooled/forced air-cooled, outdoor type power transformers for Davis power plant, Davis Dam Project, Arizona-Nevada. The apparatus will be installed by the government:
General Electric Co., Denver, Colo., item 1, $1,081,900; ship first transformer 990 days; second, 1020 days; third, 1050 days; fourth, 1080 days; fifth, 1110 days; ship oil in 10 days; 1,250,000 lbs. from Pittsfield, Mass.; 710,000 lbs. from Richmond, Calif.; f.o.b. destination; item 2, engineer $40, mechanic $35; terms net; equalization is offered; firm price.
Allis-Chalmers Manufacturing Co, Denver, Colo., item 1, $1,108,800; ship first transformer 1000 days; second, 1030 days; third, 1060 days; fourth, 1090 days; fifth, 1120 days; ship oil in 10 days; 1,330,000 lbs. from West Allis, Wis.; 965,000 lbs. Richmond, Calif.; f.o.b. destination; item 2, engineer $50, mechanic $36; terms net; equalization is offered; firm price.
Westinghouse Electric Corj, East Pittsburgh, Pa., item 1, $1,114,266; ship first transformer 964 days; second, 995 days; third, 1006 days; fourth, 1034 days; fifth, 1065 days; ship oil 30 days; 1,400,000 lbs. from Sharon, Pa.; 500,000 lbs. from Richmond, Calif.; f.o.b. destination; item 2, engineer $40, mechanic $35; terms net; equalization is offered; firm price.

Fabricated Steel Taper Sections
Contract Awarded
OAKLAND, Calif., Alameda Co.—Steel Tank & Pipe Co., 1100 4th St., Berkeley, Calif., at $6480 (Schedule II), awarded contract by the East Bay Municipal Utility District, Room 406, 512 16th St., Oakland, Calif., under Spec. 74 for second Mokelumne Aqueduct wasteway valves, automatic controls and related aqueduct pipe specials.
Second Mokelumne Aqueduct wasteway (Sch. I) valves, automatic controls and related aqueduct pipe specials and (Sch. II) furnishing fabricated steel taper sections.
Bids submitted on Schedule II were rejected and the materials will be purchased in the open market.

5/9/47 43
Contract Awarded
Truck Dump Bodies
OAKLAND, Calif., Alameda Co.—F.A.B. Manufacturing Co., 1249 67th St., Oakland, Calif., at $21,32.40, was awarded contract by the East Bay Municipal Utility District, Room 312, 512 16th St., Oakland, Calif., under Spec. 1830 for three truck dump bodies.

5/9/47 43
Delivery of Voting Machines
Bids Wanted
SAN FRANCISCO, Calif.—Until May 26, 3 P. M., bids will be received by Purchaser of Supplies M. H. Gerry, 270 City Hall, San Francisco, Calif., under bid No. 5610 for delivery and return of voting machines for the fiscal year 1947-1948.
Specifications obtainable from the above office.

5/9/47 43
Fire-Fighting Equipment
Bond Issue in Amount of $13,000 Approved May 8
ORLAND, Calif., Glenn Co.—City of Orland on May 6 approved a proposal to issue bonds in amount of $13,000, to finance purchase of new fire-fighting equipment.

5/8/47 43
Science Equipment
Bids Wanted
SAN FRANCISCO, Calif.—Until May 23, 3 P. M., bids will be received by Purchaser of Supplies M. H. Gerry, 270 City Hall, San Francisco, Calif., under bid No. 3937 for furnishing an ddelivering science supplies and equipment for School Department.
Specifications obtainable from the above office.

44— SUB-CONTRACT INFORMATION

5/12/47 44
Exterior Painting
Contract Awarded
SAN FRANCISCO, Calif.—David Russ, 1258 Palencia Street, San Francisco, Calif., at $2,424, awarded contract by the City and County of San Francisco, Department of Public Works, Room 282 City Hall, San Francisco, Calif., for exterior painting of Abraham Lincoln High School.

5/12/47 44
New Roof—Contract Awarded
SAN FRANCISCO, Calif.—Regal Roofing Company, 930 Innes Ave., San Francisco, Calif., at $7,821 awarded contract by the City and County of San Francisco, Calif., Department of Public Works, Room 282 City Hall, San Francisco, Calif., for new composition shingle roof on shop building, Polytechnic High School, Frederick Street and Arguello Blvd., San Francisco, Calif.

5/12/47 44
Painting—Bids Wanted
FRESNO, California Co.—Until June 4, 2 P. M., bids will be received by the Federal Works Agency, Public Bldgs., Admin., office of the District Engr. the U. S. Appraiser's Bldg., San Francisco, Calif., for interior and exterior painting at U. S. Post Office and Courthouse, Fresno, Calif.
Specifications obtainable from the above office.

5/12/47 44
Boiler & Oil Burner Repairs—Low and Only Bidder
CHICO, Calif., Butte County — Service Heat & Power Company, 636 21st St., Oakland, at $257, submitted the low and only bid May 7 to the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 836 U .S. Appraiser's Building, San Francisco, California, for relining boiler fire box and overhauling oil burner at the U. S. Post Office Building, Chico, California.

5/9/47 • 44
Linoleum—Low and Only Bidders
OAKLAND, Calif., Alameda Co.—The following bids were submitted May 8 to the Public Works Department, 12th Naval District, Room A-109 Federal Office Bldg., San Francisco, Calif., under Spec. 18466 for furnishing and installing linoleum in 22 buildings at the U. S. Naval Hospital, Oakland, Calif.:
The Brookman Co., 2801 3rd St., San Francisco, (1) $27,477; (2) $12,-577; (3) $39,929.
Lorentzen Co., San Francisco, (1) no bid; (2) $15,604; (3) $28,898.
Malott & Peterson, San Francisco, (1) no bid; (2) no bid; (3) $30,548.

5/9/47 • 44
Painting—Low and Only Bidders
OAKLAND, Calif., Alameda Co.—M. Williams & Sons, 1620 Webster St., Oakland, Calif., at $15,000, submitted low bid May 8 to the 12th Naval District, Public Works Department, Room A-109 Federal Office Bldg., Civic Center, San Francisco, Calif., for painting of the outside surface of 32 buildings at the U. S. Naval Air Station, Oakland, Calif., under Spec. No. 18271. The work includes painting outside surface of buildings 1, 2, 3, 10, 12, 13, 14, 17, 21, 22, 30 and 33, including all leantos and all exposed surfaces of porches, and the removal of camouflage paint from walls of glazed hollow tile building No. 2.
Complete bids were:
M. Williams & Sons, Oakland, $15,-060; (1) $414; (2) $980; (3) $602; (4) $2635.
Allied Painters & Decorators, Oakland, $15,149; (1) $466; (2) $1781; (3) $366; (4) $2269.
Giampolini & Co., San Francisco, $16,100; (1) $636; (2) $1615; (3) $900; (4) $3440.
Patterson Bros., Oakland, $17,850; (1) $948; (2) $700; (3) $475; (4) $3069.
R. W. Reade & Co., Oakland, $18,-992; (1) $556; (2) $1808; (3) $1101; (4) $3014.
D. E. Burgess Co., San Francisco, $19,900; (1) $1438; (2) $1156; (3) $627; (4) $2607.
Fred T. Judd Co., Berkeley, $21,362; (1) $650; (2) $1460; (3) $1050; (4) $1850.
Raphael Co, San Francisco, $21,810; (1) $1338; (2) $711; (3) $1244; (4) $3423.
A. E. Gordon Painting Co., San Francisco, $23,738; (1) $750; (2) $1640; (3) $500; (4) $3591.
Pacific Painting & Decorating Co., Oakland, $27,888: (1) $1600; (2) $1200; (3) $300; (4) $3800.

5/9/47 • 44
Hot Water Tanks
Low and Only Bidder
SAN FRANCISCO, Calif. — C. R. Reichel Engineering Co., 718 Natoma St., San Francisco, Calif., at $749.50 submitted only bid May 7 to the City and County of San Francisco, Dept. of Public Works, Rm. 282, City Hall, San Francisco, Calif., for three hot water tanks for Polytechnic High School.

5/9/47 • 44
Resurface Stair Treads
Low and Only Bidder
SAN FRANCISCO, Calif.—Northern Chemical Products Corp., 118 New Montgomery St., San Francisco, Calif., at $4521 submitted only bid May 7 to the City and County of San Francisco, Department of Public Works, Room 282, City Hall, San Francisco, Calif., for resurfacing stair treads at Polytechnic High School.

5/9/47 • 44
Exterior Painting
Bids Wanted
SAN FRANCISCO, Calif.—Until May 21, 2:30 P. M., bids will be received by the City and County of San Francisco, Department of Public Works, Room 282 City Hall, San Francisco, Calif., for exterior painting of ward buildings B, C, D and G, Laguna Honda Home.
Specifications obtainable from the office of City Architect Dodge A. Riedy, Room 265 City Hall, San Francisco, Calif., upon deposit of $5, refundable.

HIDDEN CHARM

Electrical wiring, buried in the walls and ceilings, largely determines the degree to which living in a house can be convenient, comfortable, efficient . . . and charming.

Wiring of ample size, a sufficient number of circuits and plenty of conveniently-placed outlets and switches cost so little extra when the house is being built, yet mean so much for easier housekeeping and more gracious living. Adequate wiring, too, protects the investment, gives a home a higher resale value . . . and heightens the satisfaction of your clients.

In the new homes you design, check the electrical wiring specifications with special care. Be sure that provision is made for wiring that will be adequate for present electrical needs and for all those anticipated in the years ahead.

Findings of President's Conference on Fire Prevention Expected to Have Important Effect

WASHINGTON.—No immediate value to the construction industry can result from the President's conference on fire prevention held in Washington this week, but over the long range, the report of the committee on building construction, operation and protection is expected to bring about important engineering changes.

Over a thousand delegates from all parts of the country can convene, discuss and adopt reports but until their actions are translated into revised building codes, changed methods of construction and the new adaptation of fireproofing from the drawing board stage to the finished structure, the efforts of these men cannot be considered concrete.

Includes All Factories

Builders generally are agreed, however, that the Washington meeting marks another milestone in planning and design. It points the way toward doing something about greater fire protection in the building, operation and maintenance of large structures.

The next step will be reference of the Washington actions to state and local groups with the fervent hope that they will take the lead in changing codes. The end result will be a tremendous reduction in fire loss.

The committee on building construction, operation and protection turned in a 50-page report on its findings. This represented the rough study of material submitted by sub-committees on safety, planning and design, fire protection equipment and operations and maintenance.

The report concludes this on its construction phase:

"The probability of a fire assuming conflagration proportions is measured by the amount of fuel available for it to feed upon, and the increases as structures become crowded together in certain districts.

"The fire limits should include all closely-built mercantile and adjoining manufacturing districts and surrounding blocks on all sides which constitute a particular fire exposure to the district, or within which new construction of a mercantile or manufacturing character is developing. Buildings in fire districts should be restricted to those types of construction that afford an appropriate degree of protection against the spread of fire.

"As a further precaution against conflagration, buildings in the fire district, unless adequately separated, should be required to have for the exterior walls of a definite fire resistance rating. Provisions should also be made for suitable protection of openings in buildings within the fire district to prevent the spread of fire from one building to another."

May Codes Obsolete

The committee's research effort has focused sharply the need for new building code standards on a wide scale.

It points to files from the bureau of standards to illustrate a lack of alertness in keeping municipal building codes abreast of technical progress in the science of building construction.

These figures cover 3,822 municipalities surveyed in 1945:

156 had codes dated from 1942 to 1945.

397 had codes dated from 1937 to 1941.

228 had codes dated from 1932 to 1936.

494 had codes dated from 1927 to 1931.

612 had codes over 20 years old, and 33 had codes with no date at all.

Surprisingly enough, it was discovered that 1,942 municipalities had no building stattues whatsoever.

No figures are available on current revisions but the committee assumes that "several hundreds" of these cities are revising their codes or planning the inauguration of codes, thus improving the situation to some extent.

"Much good work could be done by local organizations and the responsible public officials if they would investigate their own codes critically and take steps to improve them," the report commented. It approved a suggestion that officials be required at stated intervals to review the local codes and recommend needed changes to appropriate legislative authority.

The balance of the section on building codes reported to the conference follows:

"Communities have a way of growing. More comprehensive requirements invoked during the process of growth will serve to prevent at a later date, the existence of fire traps that may become the scenes of disasters such as have recently taken place.

Modernization of Codes

"Material is not lacking for use in preparing and revising municipal building codes. Considerable attention has been given to the development and improved requirements in such organizations as the National Board of Fire Underwriters, The Pacific Coast Building Officials Conference, the Building Officials Conference of America, the Southern Building Code Congress, the American Standards Association, the National Bureau of Standards, and other bodies. The problem is one of selection rather than improvisation. A further constructive step would be the adjustment of remaining differences among them so that so far as is practicable technical requirements would be the same. This would tend to prevent confusion in the public mind, would facilitate the free flow of building materials in commerce, and would provide better safety conditions throughout the country.

Uniformity

The difficulty of persuading more than two thousand municipalities to adopt reasonably uniform requirements is admitted, even tho the various model recommendations mentioned above should be brought into approximate agreement. At present, municipal codes vary widely, not only in technical requirements, but also in size, arrangement, typography, and other features, with the result that extensive study is necessary to determine whether their requirements are adequate or not. While complete uniformity is not to be expected in view of varying local conditions, the advantages to be gained point to the need for exploring some method by which reasonable uniformity could be achieved.

Enforcement

"There is a rather general belief that the mere passing of new laws will be effective in reducing fire losses. Disappointment is likely to follow if adequate provision is not made for proper enforcement. Law depends on its maintenance for its effectiveness, and administration depends on the work of the chief administrator and the adequacy of the administrative machinery supplied him.

"To mention but one branch of administration, the building departments of many of our municipalities are decidedly deficient in those things which are necessary to good enforcement of laws. It is a mistake to regard the office of building official as of minor importance. Considering the features of health and safety involved, the complexity of designs submitted

State Surplus Plan Gets Underway This Wednesday Morning

The initial sale of surplus buildings and equipment under the state's war surplus housing program will be held at Camps Shoemaker and Parks on Highway 50 near Pleasanton, in Alameda County, starting at 8 a. m., Wednesday, May 14.

The sale, to be conducted at the site by local allocation division of the State Department of Finance, will include 226 buildings of various sizes which were purchased from the navy. The purchase was carried out with a portion of the $1 million revolving fund appropriated by the legislature to assist veterans in obtaining housing. Only veterans who have been certified as eligible by the State Department of Veterans Affairs will be permitted to participate in the sale.

Most of the buildings to be sold are one-story barracks, size 24 by 100 and 20 by 48, and office buildings of approximately the same size. There are also a number of structures of various other sizes. A limited quantity of plumbing fixtures and other equipment will be sold separately at the sale.

A building of sufficient size to provide most of the lumber for the average 5 or 6 room house can be purchased for approximately $550.

Sales will be for cash, and the veteran must make his own arrangements for removing the buildings from the site. It is suggested that two or more veterans might well team up to buy some of the larger buildings and cooperate in their removal.

A veteran not previously certified who desires to apply for eligibility should contact his nearest county service officer or veterans service center, taking with him a photographic or certified copy of his discharge or other release from the service.

A certified copy of the application, which is mailed to the veteran by the Department of Veterans Affairs, will be required for admission to the sale. Completion of the certification procedure, from the time the application is filed until the certification is received by an eligible applicant, requires approximately four or five days.

The Department of Finance will have representatives at the site from 8 a. m. to 4:30 p. m. seven days a week, including Saturdays, Sundays and holidays.

Fresno VA Hospital Bids Due June 26th

Initial construction of a proposed Fresno hospital which will cost $15 million over a 15-year period, went out to bids Monday. The veterans' administration proposal carries twenty items, with twelve alternates, mostly relating to types of pipe to be used for several purposes.

The primary development of the steel and concrete general hospital will provide 250 beds, and may be expanded to accommodate 1500 patients. The building will be seven stories, and includes a basement and sub-basement.

It will provide surgical and operating suites, laboratory, service room, dental offices, x-ray department, chapel, physical therapy room, dining room, out-patients department, pharmacy, administrative and clerical departments, auditorium and theater, kitchen, repair shops, laundry, morgue and central supply units, four elevators and a dumbwaiter system.

Full size drawings and specifications were made available on May 12. Half sizes will be available May 19.

CAA Budget Slash Will Hit Large Cities Hardest; About Half Class IV Fields Out

WASHINGTON.—Just about the same time that Commerce Secretary Harriman issued the bad news with regard to curtailment of the airport construction program if congress insists on cutting the appropriations budget, the civil aeronautics administration shot the opening gun in the construction phase of its seven-year airport program.

T. P. Wright, CAA administrator, signed the first project approval under the Federal Airport Act. This action permits Twin Falls, Idaho, to begin work immediately on a new class III airport, said to be badly needed for providing air transport service to the rich irrigated area of southern Idaho. United Airlines transcontinental route, Empire Air feeder lines and non-scheduled cargo and passenger operators will be able to serve this area when the work is completed.

The Federal Airport Act of 1946 authorizes federal expenditure of $500 million for the construction of new airports and modernization of existing fields. This sum, congress provided last year, is to be matched in nearly equal parts by sponsors of the projects in respective communities.

To date, congress has appropriated $45 million of the above amount. This has permitted fiscal allocations for 829 airports of which Twin Falls is the first to reach the construction stage.

The budget for fiscal 1947-'48, of which the federal share is $284,000. Sponsor's share is $283,-221, raised by local bond issue and airport tax levy.

The money will go for land acquisition, drainage, seeding, paving of taxiways, aprons, parking areas, access roads and construction of paved runways 4,900 and 3,200 feet long. Ultimate plans, CAA said, call for extending the runways to 6,500 and 4,000 feet, lighting the field, and erecting an administration building.

The "paper" procedure will interest contractors in view of the scores of similar projects to be undertaken.

The first step after submission of the application by the sponsor was the project approval by the government hero in Washington. After Administrator Wright signed the approval this week, and R. D. Bedinger, administrator of the CAA's seventh region, signed the grant offer, it becomes a formal contract between the federal government and the sponsor.

With that action, Twin Falls can proceed immediately to award contracts on bids already opened, and start construction work at the site. As soon as the job stands 20 per cent completed, the federal government will make its first cash payment on the federal share of costs.

"Twin Falls was an early bird in the airport program," CAA officials said. "Most of the sponsors waited for publication of the 1947 Airport Plan on January 11, 1947, before beginning the necessary work of making surveys, preparing engineering drawings and raising funds. As a result, less than three percent of the projects are now in CAA hands for final approval.

"A checkup late in April showed that 64 per cent of the sponsors had not yet completed the surveys and engineering data, 26 per cent of the sponsors had yet to raise their share of the project costs, and eight per cent had not acquired the necessary land. However, most of the sponsors are now pushing the preliminary work as rapidly as possible, and CAA officials expect 42 per cent of the projects to be ready for approval by June 1, and 58 per cent by July 1.

"A presidential order issued in August, 1946, limiting cash withdrawals under the Federal Airport Act to $4 million will expire on June 30, 1947. The order will have no effect on the 1947 program, since cash payments are not made

(Continued on Page 8)

Oakland Airport Aid May Be Killed by Budget Reduction

WASHINGTON.—Secretary of Commerce Harriman estimated yesterday that the proposed 50 per cent reduction in the Commerce budget will eliminate one-half of the projects planned for construction of Class IV and larger airports in 1948.

"The reduction will have a detrimental effect on air service," he observed, "to numerous communities which have long awaited financial assistance in developing airport facilities necessary to accommodate airline operations."

The Secretary's office issued a lengthy list of airport projects which would have to be shelved under the curtailed budget in addition to those submitted to congress on May 1.

California stands to lose heavily in the curtailment of Commerce funds. Dropped would be Palmdale, Hawthorne, Visalia, Palm Springs, Porterville, Oxnard Ontario, Marysville, Concord, Little River, Bakersfield, Crescent City, Montague, Banning, Napa, Hayward, Bishop, Santa Rosa, Santa Monica, Oakland, and San Diego. Los Angeles would be reduced by $795,000.

The appropriation request for airport construction has been cut $32,500,000, or 50 per cent as the bill now stands in the house.

GROOVER AND I

MUSCLE MOVES IN

For sometime the word has been spoken around sandy bar counters and saloonerias that Chicago pirate was moving into San Francisco to take over and give professional standing to our amateur, hometown rackets.

☆ ☆ ☆

The chief of the gendarmes said this was only idle talk — and we were assured this fair city was clean—you couldn't find a gin rummy game played for box tops and bottle caps.

☆ ☆ ☆

The talk persists that Chicago muscle and its top bracketeers like Golden Gate climate.

☆ ☆ ☆

Just recently a resident called the cops to investigate an abandoned auto which the bent bull had been blithely passing on his diligent rounds for a couple of days and nights.

☆ ☆ ☆

In the luggage compartment of the auto was found a body, identified as Nick de John, a Mister Big of Chicago rackets. Nick was considerably dead, owing to a guitar string very firmly yanked around his neck in good Cook County style.

☆ ☆ ☆

Despite anything the gendarmes may say about San Francisco being "clean", it can be stated muscle has moved in with the intention of staying.

☆ ☆ ☆

Nick had laid 21 grand on the line for a home in swank Monterey Heights.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, Gilbert H. Knelss, district director, 1355 Market Street, has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area.

MAY 9, 1947

FANDY factory, $10,000; 630 South Main St., Salinas; owner, Richard A. Storey, 331 Central, Salinas.

FOOD processing, $70,000; First and Cherry, Chico; owner E. T. Reynolds & Son, premises.

TUBERICULAR ward, $411,192; Visalia; owner, Tulare-Kings County Joint Tuberculosis Hospital.

GROCERY and market, $4500; Modesto; owner, C. M. Johansen, Rte. 1, Box 614, Modesto.

ELEMENTARY school, $40,000; Almond and California, Dos Pulos; owner, Dos Palos School District.

NEWS Agency office, $5560; 756 Smalley Ave, Hayward; owner, J T Carren, 918 A St., Hayward.

REPAIR farm machinery shop, $5,500; 5th and Main Sts., Fowler; owner, Victor L. Parks, 760 Van Ness, Fresno.

REPAIR roof and partitions, $3000; 1268 Market St., Redding; owner, Lou Gerard Motors, premises.

REFRIGERATION service, $10,000; 130 Roes, San Leandro; owner, J L Noga, premises.

BANK, $61,528; 3rd and Main, San Mateo; owner, Capital Co., 1 Powell St., San Francisco.

BANK, $1800; 14 Montgomery St., San Francisco; owner, Wells Fargo Bank, premises.

LUBRICATION service, $2375; McAllister and Hyde Sts., San Francisco; owner, Frank E. Carroll, jr., premises.

SINK and drainboard fabrication, $4000; 45th and Linden, Oakland; owner, Plastic Engrg. Co., 87 Echo, Oakland.

GRAIN warehouse, $10,000; 1007 Solano, Corning; owner, Clark Evison, Jr., 1060 5th, Corning.

REPAIR restaurant $1450; 546 Geary St., San Francisco; owner, Chris Mavlos, premises.

CANDY mfg. plant, $50,000; Lomita Park; owner, Douglas Shaw, 426 Pacific Ave., San Francisco.

LUNCH and billiard room, $8500; 329½ N Main St, Porterville; owner, R. Zajleck, et al, 308 E Date, Porterville.

REPAIR store bldg., $2090; Ukiah; owner, IOOF Lodge No. 174, Ukiah

Glide-Away
The Perfect New, Modern OVERHEAD TYPE GARAGE DOOR
GUARANTEED WELDED CONSTRUCTION

Glide-Away's metal weatherstripping on door and patented lamb Aligner meet to provide a perfect weather-tight closure.

Glide-Away's patented lamb Aligner and weather seal permits installation in out-of-plumb openings without carpentry work.
Only Glide-Away Has the New
IMPROVED SPRING-BALANCED MECHANISM that

When open, Glide-Away retracts completely into the garage, up and out of the way . . . mechanism still leaves garage space clear. Also note its sturdy construction.
Glide-Away
is the Place
Welded Construction of
N-A-X
HIGH TENSILE
STEEL
OFFERS THESE ADVANTAGES!
SINGLE DOOR.. SIZE: 8' x 7'
DOUBLE DOOR. SIZE: 15'11" x 7'
The new Glide-Away mechanism is engineered to provide perfect balancing of the door's weight. Specially designed door handle can be opened from inside when locked—no danger of accidental imprisonment. Glide-Away can be quickly and easily adjusted with only wrench or pliers.
• FITS ANY GARAGE SIMPLY INSTALLED
• NEEDS NO EXTRA SPACE
• EFFORTLESS AND NOISELESS
• IS EASILY ADJUSTED

Glide-Away's compact mechanism fits right on the door jamb—no projections or protruding structure to kill space.

Interior view of garage showing Glide-Away completely recessed. Elimination of center post with double doors makes parking easier.
We have a full size working model installed at our warehouse for your inspection. Come and see it. Contractors Welcome.

FREE! This 96-page book...
to celebrate our 50TH ANNIVERSARY 1897–1947

We have printed a special anniversary edition of this invaluable book for business executives, architects, contractors and engineers. This 96-page book summarizes our unique and extensive experience in the protection and decoration of structures after 50 years of manufacture and service. In that time we have faced and solved many problems on thousands of projects, involving every industry, every variation in climate and almost every known condition.
CONTENTS
HOW TO SOLVE MANY CONSTRUCTION AND MAINTENANCE PROBLEMS
■
➡ CONSTRUCTION DETAILS
➡ MATERIAL TABLES
➡ WEIGHTS AND MEASURES
➡ HORN PRODUCTS AND METHODS
Here is a book giving you engineering data and specifications to help you solve many problems of waterproofing, dampproofing, painting, caulking, roofing and flooring. You may have this reference book with our compliments. Naturally, the edition is limited, first requested, first served. Write today—

Study Fire Factors

(Continued from Page 1)

for approval and the volume of construction that goes on each year, the office is one of great responsibility. The administrator should be thereby one highly qualified for the office. While there are a number of able building officials, it is an unfortunate fact that the salaries paid by many of our municipalities are too low to attract first-class administrators or to retain them after they have become experienced in their jobs. This condition usually extends throughout the department, and, as a result, most of the building departments today are so understaffed as to make it impossible to carry out proper inspection of buildings to determine compliance with the law. A lack of such technical assistance, moreover, often is responsible for failure to modernize the local code. And even though the local code is adequate, its effectiveness is frequently lost because of this defect in the enforcement machinery.

"The budgets for such departments should be determined in accordance with the importance or quantity of the work to be performed. Hence, notwithstanding present increased cost of government, attention should be directed toward examining the present composition of local buildings and fire departments to see that they are properly staffed and that rates of pay are sufficient to attract and retain first-class administrators.

"At the present time the respective functions of the buildings and fire departments are not adequately defined in many cities, with the result that the possibility of misunderstanding, friction, and evasion of responsibility is always present. When the enforcement of building ordinances, fire prevention ordinances, and the operations of the fire department are not administered by a single authority the legislative authority should clearly define the duties and responsibility of the respective agencies.

Cooperation Imperative

"As a general rule, the enforcement of the provisions of the building code, unless specific exceptions are made, shall be the responsibility of the building department. Any exceptions shall clearly place the responsibility for their enforcement.

"The duties of the fire department shall cover the supervision of housekeeping and maintenance of buildings so far as they pertain to fire prevention, the maintenance of fire extinguishing equipment, the storage of combustibes and inflammables, and the extinguishment of fires.

"In any event, the closest cooperation and harmony between the respective enforcement agencies is imperative, and each shall report violations of law and hazardous conditions to the official having jurisdiction."

City Fields Doomed
(Continued from Page One)

until actual construction work is 20 per cent completed, and less than $4 million will be needed before the full amount becomes available on July 1. There has been no fold-up in that regard insofar as obligations are concerned."

The Dodge newspapers recall that when CAA first announced the federal airport construction plan, the agency was not too anxious to stress financial and other project processing details for fear of being swamped with immediate applications.

Apparently the initial requests did not come through in expected volume. It may be assumed, however, that with municipalities pushing their airport arrangements with increasing verve at this time, the flood of applications for approval will reach a peak soon.

The smaller airports are not likely to be hit as hard as the Class IV and larger type under the proposed budget slash. A reduction to approximately $32 million for the government's share of the program in 1948 will eliminate an estimated 50 per cent of the projected Class IV and larger fields.

The exact extent to which the curtailment will affect the smaller projects has not been determined by Commerce, CAA said.

No more of this!

You can't hear what Henry is saying under the bed but you can be sure he is a "hot sales prospect" for Adequate Wiring. With Adequate Wiring there are plenty of outlets properly placed to eliminate inconvenient outlets in hard-to-get-at places.

A home with Adequate Wiring has plug-in outlets closely spaced and conveniently placed; it has enough circuits with wire large enough to carry full electric power to each appliance and lamp. Best of all, there will be no need for a tangle of cords hanging from an "octopus plug" when you want to use an extra lamp, clock, radio or small electrical gadgets. Insist on Adequate Wiring when you build or remodel. Write or come to any P. G. and E. office for your free copy of the 16-page booklet, "Electricity in Your Home Plans." It is full of pictures and ideas.

PLANS and Speculations

WAA announced this week that recommendation on bids for disposal of Richmond surplus shipyards have been forwarded to Washington for final action. Bidders were the City of Richmond, Parr Richmond Terminal Corp., Santa Fe Land Improvement Co., Richmond Steel & Equipment Co., and Trigon Supply Company of San Francisco.

oOo

An instrument landing system is being installed at San Francisco airport. Completion will be in two or three weeks.

oOo

In Del Norte County Harry M. Malpas, county surveyor, has plans underway for early advertisement of a bridge across south fork of Smith river, at an approximate cost of $60,000, including engineering and contingencies.

This structure will be a modern steel arch, designed for a 15-ton truck and trailer, providing a 24-foot roadway.

oOo

A petition for establishment of Bakersfield west side hospital district embracing the area within the fourth supervisorial district was filed with the board of supervisors.

oOo

A special committee to study the proposal for an aquatic park and yacht harbor on the Oakland waterfront west of the Oakland army base will be appointed by the Oakland board of port commissioners.

oOo

Great Falls, Mont., today was advanced $2,000 by federal works administration to finance the preparation of drawings and specifications for enlargement of the ice areas in the Civic Center building at an original cost of $54,500. Total funds advanced $2,800 to finance the preparation of drawings and specifications for a sanitary sewer system in southwest section, estimated to cost $90,300.

oOo

The Contra Costa county supervisors authorized expenditure of $10,000 for construction of a concrete retaining wall on Winslow Street, Crockett.

oOo

Rodeo has lost is fight to have the site of the freeway to Sacramento re-routed one-quarter mile to one mile south of its planned right-of-way, it was learned here.

oOo

Oakland's city council has authorized City Manager John F. Hassler to petition the state for allocation of $415,250 in gas tax funds for widening the route from 14th Avenue to 23rd Avenue.

oOo

A petition for the establishment of a hospital district in western Kern County and the construction of a public hospital in Taft has been submitted to the board of supervisors.

oOo

Merced, April 29.—Mayor J. E. Fritz told the Merced city council last night the city urgently needs new fire and street equipment and added "we probably will have to hold a bond election to finance the improvements".

oOo

The veterans housing development, located near the Hayward airport, should be officially accepted from the government by the city within 30 days. They were converted from army barracks, under government contract, at an approximate cost of $2800 for each unit.

oOo

Berkeley has been authorized to repair the highway north of the Pleasant Hill School at a cost of $10,000.

#

$1,500,000 PROJECTS

SANTA FE, N. M.—Nine highway projects—seven federal - aid and two state ventures—will get underway soon following awarding of contracts totalling almost $1,500,000. An eighth federal - aid project is temporarily stalled, as state highway commission has refused bids, saying they were higher than expected, possibly because of an error in specifications.

Nationwide Flood of FHA New Applications Marks Opening of Spring Construction Season

WASHINGTON (Exclusive).—The opening of the spring construction season continued to be felt in the number of applications for housing permits received by the federal housing administration in its regional offices throughout the country.

Some 1,200 more applications for new home permits were received in the week ending April 25 than during the preceding period.

The applications for permission to remodel, however, rose only slightly, coming up by 13 additional requests in the week ending April 25. This indicated beyond much doubt that the greatest number of home owners planning to make their houses over were not resorting to the formality of applying for a government-sanctioned approval.

In the last week for which figures from FHA are available, the applications for permits for new houses jumped from 4,081 to 5,207, a substantial increase in view of the relatively low figures for the entire country. The 1,216 additional permits sought brought the total number under the FHA permit system to 76,877. This compared with 71,580 on file in the agency's offices the week before.

The approval column told a somewhat different story, however. Here, the figure rose by only 277 sanctions over the week before. This small number of approvals nevertheless will result in an additional 1,744 housing units. The figures on approval for the two weeks are: April 18, 4,929 approved, and April 25, 5,206 approved.

The number of new dwelling units, which represents more nearly the "pay off" column in terms of new housing for this country, showed a total of 10,435 units resulting from the April 18 approvals and 12,179 from the FHA actions a week later.

Of course, the cumulative unit tabulations is continued to climb steadily. April 18 saw 200,200 dwelling units represented in FHA actions to that date and April 25, as many as 212,385. The latter figure is the present number of living units anticipated from all of the housing agency's approvals of new home applications since the HH priority system was junked last December 24, and the newer and simpler permit arrangement substituted.

The percentage of new units to be built for occupancy by those other than returned service or present military personnel rose slightly—from 13.8 per cent to 14.1 per cent—with the announcement for April 25.

Only 29,522 of the 212,385 units represented in approvals will be for non-veteran use. A slightly larger total, 33,862, will (or already is) renting to veterans.

Of all units constructed for rental purposes, 37.6 per cent were in the classification under $60 per month, FHA said. The figure is 32,740.

Finally, here are the floor area breakdowns up to date:

Total number of units applied for on which floor areas were reported by law—178,519.

With 799 square feet or less, 43,001 units or 24.1 per cent of all.

With 800 to 1,099 square feet, 72,676 units or 40.7 per cent.

With 1,100 to 1,399 square feet, 43,533 units or 24.4 per cent.

With 1,400 to 1,500 square feet, 19,309 or 10.8 per cent.

#

$5,000 HOME COSTS $9,000 OR 80% MORE

WASHINGTON.—Surveying 26 major cities throughout the country, the Northwestern National Life Insurance Company has found that a home built for $5,000 in 1940 costs an even $9,000 to construct today.

The average increase in residential building in the areas canvassed was 80 per cent, the company announced.

It was said that almost half, or $1,800 of this $4,000 rise, took place in the last year. Results of a previous survey by the same concern showed that the 1940 price of $5,000 had risen to $7,200 in the spring of 1946.

#

$1,500,000 PROJECTS

SANTA FE, N. M.—Nine highway projects—seven federal - aid and two state ventures—will get underway soon following awarding of contracts totalling almost $1,500,000. An eighth federal - aid project is temporarily stalled, as state highway commission has refused bids, saying they were higher than expected, possibly because of an error in specifications.

#

SET EMERGENCY FUND

WASHINGTON. — The house committee on public lands has been referred a bill authorizing the reclamation bureau of reserve from its general fund an emergency fund "which shall be available for defraying expenses which the Commissioner of Reclamation determines are required to be incurred because of unusual or emergency conditions."

PRA Commissioner Describes Controlled Access Roads as Best

WASHINGTON.— Thomas H. MacDonald, commissioner of public roads for FWA, said highways of the controlled-access type offer the only satisfactory solution of traffic problems on many of the main arteries through and near cities.

Writing in "Public Construction" for April, the Commissioner said this fact became evident before 1941 and that the need has been accentuated by the continued swelling of traffic streams since the end of the war. Traffic growth has exceeded the most optimistic estimates and has reached a volume not anticipated for at least fivey ears or possibly longer.

Separate Flows

So, to serve present traffic needs and provide for greater future volume, there must be a clean break with past practices in designing major arteries and an acceptance of controlled-access design.

The type of highway advocated by Commissioner MacDonald meets the requirements of speed, capacity and safety, he said. It incorporates the important characteristic of access or exit at predetermined locations with the approaches arranged to feed traffic into the main stream so that it may merge smoothly and without conflict.

Cross traffic at grade is eliminated, he points out.

"Generally, the opposing traffic flows are separated by a median strip and, where needed, separate frontage roads are provided to serve nearby property. This type of highway requires a wide right-of-way, and in the urban districts this is a very real obstacle."

In planning these new highways, PRA is projecting road shoulders wide enough to accommodate any type of vehicular traffic but not smooth enough to encourage use as added traffic lanes.

The agency says that depressed highways are usually preferable to elevations because of width required to provide necessary features. When shoulders are included, it can readily be seen that elevated roadways would cost considerably more than surface or dressed thoroughfares.

Experience has demonstrated, MacDonald says, that an additional lane is necessary to insure that the other lanes of an elevated highway function at full capacity. He describes this as an important element of cost which should be taken into consideration in choosing the type.

Fairer Evaluation

The Commissioner writes:

"Quite understandably the first reaction on the part of the highway official or the public at large is that the controlled-access highway is very expensive. This results from our thinking in terms of the cost per mile, which has long been our unit of measure, rather than the cost measured by vehicle capacity per lane per hour. Some such cost unit must be used in the future to get a real understanding of costs necessary in relieving urban congestion.

"One well designed four - lane expressway will carry the same number of vehicles at nearly double the average speed, as five 40-foot wide ordinary city streets on which parking is prohibited, and under favorable control of cross traffic from intersection streets. Under less favorable conditions, eight 54-foot city streets on which parking is permitted would be required to carry the volume of traffic that may be carried on a single properly designed four-lane, controlled-access highway. These comparisons are so startling that many well informed people will not easily accept them.

Maine Senator Presses to Revise Federal Airport Act Along Lines of Highway Act

WASHINGTON.—Senator Owen Brewster of Maine is bent on amending the Federal Airport Act to make it conform to certain tested provisions of the Federal Air Highway Act.

Toward this end, the member of the interstate and foreign commerce committee intends to amend his bill for handing over to the states the principal functions in connection with administration of the Federal Airport Act.

The first amendment he is offering provides that 1½ per cent of the amount of federal funds apportioned for any year to any state may be used in combination with state funds for making advance surveys, plans, engineering and economic investigations. This would apply to all projects for future construction in each state.

Senator Brewster points out that this provision is similar to those in the highway planning and research section of the Federal Aid Roads Act which have proved their value in promoting growth of the contry's highway system.

A second amendment provides for advances to any state of the federal share of the cost of project costs to enable state airport agencies to make prompt payments as the work progresses. Contractors would gain immeasurably by this amendment, being assured of receiving their money as work goes forward. It would remove many uncertainties involved in payment delays due to government redtape.

Engineers Concerned

In explanation of this proposal, Senator Brewster says merely that "proper safeguards are provided to protect the federal interest".

Most important, perhaps, in this second amendment is the fact that under its provisions initial stages of airport construction could proceed while state agencies await formal approval of the other aspects of the same jobs. "This amendment would make it possible for airport projects to proceed without delay," Senator Brewster said.

Architects and engineers are watching the "fund advance" amendment with interest. Its parallel with the Federal Aid Highway Act amendment permitting advance of funds for planning work is significant.

After conferring with the executive committee of the National Association of State Aviation Officials, Senator Brewster made this comment:

"It is apparent to me and to the state aviation officials that the more the Federal Airport Act is made to conform to the thoroughly-tested Public Roads Act, the better it will be. During my four years as governor of a state, I witnessed at first-hand and had something to do with the administration of our federal-state highway construction program.

Channel Thru States

"It was successfully and economically operated because its administration was based ona firmly - rooted principle of government; namely, federal-state partnership in carrying out grant-in-aid programs.

"It is becoming increasingly apparent that if the Federal Airport Act is to be made effective, it will be through the action of the states.

"Current reports indicate that many cities will not be able to build new airports without additional assistance from the states and federal government. That is why it is so important for congress to enact S. 1038, which gives the states a definite place in the program by providing for state channeling of federal airport funds as is the case in other grant-in-aid projects. The importance of adopting that amendment is even more warranted than it was last year."

Hearings May 15

Far more airports will result from the application of principles contained in these two amendments than would be built without them, the senator from Maine believes. In addition to restoring a long-recognized function of good government it will, in his opinion, bring about the administration of a more effective airport construction program.

It was just learned that hearings on S. 1038 will begin May 15 before the interstate and foreign commerce committee.

ASK $5 MILLION LOAN

WASHINGTON.—The situation in the heavy construction field can't be too tight.

A Long Island lighting company has applied to the Securities Exchange Commission for permission to borrow $5 million for construction and to pay off some bank loans. The same firm's subsidiary petitioned SEC to sanction its proposed borrowing of $500,000 for similar purposes.

9-10—EDUCATIONAL BUILDINGS

5/13/47 7
Owner Taking Bids—Due May 28, 8 P. M. (Bidders Figuring)
High School Classroom Building
ANTIOCH, Calif., Contra Costa Co. Live Oak High School.
Owner — Antioch-Live Oak Unified School District, Henry Spless, superintendent of schools, 1500 D St., Antioch, Calif.
Architects & Engineers — Franklin, Kump, & Falk, 9 Main St., San Francisco, Calif.
Reinforced concrete, 2-story, radiant heating; includes 8 classrooms.
Plans and specifications obtainable from the above office of the architect upon deposit of $25.
The following contractors have taken out plans:
Swinerton & Walberg Co., 225 Bush St., San Francisco, Calif.
Wallace D. Harkins, 406 Sutter St., San Francisco, Calif.
Peter Sartorio, 262 Clementina St., San Francisco, Calif.
Pacific Coast Builders, 2580 18th St., San Francisco, Calif.
Carl N. Swenson, P. O. Box 558, San Jose, Calif.

5/13/47 9
Bonds Approved May 7 in Amount of $,000,000
High School System Expansion
BAKERSFIELD, Calif., Kern Co.
Owner — Kern County Union High School District, Theron L. McCuen, superintendent, 1341 F St., Bakersfield, Calif.
New high school plants proposed in Bakersfield, Oildale and Arvin and expansion of Bakersfield Junior College, East Bakersfield High School and the McFarland and Shafter high schools.

14-17—PUBLIC BUILDINGS

5/13/47 15
All Bids Received April 21 Were Rejected—Explain When Owner Will Ask New Bids
City Hall Annex
BURLINGAME, Calif., San Mateo Co. 267 Park Road.
Owner—City of Burlingame, Herbert W. White, city clerk, City Hall, 267 Park Road, Burlingame, Calif.
Architect — Sharps and Brown, 1319 Howard Ave., Burlingame, Calif.
City Engr.—Kenneth S. Fitch, City Hall, Burlingame, Calif.
Reinforced concrete, one-story, 17x50 ft., to house offices of city engineer, purchasing department, building inspector, engineering drafting room.
M. J. Henry, 132 Bancroft Way, Burlingame, at $14,977 submitted the previous low bid.

5/13/47 15
Contract Awarded
Alterations to Rooms No. 215, 215A 218 Cost $3437
SAN FRANCISCO, Calif., City Hall.
Owner — City and County of San Francisco, Department of Public Works, Room 283 City Hall, San Francisco, Calif.
City Architect—Dodge A. Riedy, Rm. 265, City Hall, San Francisco, Calif.
Contractor—William Martin & Son, 666 Mission St., San Francisco, Calif.

5/13/47 16
Correction
Owner Taking Bids—Due June 5, 2 P. M.
Painting and Miscellaneous Repairs
UKIAH, Calif., Mendocino County. U. S. Post Office Building.

Owner — Federal Works Agency, Public Buildings Administration, office of the district engineer, 838 U. S. Appraiser's Bldg., San Francisco, Calif.
Plans by owner.
Interior and exterior painting and miscellaneous repairs.
Plans and specifications obtainable from the above office of the district engineer.
Correction in bid opening date.

18-19—RELIGIOUS BLDGS.

5/13/47 19
Contract Awarded—Work Will Start May 15
Clapboard Cost $19,149
AUBURN, Calif., Placer County. 1281 High Street.
Owner—Bethlehem Lutheran Church, 1285 High Street, Auburn, Calif.
Architect—Charles F. Dean, California State Life Building, Sacramento, Calif.
Masonry (basalite block).
Contractor—Tara J. Wold, Auburn, Calif.

22-26—RESIDENTIAL BUILDINGS

5/13/47 26
Owner Taking Bids—Due May 28, 2 P. M. (Bidder Figuring)
Conversion of Hospital and Barracks Buildings to Dwelling Units (266)
FRESNO, Calif., Fresno Co. Hammer Field.
Owner—Housing Authority of County of Fresno, 2511 Vasser Terrace, Fresno, Calif.
Architect—Anderson & Simonds, 2800 Park Blvd., Oakland, Calif.
Conversion of hospital and barracks buildings to dwelling units.
Plans and specifications obtainable from the above office of the architect and from the office of the Housing Authority upon deposit of $50, refundable.

BRIDGE, SAN LUIS OBISPO COUNTY

Low and Only Bidders
Bridge Cost $9225
SAN LUIS OBISPO COUNTY, Calif.
Across Steiner Creek at California Polytechnic School.
Owner—State of California, Division of Highways, L. H. Gibson, district engineer, 50 Higuera St., San Luis Obispo, Calif.
Plans by engineering department of owner.
Low bidder—O. R. Ochs & Son, Box 721, San Luis Obispo, Calif., $9225.
The work involves:
(1) 15 cu. yds. removing concrete;
(2) 320 cu. yds. structure excavation;
(3) 140 lin. ft. timber bridge railing;
(4) 105 cu. yds. class "A" portland cement concrete;

	(A)	(B)	(C)	(D)

The following contractor has taken out plans:
Midstate Construction Co., 1299 Bush St., San Francisco, Calif.

5/13/47 22
Law and Only Bidders
Hotel (Addns. & Alterations)
BOISE, Idaho, Ada County. Hotel Boise.
Owner—Not Given.
Architects and Engineers — Victor Jones & Associates, Republic Bldg., Boise, Idaho.
Steel and concrete slab, 5-stories, 52x80, concrete floors, plaster walls and ceiling, tile bathrooms; includes addition to increase the height of the west wing to 10 stories and add approx. 50 rooms; addition to the tower to increase its height to 12 stories and to house restaurant and dining facilities with 100 person capacity.
Low Bidder—Dkoepfer & Gramkow, Boise, Idaho, $261,890.
Other General Construction bidders were:
C. B. Lauch Construction Co. Boise, Idaho, $320,137.
Brennan & Cahoon, Pocatello, Idaho, $322,995.

5/13/47 22
Contract Awarded
Poultry Bldg. & Horsebarn Cost $23,848
COLUSA, Calif., Colusa County, 4th Division Agricultural Association.
Owner—State of California, Division of Architecture, Anson Boyd, State Architect, Public Works Building, Sacramento, Calif.
Contractor—H. V. Cross, 152 Waverly Street, Sunnyvale, Calif.

28-30—MISCELLANEOUS BUILDINGS

5/13/47 28
Low and Only Bidder—City Council Authorizes Award of Contract
Sanitary Facilities Cost $5,885
WALNUT CREEK, Calif., Contra Costa County, City Park.
Owner — City Council of Walnut Creek, Victor Jean Vecki, city clerk, City Hall, Walnut Creek, Calif.
Includes restrooms and storage lockers.
Contractor—Stone Construction Co., 366 5th St., San Francisco, Calif., $5,885.

5/13/47 28
Owner Taking Bids—Due May 20 2 P. M.
Bidders Figuring on G. C. Motor Testing Facilities
WHITE SANDS PROVING GROUNDS, N. M.
Owner—U. S. Govt. War Dept., U. S. Engineers, Col. Henry F. Hanis, Dist. Engr., Albuquerque, N. M.
Archt.—Private plans.
Includes two 15,000-gal. fuel tanks; two concr. pump houses, 30x36 ft. 250 ft. railway on concr. ramp; 100 ft of 2x3 ft. reinforced concr. spillway approx. 600 sq. yds. of parking apron.
Following contractors have taken out plans:
C. H. Leavell, 1900 Wyomng, El Paso, Texas.
F. R. Burn, Box 1111, Las Cruces, N. M.
J. H. Ryan, Box 513, Albuquerque, N. M.
Robert E. McKee, 1918 Texas, El Paso, Texas.
Henry Thygesen, Box 876, Albuquerque, N. M.
Alvis F. Denison, 301 S. Wellesley, Albuquerque, N. M.

PLANS and Speculations

Directors of the Shafter-Wasco irrigation district yesterday approved a proposal for a survey of the area which would include a recommendation of steps necessary to bring more water into the district.

oOo

Work on the Elm Street sewer project in Roseville will start in the near future, city councilmen stated Wednesday.

oOo

Sacramento army engineers are awaiting word from Washington before setting a definite date for ceremonies opening construction of the $35 million Pine Flat Dam on the lower Kings river. May 21st is being considered as a tentative date.

oOo

California Highway Patrol has asked the board of supervisors to provide a site across from the present station in Sacramento for a new building to cost $90,000.

oOo

Sacramento City Clerk Harry G. Denton announced recently a group of 50 World War II veterans are seeking to gain control of the city owned gravel pit near Eastern Ave. and 58th St. as a site for homes.

oOo

...Construction of a four-lane subway beneath the Southern Pacific tracks at 13th and B Streets as an alternate project in place of widening the present two-lane subway at 12th Street will be suggested to state highway engineers by Sacramento officials today.

oOo

Woodland City Council has voted to expend from $2300 to $2400 for the cost of erecting 219 new four-way street signs. Approval was given at a meeting Monday night.

oOo

The state division of beaches and parks has been granted a water diversion permit for 25 gallons a minute from Slate Creek in San Mateo County. Estimated cost of the water project is $15,000.

oOo

The city of Richmond's priority bids for three parcels of Richmond shipyards one and two will be accepted, war assets administration said today.

cOo

Solano County supervisors received a request from three Benicia veterans groups to make an application to the state for funds to assist in the construction of a memorial building.

FORUM DISCUSSION IS FEATURE OF EAST BAY ARCHITECTS' MEETING

Should a city building department refuse permits for plans not cleared by a federal agency?

Should a business license for architects be based on gross receipts? What increase do you consider reasonable?

These topics will be discussed at an open forum meeting of the Eastbay Association of Architects at the City Club Hotel in Oakland Wednesday evening.

A technicolor movie will be shown, Oscar M. Price, president, announced.

#

CANAL JOB AWARDED

Construction of the earthwork, concrete structures and steel pipeline for the Willow Creek Siphon and wasteway on the north unit main canal of the Deschutes project in Oregon, has been placed under contract by the bureau of reclamation, Commissioner of Reclamation Michael W. Straus announced today. The contract was awarded to the Morrison-Knudsen Co., Inc., of Boise, Idaho, on its low bid of $195,161.

Cost Reduction and Apprentice Training Topics of AGC Meet

WASHINGTON.—First indication that the Associated General Contractors, representing some 4,000 heavy construction members throughout the country, are looking forward to a 'business recession" came today.

AGC, in announcing a board meeting at Seattle May 19 and 21, said vital problems now facing construction which must be solved if the industry is to take up as much slack as hoped for in the "business recession" now forecast in many quarters, will be analyzed at this spring session of the governing and advisory boards.

The boards will meet at the Olympic hotel at the invitation of the Pacific Northwest branch which is composed of the Idaho, Montana, Mountain Pacific, Portland, Seattle, Spokane and Tacoma chapters of AGC.

Special emphasis will be laid on consideration of construction costs.

F. W. Parrott, Sioux City, Iowa, president of the organization, has requested reports from AGC officers from all parts of the country so the Seattle meeting may better appraise the price situation.

Cost matters to come before the meeting include:

1—Indications as to whether the cost trend is upward, downward, or leveling off at the present time.

2—What factors are important in increasng costs and reducing them.

3—What actions the association can take most effectively to help reduce construction costs.

Activities of the national association and problems confronting construction, with special attention to controls, legislation and costs, will be reported by H. E. Foreman, AGC managing idrector.

Labor relations developments will be discussed in detail by J. D. Marshall, assistant managing director.

Other subjects for the Seattle session include apprentice training, market development, specifications and contracts, accident prevention, public relations and trade practice ethics.

The association announced it has taken several actions in the interests of increasing the number of apprentices in the building trades, and has published a booklet explaining steps to be taken in establishing an "accelerated training" program which has proven successful in speeding up the preparation of beginning craftsmen.

The three principle divisions of the association—highway contractors, heavy construction and railroad contractors, and the building contractors — will hold separate meeting May 20 to discuss problems in their respective types of building.

Also, the joint cooperative committee of the American Association of State Highway Officials and the AGC will meet in conjunction with the Board meeting to discuss mutual problems of current highway construction, the AGC announcement in Washington said.

#

CPA LEADER TALKS BEFORE BICB MEET

Arthur J. Grier, regional director of the now defunct civilian production administration, will address a meeting of the Building Industry Conference Board on Wednesday, May 14, in the Commercial Club.

Grier was a contractor for 25 years prior to entering government service at the outbreak of the war. His speech will suggest specific means for increasing production in the building and construction industry.

Vast Quantities of Steel Scrap Are Stored In Europe While U. S. Industries Are Starving

WASHINGTON.—Some rather nasty remarks about governmental laxity in bringing war-produced scrap iron and steel back to the United States from abroad found their way into the congressional record today and are creating a real stir in Washington business circles.

Significantly, the controversy developed on the same day that General Motors announced it would close its body plant at Pontiac, Mich., because of a lack of steel. The shutdown will be for the balance of the week only.

It was Representative Harold C. Hagan, Minnesota republican, who lit the match and held it to the fuse.

"As a representative of a district clamoring for steel products", he said, "I demand to know why the war assets administration and the army and navy have not exhausted every means to get this steel scrap flowing back to the United States . . . Our government knows the basic facts. Why hasn't it acted?"

At this juncture many spectators wondered just why Congressman Hagan, or other members of congress who have attacked the inefficiency of government agencies regarding return of scrap to the United States, didn't introduce a bill to remove the red tape surrounding the present laws governing such imports.

A bit of digging by the Dodge newspapers revealed that the army and navy are charged with disposition of their own scrap. WAA is responsible only for that surplus scrap in the United States, its territories and possessions.

There are several clues to the reason both army and navy have not hastened their scrap disposal programs. First, it is said that much red tape, governmental inter-agency red tape, surrounds the shipment of iron and steel to the U. S., particularly from the European theater of war. All shipments of surplus from there must clear through the joint import - export authority.

Further lack of incentive is evident in condition of payment. Put to the trouble of offering the surplus iron and steel scrap from overseas, the army does not realize any of the proceeds from sale for its own coffers. All money from buyers goes directly to the U. S. Treasury.

Meanwhile, the construction industry, along with other heavy users of steel products, is starved for the multitude of steel items that might result from an influx of scrap now on foreign soil.

(Scrap is on the approved list of items sanctioned for return to the U. S. but it should be remembered that the foreign liquidation commission — responsible for the disposition of thousands of items of war equipment abroad—does not deal in scrap.)

(Continued on Page 7)

Engineers to Hear Redwood City Port Plea Next Tuesday

A hearing that may be the genesis of a program for construction of a marine terminal for the export of salt from Redwood City will be held next Tuesday morning at ten o'clock, in the city hall there.

Samuel Karrick

Col. Samuel N. Karrick, United States district engineer, will hear requests from the city that the army engineers revise their harbor project, extending the channel upstream a half mile, and constructing a turning basin.

Leslie Salt Co. of Newark, Alameda County, announced Wednesday that it will accept bids until June 2, for dredging approximately a million cubic yards and filling for salt beds in San Mateo County, adjoining the Port of Redwood City.

Plans and specifications are available from the office of the consulting engineer upon deposit of $15.00. This project may be the start of the long-range program leading to construction of the port for the export of salt.

#

Producers' Council National President Addressed BICB Here

Tyler Rogers, national president of the Producers' Council, Inc., organization of manufacturers of building materials and equipment, will be principal speaker at a joint meeting of the Northern California Building Industry Conference and the local chapter of the council, on May 19 at the Palace Hotel, it was stated today by Charles W. Kraft, information chairman of the event.

Rogers' talk will spearhead an industry-wide drive in California to secure reduction of over - all building costs. Advance information from the council chieftain, who is vice-president of Owens-Corning Fiberglas Corporation, indicates that he will discuss the improving materials supply situation, difficult labor supply conditions, indications of lowered prices before the end of 1947, and ways and means in which the industry can cooperate immediately to cut building costs.

A large turn-out is expected in the Comstock Room at the Palace, scene of the dinner and cocktail reception. Invitations are now being issued by F. K. Pinney of the Building Industry Conference Board, and by Russell M. Jamieson, field secretary of the Producers' Council.

#

FOUR SUE BERKELEY ROAD BUILDING FIRM

Four creditors have sued A. A. Tiesiau and Sons, Berkeley road builders, in federal district court to have the firm declared involuntarily bankrupt. Glens Falls Indemnity Co., the Kritzer Equipment Co., the Nevada Lumber Co. and Coast Equipment Company are the plaintiffs.

U. S. STEEL TURNS DOWN OVERSEAS SCRAP

WASHINGTON — The army said that United States a few days ago turned down a shipment of 150,000 tons of scrap that army was offering for $10 a ton, delivered at Bremerhaven, Germany, port. It is believed additional freight costs, which would have been assumed by U. S. Steel would make the venture too costly for the American concern.

This is good indication that the scrap market has broken strongly from its high point of $38 a ton of a few weeks ago. This was just twice the figure under the old OPA ceiling price.

Army explained it expected a negotiator by the name of Bender, who presumably arranged the foreign deal for U. S. Steel in the first place, to take the shipment in the name of a "dummy" company which may be a combine of junk dealers.

GROOVER AND I

THE "SACRED COW"

There has been much pure corn written about the shining knights of the sky who bravely fight in the bright blue yonder. When you know these boys, they say, "Nuts, make mine beer"!

☆ ☆ ☆

However, there is something hilariously irreverent in the way they joyously kick around stuffed shirt pomposities.

☆ ☆ ☆

After their own fashion they named the presidential private plane. Despite many silk hat protests the name stuck.

☆ ☆ ☆

Even Fulton Lewis, Jr., once got so far away from realism that he wept freckle-faced tears over the plane's being ingloriously called the "Sacred Cow".

☆ ☆ ☆

At last, high brass has figured out a way to change the name—retire the Sacred Cow and give the president a new plane, which has been christened in advance. The President will soon be making trips in the "Flying White House".

☆ ☆ ☆

The name is a little stuffy and pompous—slightly corny—

☆ ☆ ☆

But pointed better than one other starry - eyed suggestion: "The Dove of Peace".

#

Expediter Announces Three Exemptions to 1500 Foot Limitation

WASHINGTON. — Exemptions to the 1500-square-foot limitation on new houses—permitting houses up to 2,000 square feet in certain cases—are set forth in instructions that have gone to all field offices of the federal housing administration, Housing Expediter Frank R. Creedon has announced.

Applicants building for their own occupancy will be authorized by FHA field offices to construct houses with floor areas of more than 1500 square feet, but not exceeding 2000 square feet, where any of the following circumstances exist:

1—The size or composition of the family group to be housed requires four or more bedrooms.

2—The applicant requires additional floor space in his residence for the practice of his business or profession.

3—The applicant purchased a lot subject to deed restrictions in excess of 1500 square feet and made the purchase at a time when no regulations were in effect that would have prevented him from proceeding with construction.

It was pointed out, also, that operative builders—those not building for owner occupancy—are not exempted from the 1500-square-foot maximum.

#

NORTHERN, CENTRAL SEA BRANCHES HOLD SACRAMENTO MEETING

A joint meeting will be held next Tuesday by the Structural Engineers Associations of Northern California and of Central California in Sacramento at the Elks Club, 11th and J Streets.

There will be a pre-dinner reception at 5:45 p. m., and dinner at 6:30 p. m. in the Masonic Temple at 12th and J Streets.

Gilbert E. Morris, superintendent of building and safety, City of Los Angeles, will speak on "Overlapping Building Codes and the Need for Unification".

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, Gilbert M. Steiner, district director, 1355 Market Street, has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area.

May 9, 1947

LUMBER PROCESSING, $7,600.00; owner, Valley Lumber Co, Box 1946 Fresno.

TRUCK REPAIRS,$6,000; 13th & I Sts, Sacramento; owner, Lester Motors, Inc, 1900 I St, Sacramento.

LOADING PLATFORM and SHED, $25,000; Martinez Refinery; owner, Shell Oil Co, 100 Bush, San Francisco.

REPAIR AUTO SALES & SERVICE Bldg, $60,000; owner, James F Watters, Inc, 1355 Van Ness, San Francisco.

AUTO REPAIRS, evicted, $9,643; Main at Union, Stockton; owner, Allan Rosasco, 539 E Channel, Stockton.

SERVICE STATION, $5,900; S Pablo & Channing, Berkeley; owner, Ralph B Pahlmeyer, 728 Beattie, Oakland.

WELDING & BLACKSMITH Shop, $5,000; near Redding, owner, Elreno Harrison, Redding.

SALES OFFICE, ELECTRIC Products, $20,000; Adeline at 19th, Oakland; owner, Kebow Realty Co, 729 Turner, Los Angeles.

NURSERY STOCK, $10,000; 603 Grangeville, Hanford; owner, Franklin J Fasso, 312 N Cherry, Tulare

ROOF & WALLS OVER STORAGE TANKS, $7,800; Nebraska & Topeka, Monmouth; owner, Vie-Del Grape Prod Co, R 5, Box 406, Fresno.

CERAMIC FIRING, $5,000; 1940 Washington, San Leandro; owner, Frank D Souza, 1550 W 132nd, San Leandro.

TRAILER CAMP FACILITIES, $1,500; 96 Bay St, S Cruz; owner, James R Wilkinson, 534 W Cliff Dr, Santa Cruz.

CLASSROOMS & SANITARY Facilities, $50,000; 6th & H St, Decoto; owner, Decoto School District, Decoto.

MAY 12, 1947

CLASSROOMS, $156,000; Arcata; owner, Arcata Union High School.

DRY CLEANING plant, $19,300; Jefferson Park, Daly City; owner, Frederick Karp, 1165 Bay St., San Francisco.

FABRICATION of pre-fab homes, $9000; 12th at Potrero; owner, Sharp & Niedermyer, 2361 Garvin, Richmond.

COMPLETE body and paint shop $2000; Project City; owner, Frank C. Henning, Box 186, Project City.

CLASSROOM Addn., $47,500; Chualar, owner, Chualar Elementary School District.

DISTRIBUTION of electric supplies, $33,000; 501 Potrero Ave, San Francisco; owner, Westinghouse Elec Supply Co, 3454 Harlan, Oakland.

HAY STORAGE, $840; Vallejo; owner, Solano Meat Co, Box 728, Vallejo.

PARTITION office, $2300; 1355 Market St, San Francisco; owner, Mohawk Carpet Mills, 127 Montgomery St, San Francisco.

SCHOOL Admin. facilities, $12,000; Vallejo High School, Vallejo; owner, Vallejo Unified School District, 640 Carolina St., Pallejo.

COMPLETE market, $2500; Fresno; owner, Harry Minasian, Box 123, Fresno.

LUMBER YARD, $8800; Pt. Reyes Station; owner, Diamond Match Co., Box 1037, Chico.

REPAIR store bldg., $1720; 2100 Tarraval St., San Francisco; owner, Sidney Ruderman, premises.

DOCTOR'S Office, $14,000; 16th and K Sts., Modesto; owner, Dr. Robt. Radcliff, 1818 Patricia Lane, Modesto.

CENTRAL office, $42,000; Lawrence at Crescent, Quincy; owner, Pacific Tel. & Tel. Co., 140 New Montgomery St, San Francisco.

AUTO repair shop, $6000; Mtarconi Ave., Carmichael; owner, R. H. Goodgame, 1315 Q St, Sacramento

MAINTENANCE headquarters for gas transmission lines, $27,840; E 34th and Columbia, Pittsburg; owner, Pacific Public Service Co., 200 Bush St., San Francisco.

PBAE Office, $6000; Antioch; owner, F H Conlon, 1929 Acacia, Antioch.

RUBBER stamp shop, $6500; Van Buren and Fremont, Stockton; owner, John E. Markey, 311 North Eldorado, Stockton.

ELEMENTARY school bldgs., $126,000; Moorpark Avenue, Campbell; owner, Campbell Union Elementary Schools, Drawer N, Campbell.

ELEMENTARY school, $90,000; bet. Pollard and Allendale Rd., Campbell; owner, Campbell Union Elem. Schools, Campbell.

OFFICE for selective service records, $51,000; 1717 23rd St., Sacramento; owner, Mcnacl and Louis Brodsvedy, pursues.

REPAIR locker, plant, $19,000; 353 E Evelyn, Sunnyvale; owner, Sunnyvale Cold, Storage and Locker, 355 E Evelyn, Sunnyvale.

DOUGHNUT machinery and mix, $17,500; 3767 Shafter, Oakland; owner, Clarence T. Garrity, prem.

FOOR STORE, $1500; 677 Bush St., San Francisco; owner, Eezy Freezy Food Stores, 1800 Persits, Oakland.

FOOD Market, $30,000; 2nd and D Sts., San Rafael; owner, Cesare Bettini, et al San Rafael.

Red Tape and Scrap

(Continued from Page One)

All of this paradox holds true for the pavy as well. This branch of service estimates it has some 200,000 tons of scrapped machinery in the Pacific area, now awaiting disposition. The army says it cannot make an estimate of its own similar holdings, either in the South Pacific or Europe.

Congressman Hagan, after reviewing the shortage of steel that confronts his farmer constituency in Minnesota, (they are said to be short machinery, roofing sheets, nails and buling wire) said he was amazed to discover that "our government is doing little or nothing toward returning to this country the scrap steel resulting from the war."

This is the scrap which our mills desperately need if they are to reach full production ,he told the house.

Referring to the lowest iron and steel scrap stocks on record, the representative added, "Yet in Europe and on the Pacific islands, there are millions of tons of scrap in the form of out-of-date or damaged war equipment, bombed bridges, buildings, and so on. It is almost treason that this material is being held and storted at great expenses to the taxpayers when it so greatly is needed by industry for American business and agriculture, and to provide labor for American workers."

Hagan's remarks were based on a recently issued pamphlet from the headquarters of the Steel, Foundry and Scrap Industries' committee for expediting iron and steel scrap. This is a Washington organization which includes the Iron and Steel Institute, Institute of Scrap Iron and Steel, Steel Founders' Society of America, Gray Iron Foundries Society, Inc., and American Malleable Society.

"As a representative of a district clamoring for steel products," Rep. Hagan continued, "I demand to know why the WAA and the army and navy have not exhausted every means to get this steel scrap flowing back to the United States.

"Now is the time to take measures for getting it back. It can only be done while prices are high enough to pay the cost of handling, shipping and processing scrap. The present scale of prices cannot be expected to last forever."

Claiming that very little steel remains on American farms in the form of scrap, Congressman Hagan said, "Since farmers have scraped the bottom of the barrel, they're not feeling exactly happy to hear that stalling, delay and indifference o nthe part of the government agencies are responsible for a good portion of our current scrap famine. Their resentment will be deepened, of course, every time they are unable to buy nails, baling wire and farm equipment—every time they read or hear over the radio the fact that Washington's failure to move mountains of rusting war scrap back to America is causing an ever more rapid depletion of our ore reserves, the reserves we had to gouge into so heavily to win the war."

He managed to introduce into the Congressional Record the full text of the industries' committee memorandum on the iron and steel scrap situation.

Official Proposals
Furnishing Certain Items of Equip. For the Martinez Filter Plant

INVITATION FOR BIDS MATERIALS AND SUPPLIES CITY OF MARTINEZ

Sealed proposals for furnishing certain items of equipment for the Martinez Filter Plant, addressed to the City Clerk, will be received by the City Clerk, City Hall, Martinez, California, until 8:00 P. M. June 4, 1947, at which time they will be publicly opened and read.
The materials on which proposals are desired are the following:
1. (a) 4,100 Linear Feet 16 inch Class 150 Cast Iron Pipe.
1. (b) 4,100 Linear Feet 16 inch Class 150 Transite Pipe.
2. (a) 3,150 Linear Feet 14 inch Class 150 Cast Iron Pipe.
2. (b) 3,150 Linear Feet 14 inch Class 150 Transite Pipe.
3. (a) 1,000 Linear Feet 12 inch Class 150 Cast Iron Pipe.
3. (b) 1,000 Linear Feet 12 inch Class 150 Transite Pipe.
4. (a) 21.88 Tons Class D Cast Iron Fittings for C. I. Pipe.
4. (b) 24.06 Tons Class D Cast Iron Fittings for use with Class 150 Transite Pipe.
5. Three 1400 Gallons Per Minute High Lift Electric Motor Driven Horizontal Centrifugal Pumping Units complete with motors.
6. One Venturi Meter and Recorder - Totalizer - Indicator Panel and appurtenances, complete as specified and shown on drawings.
7. 112 Linear Feet of 24 Inch, Class 150, Cast Iron Pipe as specified.
8. 96 Linear Feet of 18 Inch, Class 150, Cast Iron Pipe as specified.
Contract Documents may be examined at the Office of the City Engineer, 706 Estudillo Street, Martinez, California, and may be obtained by bona fide bidders from the City Engineer without charge. Prints of the plans, if desired, may be obtained from the City Engineer on the payment of $0.50 per sheet, which is not refundable.
Bidders may bid on any or all items and awards will be made, if made at all, on each item separately.

LARGEST CONSTRUCTION DAILY IN THE WEST

Vol. 57 No. 94 SAN FRANCISCO, THURSDAY, MAY 15, 1947

Copyright 1947 by F. W. Dodge Corporation

PLANS and Speculations

Kern County leaders have set in motion a promotional program to emphasize the vital need for completion of the Central Valley Project. The program suggests that each county affected by the project send supervisors and other delegates to join Governor Warren in Washington to protest the slash.

oOo

The board of supervisors' city planning committee has recommended that the board instruct the city attorney to find a means of acquiring a ste for a $33 million downtown parking garage five blocks long, suggested by Supervisor Chester MacPhee.

oOo

A production race to save a 20,000-acre rice crop in northern California was under way to provide life-giving irrigation to a rice crop threatened by a drought.

oOo

Bids on the Gilroy gas and electric franchise, to be opened June 16, have been called by the city council.

oOo

A proposed $70 million cut in the budget of the civil aeronautics administration would force CAA to discontinue operating San Francisco's airport's control tower, and abandon contemplated radar landing installations and an international air weather station.

oOo

San Francisco supervisors late yesterday completed action on establishment of a new metropolitan traffic zone extending from 11th, Gough and Duboce Avenue to the Embarcadero, and from Townsend to Sacramento.

oOo

District Attorney Edmund G. Brown's campaign for better housing in San Francisco was given impetus yesterday by appointment of Gregory Stout as a temporary assistant district attorney. He will investigate law violations that may be impeding the housing program.

oOo

Assemblyman Richard H. McCollister said today the state may obtain title to Argel Island in San Francisco Bay for state park purposes.

oOo

The Idyllwild Arts Foundation, at Idyllwild, Calif., is to obtain surplus structures to be converted into classroom, laboratory and cafeteria facilities, together with necessary surplus equipment. The school, which is affiliated with the University of Southern California, is being established this year. The institution will dismantle, transport and re-erect the surplus structures at its own expense. It is to provide college training in the various fields of the arts.

oOo

Sequoia union high school district is to obtain surplus structures which it will move and re-erect at its own expense, to be converted into about 3,840 square feet of classroom, shop and storage space at the Sequoia Union High School, Redwood City, Calif. The additional space, together with surplus furniture and equipment which may be made available, will enable the school to increase its veteran enrollment from the present 200 to 250.

$2.8 MILLION PULP PLANT IS AUTHORIZED

WASHINGTON. — Fibreboard Products, Inc., of San Francisco, has received approval of the facilities review committee of the office of the housing expediter to construct a sulphate pulp plant in Contra Costa county at an estimated cost of $2,836,000. The plup will be used in the manufacture of carton shipping containers for packaging foods.

WAA Will Donate Machine Tools to Save Storage Cost

WASHINGTON. — The war assets administration today moved to give away huge quantities of surplus machine tools to government institutions and non-profit organizations.

Any machine tool will be made available for donation if it remains in inventory after being offered at a fixed price to priority claimants and commercial buyers. Eligible donees include agencies or institutions supported by the federal government or by any state or local government and non-profit educational, health or charitable institutions.

This is the first time large scale donations of any kind have been made by the war assets administration, and the first time states and local governments will be the beneficiaries, WAA officials said. An intensive study of the needs of schools, institutions, and governmental bodies was made before embarking on this program. National purchasing groups were invited to Washington for consultation and for their recommendations. The donations program is the first major action taken as a result of these meetings.

Commenting on the program, Robert M. Littlejohn, WAA administrator, said:

"The war assets administration has today the largest inventory of machine tools in history. These tools constitute a national asset requiring considerable of national interest in any plan for disposal. A study of the machine tool problem indicates that warehousing costs represent one of the heaviest items in our operating budget and that it is more economical to donate machine tools than to winterize and keep them stored for another year."

SCHNECTADY ENGINEER ADDRESSES ELECTRICAL MECHANICAL ENGINEERS

E. S. Lee, an engineer in the General Electric general engineering and consulting laboratory at Schenectady, N. Y., will address a meeting of the American Society of Mechanical Engineers and the American Institute of Electrical Engineers on Friday evening, at the P. G. & E. Auditorium in Oakland.

His topic will be "European Impressions in New Developments in Engineering and Science." He was representative of the AIEE to the Sixth International Congress of Applied Mechanics held in Paris in the fall of 1946, and spent three months in Europe in 1939.

KRUG SETS UP NEW PHOSPHATE INDUSTRY PROGRAM ON COAST

Secretary of the Interior J. A. Krug has set up a unified Department of the Interior program for the development of a western phosphate fertilizer industry.

The program will be coordinated in the west through the Pacific northwest coordination committee, which is composed of Interior agencies, including the bureau of mines, geological survey, bureau of land management, office of Indian affairs, Bonneville power administration, bureau of reclamation, national park service, and fish and wildlife service.

NEED ROAD ENGINEERS

WASHINGTON. — Unless new engineers are attracted to the highway field, the nation's postwar construction program will be retarded and normal improvement in technical development will be restricted, Charles M. Upham, engineer - director of the American Road Builders' Association, told the first annual Florida Highway Conference at the University of Florida, Gainesville, today.

GROOVER AND I

EMPTY BAR STOOLS

When President Truman made his plea for lower prices the wine industries rushed in to say they were complying, and cited certain recent price reductions.

☆ ☆ ☆

The liquor interests had a licking coming. They moved in at the beginning of the war when wine was selling at about $1.25 per gallon. They didn't change the price, but changed the size of the container—for $1.25 you received "one fifth" of a gallon.

☆ ☆ ☆

If there are empty bar stools, it is because the Drinking Industry—like the home building industry has priced itself out of the market.

Edward L. Turkington Bridge Construction Man, On Area Council

Edward L. Turkington, prominent in San Francisco business and civic affairs, has been appointed assistant general manager of the San Francisco Bay Area Council, it was anncunced today by Frank E. Marsh, general manager of the Council.

Turkington will work in close cooperation with chambers of commerce, civic and community organizations and industrial groups to bring new industries into the nine Bay counties.

Well-known to Bay area business and municipal circles, Turkington brings 15 years' of industrial, construction and port facility experience to the Council's broad program of economic and civic development for the Bay Area.

His duties will also cover the Council's program for improvements in the area-wide transportation and traffic situation. This includes activities of the Bay Area Transportation and Traffic Committee, currently studying proposals for a second Bay crossing. Mr. Turkington was president of the Bay Area construction firm, Healy-Tibbitts, that built the approaches, piers and anchorages for the present San Francisco - Oakland Bay Bridge. His firm also built many of the pre-war and wartime facilities, including shipyards, in the Bay Area, and he is well acquainted with industrial construction needs in the region.

Rock Fault Claims $6.5 Million more For Davis Dam Job

WASHINGTON.—The bureau of reclamation has announced its intention to spend six and one-half million dollars on the Davis Dam project in Arizona and Nevada.

This expenditure will represent eight and one-half per cent of the total original cost of the entire job.

A work order for the additional construction was being prepared for the Utah Construction Company, original contractors, a bureau official said.

The new work will not be on the dam proper, but on spillways and the movement of the powerhouse upstream to make it safer.

A gigantic rock fault has been discovered on the Arizona side of the Colorado river. This has resulted in the decision to strengthen the spillways and move the powerhouse, the bureau said.

Scrap Committee Deplores Failure of WAA, Other Agencies to Return Scrap to Stateside

'ONLY TRIFLING' IS DESCRIPTION OF WAA DISPOSAL PROGRESS

WASHINGTON. — Keen disappointment was expressed by a joint committee representing consumers and scrap collectors over the failure of government agencies to expedite the return of damaged war equipment, and other potential iron and steel scrap to the nation's reserves. hTe statement was made public today by Robert W. Wolcott, chairman of the steel, foundry and scrap industries' committee for expediting iron and steel scrap.

Speaking for the committee, Wolcott pointed out that a statement, issued March 7, by John Steelman, director of reconversion for the federal government, had promised that about 1,250,00 tons of wartime materiel equipment, and other scrap would be returned to the nation's stockpiles during 1947, and that some 500,000 tons would be put into industrial channels "during the next two months."

Wolcott's statement said:

"Actually, there has been only a very slight increase in over-all inventories of scrap. This is the time of year when there should be a large flow of scrap into dealers' and consumers' inventories. The movement has been much smaller than anticipated.

"The committee is particularly disappointed with failure of the war assets administration to act more promptly in carrying out Mr. Steelman's program. Only trifling progress has been made in declaring obsolete tools and industrial equipment as scrap. Movement of these tools into the scrap reservoir has been far below reasonable expectations. The promised scrap, so badly needed by the steel industry, the foundries, and processors, has simply not materialized.

"Our joint committee is also disturbed at statistics of the shipbreaking program. We have reports that some of the new shipbreaking plants are beginning to run out of work. Doubts are expressed that they can continue operating through the summer. Action, and quick action, is clearly called for on the part of government agencies if these plants are to be provided with the scrap and the work that they need.

"On the other hand, the committee is deeply gratified that the navy is giving concrete proof of its interest in the problem of returning damaged war equipment and other materiel to this country's scrap reserve. The navy has announced a survey trip to the Pacific to make an exhaustive analysis of the amount of materiel still there which could be returned as scrap. tI is the strongly-held conviction of this committee that much more scrap exists in the war areas than has generally been admitted.

Lumber Retailers to Hold Washing'n Meet

WASHINGTON.—Directors and secretaries of member groups of the National Retal Lumber Dealers Association will convene in Washington this week.

Generally, they will discuss what can be done to get homes for the American people without upsetting the national economy, but specifically, their topic will include engineered housing, the NRLDA educational program, government orders, freeing the industry from government control, and the Taft Ellender-Wagner housing bill which the association opposes catagorically.

No discussion of current building costs is on the agenda.

COAST STEEL CHIEF REPRESENTS INDUSTRY IN PACIFIC SURVEY

L. G. Knight, manager of purchases and traffic, Seattle, and Portland districts, Bethlehem Pacific Coast Steel Corporation, will represent the American steel industry in a survey tour of steel scrap accumulations in the Pacific islands of Guam, Manus and Okinawa, and at Manila in the Philippines. The tour, sponsored by the U. S. Navy, is scheduled to begin by naval air transport from Moffett Field, Sunnyvale, on May 15.

Knight, an outstanding authority on steel scrap conditions, availaby supply, and sources on the west coast, has been associated for 35 years with steel scrap purchasing. He started at the Seattle plant of Bethlehem Pacific in 1910 as an office boy and has been in the steel industry since that time.

Other members of the committee will be representatives of the steel scrap, foundry, and machine tool industries, the navy, and other interested groups. Knight was named to the committee by the committee on iron and steel scrap of the American Iron & Steel Institute.

Efforts to increase the movement of steel scrap for the American steel industry have been among the prominent activities of the Institute, and representatives of its scrap committee have participated in surveys of available scrap in Britain, France, Belgium, Germany and other European countries, in Tlaska and elsewhere and now the Pacific territories will be combed.

It is known, for instance, that in the Harbor of Manila, in the Philippines, numerous major type vessels lie sunken and must be raised and removed to clear the waters of obstacles to shipping. Thousands of tons of steel scrap suitable for steel making are recoverable from these wrecks, and from damaged and abandoned ordnance, vehicles, etc., now reposing in army, navy and maritime commission scrap yards throughout the former combat area.

Local AGC Chapters Well Represented at Seattle Policy Meet

Local chapters of Associated General Contractors of America will be well represented at the spring board meeting in Seattle starting this Saturday. The meeting will have as its focal topics cost reduction and expansion of the apprentice training program, locally.

Representing the Central California AGC chapter will be Harold W. Smith, president; Carl N. Swenson, vice-president; Fred J. Early, Jr., national director, and William E. Hague, chapter manager.

The Northern California chapter delegation will include A. Teichert, Jr., Sacramento, and two San Franciscans, B. F. Modglin and Gordon H. Ball, on the national advisory board; Charles L. Harney, district No. 2 director; Geo. H. Atkinson, president; George C. Loorz, chairman of the local labor committee, and Winfield H. Arata, chapter manager.

MARCH SALES DOWN

March sales of retail stores are estimated at $8,685,000,000, about 16 per cent above a year ago, the office of Business Economics, Department of Commerce, said today. After adjustment for seasonal variations and the difference in the number of trading days, sales in March were down about 1 per cent from February.

Glide-Away
The Perfect New Modern
OVERHEAD TYPE
GARAGE DOOR

GUARANTEED WELDED CONSTRUCTION

Glide-Away's metal weatherstrippings on door and patented lamb Aligner mast to provide a perfect weathertight closure.

Glide-Away's patented lamb Aligner and weather seal permits installation in out-of-plumb openings without expensive work.

When open, Glide-Away recesses completely into the garage, up and out of the way . . . mechanism still leaves garage space clear! Also note its sturdy construction.

Glide-Away's compact mechanism fits right on the door jambs—no stanchions or protruding structure to kill space.

Interior view of garage showing Glide-Away completely recessed. Elimination of center post with double doors makes parking easier.
Only *Glide-Away* Has the New IMPROVED SPRING-BALANCED MECHANISM that
Glide-Away
Is One Piece Welded Construction of
N-A-X
HIGH TENSILE
STEEL
SINGLE DOOR.. SIZE: 8' x 7'
DOUBLE DOOR. SIZE: 15'11" x 7'
OFFERS THESE ADVANTAGES!
The new Glide-Away mechanism is engineered to provide perfect balancing of the door's weight. Specially designed door handle can be opened from inside when locked—no danger of accidental imprisonment. Glide-Away can be quickly and easily adjusted with only wrench or pliers.
• FITS ANY GARAGE SIMPLY INSTALLED
• NEEDS NO EXTRA SPACE
• EFFORTLESS AND NOISELESS
• IS EASILY ADJUSTED
We have a full size working model installed at our warehouse for your inspection. Come and see it. Contractors Welcome.

NEW Improved SCOOPMOBILE Five NEW IMPROVEMENTS!
1 NEW "Shovel Action" BUCKET
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!
2 HAND LEVER CONTROL
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.
3 DISCHARGE ACTION
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.
4 NEW COUNTER BALANCE
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.
5 CONTROLLED DIGGING ACTION
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

Official Proposals

Highway Improvements
Contra Costa County at Rodeo

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION of HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 2001 Van Ness Avenue, San Francisco, California, until Two (2) o'clock P. M. on Tuesday, May 20, 1947 at which time and place they will be publicly opened and read, for performing work as follows:

Contra Costa County at Rodeo, between Sixth Street and Fourth Street (IV-C. C-14-B) about three-tenths (0.3) mile in length, existing pavement to be widened with asphalt concrete and shoulders to be constructed with crusher run base.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Flagman	1.25
Jackhammer operator	1.375
Laborer	1.25
Motor grader operator	2.10
Oil Distributor bootman	1.375
Oiler power shovels or cranes	1.60
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Roller operator	1.95
Tractor driver	1.95
Truck driver (8 cubic yards water level capacity or more)	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2625
Any classification omitted herein not less than	1.25

Overtime one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

State Highway Engineer's Estimate

Item 1. 50 cubic yards removing concrete.

Item 2. 800 cubic yards roadway excavation.

Item 3. Developing water supply and furnishing watering equipment.

Item 4. 54 thousand gallons applying water.

Item 5. 15 stations finishing roadway.

Item 6. 1,380 tons crusher run base.

Item 7. 5 tons liquid asphalt SC-1 (prime coat).

Item 8. 180 tons plant-mixed surfacing.

Item 9. 3 tons asphaltic emulsion (paint binder and seal coat).

Item 10. 220 tons asphalt concrete (leveling course).

Item 11. 240 tons asphalt concrete (Type "A" surface course).

Item 12. 20 each, guide posts.

Item 13. Extending existing corrugated metal pipe culverts.

Highway Imp—Kern County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION of HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, Fresno, California, until 2 o'clock P. M., on May 28, 1947, at which time and place they will be publicly opened and read, for performing work as follows:

Kern County, between 0.4 mile west of Cottonwood Creek and Cottonwood Creek (VI-Ker-57-E), about four-tenths (0.4) mile in length, the central 20-foot portion of the roadbed to be scarified and reshaped and "Sub-oiling" treatment applied.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

State Highway Engineer's Estimate

Item 1. 21 stations scarifying and reshaping existing roadbed.

Item 2. 20 thousand gallons furnishing and applying water ("Sub-oiling" treatment).

Item 3. 75 tons oil ("Sub-oiling" treatment).

Item 4. 21 stations mixing, compacting and finishing surface ("Sub-oiling" treatment).

GROOVER AND I

CARPENTERS & COLUMNISTS

A few noons ago there was—as usual—an argument over in the Deacon's Corner of the Builders' Exchange.

☆ ☆ ☆

(The "Deacon's Corner", where Esquire and the Police Gazette are on the reading table—where the sun shines in on the easy chairs, perhaps bringing memories of the hot surge of youth in long gone summers.)

☆ ☆ ☆

The conversation changed from carpenters' wages to columnists' pay, owing to the published announcement of salary received by Herb Caen, columnist of the San Francisco Chronicle.

☆ ☆ ☆

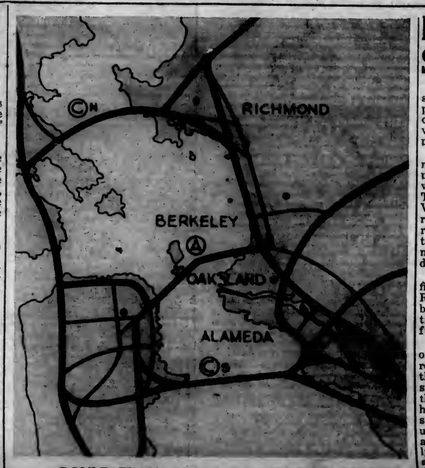
Walter Winchell is perhaps the top money boy of the columnist racket. Walter probably does not know the exact amount of his "take"; however, it is up in the bracket where on any additional amount the government lets him keep 6 per cent brokerage for turning the balance over to the Tax Department.

☆ ☆ ☆

Mrs. Eleanor Roosevelt receives folding money for her column "My Day". The exact amount is not known. However, when she started in 1933, she received $16,000 per year for her copy. The amount is now probably 50 per cent higher, Mrs. Roosevelt is also on the public payroll as a U. S. delegate to a cultural division of United Nations—for this she receives $12,000 per year, tax free.

☆ ☆ ☆

San Francisco's Herb Caen is reported as receiving $24,700 per year from the Chronicle, plus some extra spending money for a weekly beer broadcast.



☆ ☆ ☆

About "Groover"—we'll just say that Herb only tops me by slightly more than $2,000 per month—

☆ ☆ ☆

Remember Jack Benny's words: "Money isn't everything".

#

GOULD PLAN.—Two high level bridges would be used to supplement the present bay bridge (A) under a plan submitted by John J. Gould. The northern crossing (C-N) would run from California Point to Richmond, while the southern route (C-S) crosses from Hunters Point to Hayward and Alameda.

Engineer Gould Submits Plan for Two Bay Spans to Serve Entire San Francisco Bay

By PHILIP G. BRADY

Two bridges for the price of one are advocated by John J. Gould, San Francisco engineer, as the solution of transbay traffic problems. Approaching the question with a planner's long range view, Gould asserts that all proposals to date have failed to fully consider the future economic development of the area.

"In discussing transbay crossings," says Gould, "we must always keep in mind that the entire Bay region is one economic block. It is foolish to consider plans which will worsen intensify our present congestion without taking future growth into consideration."

Gould advocates not one, but two high level bridges. The northern span would bridge San Pablo Bay from California Point to Richmond, while the southerly crossing would reach from Hunter's Point to Alameda and Hayward.

He believes traffic flow would be so speeded up that Alameda motorists, would reach San Francisco in about one-half the time now required. A similar saving could be had from the northern approach, according to his calculations.

Prime advantages of his plan, says Gould, are that it:

(1)—anticipates future growth of the entire area;

(2)—offers alternate crossings in time of emergency;

(3)—permits dispersal of industrial areas into undeveloped sections where workers would enjoy adequate living space, and

(4)—would divert enough traffic to take the pressure off the present bay bridge.

About that latter point, Gould admits he is only guesstimating. Without a detailed traffic survey, that's the best anybody can do, he says. Despite his approaches being longer he feels that commuters and through traffic will be willing to go a few more miles if they can cut their time in half. "I would, anyway," says Gould.

"The state justifies its plan which would ultimately dump 160,000 vehicles into congested areas, on the basis of a one-day traffic

RAILROAD INTERESTS SEWING UP BOXCAR SHORTAGE—KING

WASHINGTON. — Representative Cecil R. King of California yesterday charged that the Association of American Railroads is attempting to "slow down" a congressional investigation of the box car shortage.

As chairman of the executive committee of western house caucus investigating charges that the eastern railroads are discriminating against the west in distribution of box cars, Rep. King said the hearings would be resumed in a few days.

Officials of the western railroads and spokesmen for the anti-trust division of the Justice Department will be invited to testify, he said.

He described as "misleading" statements from the American railroads that the shortages would be relieved. He estimated it would last for three more years.

"The hearings so far have pointed definitely to a manipulation of the freight car shortage by eastern controlling railroads," Rep. King said.

#

A. B. 2117 PASSED IN LOWER HOUSE

SACRAMENTO. — The California assembly passed A. B. 2117 late Wednesday, by a 42-31 vote, and it has been sent to the senate.

A. B. 2117 is a permissive measure which would allow the state division of architecture to employ architects and engineers in private practice on state work.

The bill will probably be assigned to the governmental efficiency committee of the senate Friday.

SUPERVISORS SLASH $60,473 OFF BUDGET

San Francisco supervisors have chopped $60,473 from the mayor's budget and all but $5,000 was scheduled to be spent for park department improvements.

These projects have been scrapped: sidewalks at Fleischhacker swimming pool, $15,000; repairs at the Palace of Fine Arts, $4,500; repainting the loan house at the zoo, $15,000; rebuilding Mission Park's comfort station, $10,000; repair of North mill at Golden Gate park, $12,500; and fencing Harding Park golf course, $6,500.

#

SLASH SUBSIDY FUND

WASHINGTON.—The senate banking and currency committee has approved a modified version of the bill reducing the housing expediter's subsidy funds, cutting the amount still further to $75 million.

Senator Capehart's bill, S. 1114, originally called for a reduction in the amount authorized for use as building subsidy from $400 million to $100 million. But the committee, on reconsideration of the measure lopped off another $25 million to reduce the figure to the $75 million now specified in S. 1154 as reported from committee.

SELL MILLBRAE LAND

The finance committee of the S. F. board of supervisors has recommended that approximately 85 acres of land in San Mateo County owned by the water department, located near Millbrae, be sold. It is valued at $250,000.

Housing Expediter's Office Quells Rumors of Scrapping Commercial Building Restrictions

WASHINGTON. — Builders should not get excited about the possibility of government controls on construction being relaxed in volume this week, the housing expediter's office said today.

An authorized spokesman minimized the importance of newspaper reports that the building curbs would be eased to a great extent. This OHE official doubted that VHP-1, the most important of the remaining controls (restricting non residential work) would be lifted to a new ceiling as high as $65 million or $70 million being predicted in unofficial circles.

The official line taken by the Office of Housing Expediter Frank R. Creedon is that no change has been announced so far, relaxations are inevitable in the near future but not in the extreme.

Creedon has said more than once that VHP-1, according to current plan, will be non-existant by the end of 1947. It is very possibe that he plans to extinguish this control which has annoyed heavy construction contractors since March 26, 1946, by the gradual process of raising the weekly allocations step by step. Most likely, it is some such announcement as this that is due in the immediate offing.

In the meantime, federal restrictions on commercial building came in for a lashing by Douglas Whitlock, chairman of Building Products Institute, who cited two reasons why the restrictions should be removed immediately.

Whitlock said: "It is imperative that the limitation order be removed promptly because . . . unemployment among building workers already has been reported in some sections of the country.

"Removal of the $50 million a week limitation order also will help to speed up materials output and lower manufacturing costs, inasmuch as manufacturers then will be able to return to a balanced production of varous grades and types of materals."

On the average, the review committees have kept non-housing construction below the stipulated $50 million figure per week since the total was raised to that from $35 million January 10, this year.

At present the average amount for the weekly allowance since that date stands at $49,830,000. It has been up-graded for the past several weeks, however.

Newspaper accounts that the space limitations on new housing (1,500 square feet per home) would be raised to 2,000 square feet this week were branded as "old stuff" by Creedon's staff. The policy to permit only 1,500 square feet in each new home, as instituted last December, was amended several weeks ago.

In an unobstrusive announcement to federal housing administration field officers (explained in the Dodge newspapers at the time) the 1,500 figure was relaxed to permit contractors to erect homes with 2,000 square feet providing they are being built for owner-occupancy and contain four bedrooms or more.

It must be remembered that an FHA permit is still required although the above exceptions are made. Again, it is likely that the permit requirement will remain in effect indefinitely as that is the only means by which government now checks new home projects. FHA administers the permit regulations.

Very few home builders have tried to erect houses with more than two bedrooms under the 1,500 square foot restriction, it was announced. This has resulted in neglect of the needs of large family units.

For weeks the larger houses have been authorized for physicians and other professional men

Bonneville Power Fund Cut to Cost 50,000 Jobs—Raver

WASHINGTON. — Fifty thousand people in the Pacific northwest will lose their jobs by 1949 if congress passes through the 70 per cent cut in funds for the Bonneville Power Administration, Dr. Paul J. Raver, BPA official, said here Wednesday.

The senate appropriations subcommittee heard his ominous prediction along with a fervent request that the entire budget asking of $20,278,000 be restored. It allowed the Bonneville Power Administration only $6,907,800 for fiscal 1948.

The entire northwest economy is dependent on big supplies of hydro-electric power from the Bonneville project, Dr. Raver said. What's more, the demand is increasing steadily. If it is not met, he estimated, 1947 unemployment will increase by 15,500 and in 1949 that figure will be 50,000.

"Unemployment in fabricating and processing industries affected by lack of raw materials, is greater than the effect of direct unemployment," Raver said.

His testimony included these other economic factors:

"If the region cannot supply additional power to sawmills and logging camps, production will be immediately affected, resulting in losses at furniture factories and slowing housing construction thruout the country.

"If lack of appropriations curtails delivery to primary producers of ingot aluminum, the chief loss will occur in prefabricating centers of the nation where unemployment effects will be thirty times as great.

#

BELCHER APARTMENTS GET FHA APPROVAL; 8 UNITS FOR VETS

Approval of an 8-unit rental housing project in San Francisco for World War II veterans and their families was announced today by District Director D. C. McGinness of the federal housing administration.

George P. Belcher will build two-story apartments on Taraval Street, east of 42nd Avenue, San Francisco. The project will be financed by The Prudential Insurance Company of America with a mortgage of $52,800 to be insured by FHA under Title VI of the National Housing Act. The eight dwelling units will have 4 rooms each.

#

GAS TAX INCREASE IS FALLING OFF—REILLY

SACRAMENTO—George R. Reilly, first district member of state board of equalization, revealed here today that net gasoline tax collections in California for March were $6,637,822, marking an increase of $364,235, or 6.91 per cent, over the same month of last year, when the corresponding figure was $6,273,288.

Commenting on the revenue trend disclosed by the highway taxes, Reilly pointed out that this is the lowest percenage of gain registered in any month during the past two years.

"Not since March, 1945, when the gain over the corresponding month of 1944 was 7.43 per cent, has the percentage ever been less than 10 until March of this year," Reilly declared.

YOU GET EXTRA PROFITS
from
American Mutual's
All American Plan
Here's a simple way to get three important extra's . . . Complete Insurance Protection . . . Protection At Its Best . . . and Savings Through Lower Costs. American Mutual's All American Plan for Contractors shows you quickly and simply how you may get these three extra's for your next contract:
Complete Protection—American Mutual writes practically every type of insurance coverage for all types of construction projects. All forms are modern, and comprehensive to give maximum protection.
Protection At Its Best—Every American Mutual policy is backed by complete service to assure maximum value to you for the insurance dollars you spend.
Savings Through Lower Cost—Since 1887, American Mutual has returned 20% or more to policyholders—more than $100,000,000 in dividends.

Even a Child Can Open Them!
STRAND-STEEL OVERHEAD-TYPE GARAGE DOORS

YES, these new Strand-Steel Overhead garage doors are so simple to operate that a mere child can handle them. At a finger's command these modern overhead doors open and rise gracefully and smoothly... lowering with like precision. Although constructed of steel for strength and endurance, Strand-Steel Overhead-Type doors are perfectly balanced to permit easy opening and closing. Ready now for immediate installation, these garage doors are always out of the way, protecting your car from fender knocks so often received from swinging doors. For additional information regarding the Strand-Steel Overhead garage door, call your local P. C. A. office or mail the coupon below.

Gould Offers Plan

(Continued from Page 1)

survey during which 8,600 vehicles out of a possible 65,000 were questioned," he declares Gould. He emphasizes that a thorough survey is needed before any worthwhile reached.
The northern span would be about five miles long from shore to shore. He estiamtes that it would cost, complete, about $40 million, and would divert about 12 per cent of present bridge traffic. It would be about 180 feet above water on spans placed 1500 feet apart. It would connect on the west side with a freeway around Richardson Bay to Waldo and use a low level approach to the Golden Gate bridge.
The distance from San Pablo to downtown San Francisco, he asserts, is the same whether by the present bay bridge or by his proposed system. "And my plan would cut the travel time in half," he declares.
Army and Vernon Streets would be the actual starting place of the southern crossing with a freeway running along the south side of Hunter's Point across to within two miles of Bay Farm Island where it would branch out to Hayyard and Alameda. It would be seven mile across the water on 500-foot spans. Highest pointwould probably be about 140 feet above channel water. It would divert 28 per cent of the present bridge traffic, he says.
This crossing, says Gould, would cost around $65 million and would make it possible to go from Alameda to San Francisco in 25 minutes or less. Both bridges would have "at least" six lanes of vehicular traffic and their combined cost—105 million—would be less than any plan yet receiving serious consideration.
Important to the plan, says Gould, is a system of approaches and freeways permitting through traffic to escape downtown streets. With a coordinated system of rapid transit mass transportation, commuters would leave their cars at home, he contends.

Official Proposal

Highway Improvements—Solano Co. in City of Fairfield, on Texas Street

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 1200 North Center Street, Stockton, California, until 2:00 o'clock P. M. on May 27, 1947, at which time and place they will be publicly opened and read, for performing work as follows:

Solano County, in the City of Fairfield on Texas Street at the intersection with Madison Street, Webster Street and Union Avenue (X-Sol-7-Frfd), traffic signals to be furnished and installed.

Plans and specifications, and form of proposal, bonds, and contract may be obtained at the above address.

Each proposal will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article 1(f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (1 cu. yd. capacity, or less)	1.60
Concrete vibrator operator	1.375
Electrician	1.875
Flagman	1.25
Laborer	1.25
Any classification omitted herein not less than	1.25
Overtime: one and one-half (1½) times the above rates.	
Sundays and holidays: one and one-half (1½) times the above rates.	

State Highway Engineer's Estimate

Item 1. Furnish and install traffic signals on Texas Street at intersection with Madison Street, Webster Street, and Union Avenue in the City of Fairfield.

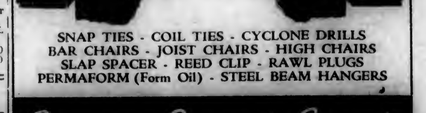
Keep Limitation

(Continued from Page One)

who can prove the greater need.

Neighborhood building restrictions which have not permitted the relatively smaller dwellings also are valid reasons for building beyond the narrower limits set out last December.



More than half the homes built under the permit system have been 1,100 square feet or under, FHA said. This is significant in consideration of the voluntary planning permitted up to the 1,500 sq. ft. maximum.

One thing is certain, as AHE feels that heavy construction materials come into greater supply—quantities which warrant action—the non-residential curtailing order will be relaxed in proportion to the adequacy of items, it was said.

Out west last week, Creedon talked with many lumbermen and other building material producers. This policy of a government agency administrator and his staff going into the field to sound out material and cost conditions is a departure from previous procedure.

So far the expediter has not made public his findings. It is assumed they will be reflected, to large extent, in future OHE rulings.

Official Proposals

FIRST PUBLISHED TODAY

Highway Improvements
Alameda County in Oakland

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock P. M., on June 11, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for construction of 0.231 mile of the State Highway in accordance with the Specifications therefor, to which special reference is made, as follows:

Alameda County, in Oakland, between Toll Plaza and Distribution Structure (1V - Ala - 5 - Oak), about nine-tenths (0.9) mile in length, additional traffic lanes to be constructed of crusher run base and asphalt concrete and a timber trestle to be constructed.

Bids are required for the entire work described hereto.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant mixer operator	$1.60
Asphalt plant mixer operator—fireman	1.60
Asphalt spreading machine operator	1.90
Cameraman	1.75
Cement finisher	1.675
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Concrete vibrator operator	1.375
Flagman	1.25
Jackhammer operator	1.375
Laborer	1.25
Motor grader operator	2.10
Oil distributor bootman	1.275
Other power shovels or cranes	1.60
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Pile driver foreman or operator	2.10
Pile driver man	1.95
Reinforcing steel worker	1.75
Roller operator	1.375
Tractor driver	1.95
Truck driver (5 cubic yards or less)	1.675
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2825
Any classification omitted herein not less than	1.25
Overtime—one and one-half (1½) times the above rates.	
Sundays and holidays—one and one-half (1½) times the above rates.	

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works

(Continued from Page 9)

lay Road, between Freedom and Heishan Road (IV-SCr-1146), about five tenths (0.5) mile in length, to be graded and surfaced with plant-mixed surfacing on crusher run base and a reinforced concrete bridge to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate Per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver holstman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications.

Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Yolo County Stevens Bridge

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION of WATER RESOURCES

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Engineer, Room 401, Public Works Building, Sacramento, California, until 2 o'clock P. M. on Wednesday, June 4, 1947, at which time they will be publicly opened and read in the assembly Room of said building, for construction in accordance with the specifications therefor, to which special reference is made, of portions of a County Road as follows:

Yolo County, Stevens Bridge across Cache Creek five (5) miles west of Woodland to be repaired by constructing reinforced concrete girder spans to the remaining portion of the old bridge.

Bids are required for the entire work described herein.

State Engineer's Estimate

Item 1. 160 cubic yards removing concrete
Item 2. 100 Cubic yards channel excavation.
Item 3. 400 Cubic yards structure excavation.
Item 4. 495 Cubic yards Class "A" Portland cement concrete.
Item 5. 455 Lineal feet concrete railing.
Item 6. 2,750 Pounds miscellaneous iron and steel.
Item 7. 2,650 Lineal feet furnishing steel piling.
Item 8. 53 Each, driving steel piles.
Item 9. 7 Each, steel pile splices.
Item 10. 120 Cubic yards riprap (broken concrete).
Item 11. 100,400 Pounds furnishing bar reinforcing steel.
Item 12. 100,400 Pounds placing bar reinforcing steel.
Item 13. Jacking operations.
Item 14. Miscellaneous items of work.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work or to omit portions of the work may be deemed necessary or expedient by the Engineer.

All bids will be compared on the basis of the State Engineer's estimate of the quantities of work to be done.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate Per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60

Flagman	1.25
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.25 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications.

Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the Office of the Division of Architecture, Public Works Building, 12th and "N" Streets, Sacramento, California, up to 3:30 P. M., Tuesday, June 3, 1947, said bids thereafter on said day to be publicly opened and read for the erection and completion of the Ward for Infirm Men, Norwalk State Hospital, Norwalk, California, in accordance with plans and specifications therefor.

The Ward for Infirm Men consists of a one story reinforced concrete building having a combined floor area of approximately 12,060 square feet with hollow tile partitions and clay tile roof covering.

Separate bids only will be entertained for the following segregated parts of the work

1. General Work.
2. Heating and Ventilating Work.
3. Plumbing Work.
4. Electrical Work.

Alternate bids will be required for the omission of certain work.

Authority Notice: Approval for this construction is authorized under C. P. A. order V.H.P.-1 Serial 8-1-2008.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Derrick operator	2.10
Electrician	1.875
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Painter (brush)	1.75
Painter (spray)	1.75
Pile driver holdsman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	2.00
Structural steel worker	2.00
Tractor driver	1.95
Truck driver (8 cubic yards and less than 18 cubic yards water level capacity)	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.60
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2825
Unskilled Labor	
Flagman	1.25
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.875 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to all unskilled labor for which rates are are shown above shall be not less than $1.25 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6) of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the Office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications, dated April, 1945. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Repairing and Hauling Steel Truss Members for future use as a bridge across Redwood Creek

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the Bridge Engineer, Room 338, Public Works Building, Sacramento, California, until 2 P. M. o'clock on May 20, 1947, at which time and place they will be publicly opened and read for repairing and hauling steel truss members for future use as a bridge across Redwood Creek, about 20 miles east of Eureka (I-Hum-20-C).

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the Bridge Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Derrick operator	$2.10
Flagman	1.15
Laborer	1.15
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Painter (brush)	1.4375
Painter (spray)	1.6875
Tractor driver	1.95
Truck crane operator	2.10
Truck driver, flat racks carrying under 18,000 pounds	1.275
Truck driver, flat racks carrying over 18,000 pounds	1.40
Any classification omitted herein not less than	1.15
Overtime one and one-half (1½) times the above rates.	
Sundays and holidays—one and one-half (1½) times the above rates.	

State Highway Engineer's Estimate

Item 1. Repairing and painting steel truss members.
Item 2. Hauling steel truss members.
Item 3. 2000 pounds structural steel
Item 4. 100 each, removing and replacing rivets.

The State will furnish salvaged steel truss members as more explicitly set forth in these special provisions.

"When We're Working in Close Quarters
We TRAXCAVATE"
says Mr. J. E. Nelson of the firm of Johnson & Nelson, Marin County Contractors. "Our IT4 TRAXCAVATOR is the ONLY RIG for close-in work around foundations and concrete forms, and that's only one of the many jobs it does for us. It's one machine that keeps busy."

TRAXCAVATE for PROFIT
All over the country contractors are calling the Traxcavator "the busiest machine on the job," and here's why: They use it for land-clearing and for leveling; they use it for excavating and for truck loading; they use it for backfilling and for cleanup work. From the time the job is started 'til the earthwork is completed the Traxcavator is busy. That spells *profit* for the contractor because the profitable machine is the one that keeps busy. That's why we say
TRAXCAVATE for PROFIT

Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m., on May 28, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Siskiyou County, between Fort Jones and 2.2 miles east of Moffett Creek (11-Sis-62-D), about seven and five-tenths (7.5) miles in length to be repaired with plant-mixed surfacing and on portions of the project shoulders to be constructed of imported borrow.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Flagman	1.15
Laborer	1.15
Motor grader operator	2.10
Oil distributor bootman	1.375
Oiler, power shovels or cranes	1.80
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shoval or other excavating equipment, shoval type controls (over one cubic yard)	2.35
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.6875
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.15

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. DEPARTMENT of PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 12th and "N" Streets, Sacramento, California, up to 2:00 P. M., Tuesday, May 20, 1947, said bids thereafter on said day to be publicly opened and read for Erection and Completion of Swine and Sheep Barn, 1 A District Agricultural Association, San Francisco, California, in accordance with plans and specifications therefor.

The structure is to be 200 x 240 approximately with reinforced concrete walls, wood timber trusses, and protected corrugated metal roof.

Separate bids will be entertained for the following segregations of the work:

General work
Plumbing Work
Electrical work.

Alternate bids will be required.

Authority Notice: Approval for this construction is authorized under CPA order WHF-1, Serial number 9-1 6593.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Mason Tenders	$1.57½
Bricklayers	2.05
Carpenters	1.75
Cement Finishers	1.75
Cement Mixer Operator (up to One Cu. Yd.)	1.60
Cement Mixer Operator (over One Cu. Yd.)	1.90
Electric Workers	1.87½
Iron Workers (Ornamental)	1.83
Iron Workers (Reinforcing)	1.75
Laborers (Building)	1.25
Painters (Brush)	1.75
Plumbers	1.87½
Sheet Metal Workers	1.75
Any classification omitted herein not less than	1.25

Overtime—One and one half times the above rates.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are desirous of securing plans, specifications, and proposal forms for the purpose of preparing and submitting a proposal for this work may do so subject to certain conditions hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. A deposit of $25.00 will be required to guarantee safe return of plans and specifications.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 1 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

PLANS and Speculations

San Mateo County Planner Frank Skillman has predicted that within five years the Ravenswood school district will need three schools. He proposed that the site should be changed when the Bayshore thoroughfare becomes a freeway.

oOo

Richmond city council has formally designated the proposed link from 19th to 26th Streets as "Richmond Boulevard extension". This will permit the city to designate the route a street of major importance so gas tax funds may be used on the project.

oOo

The special committee to develop a district hospital project for the Porterville area, has named a committee to circulate petitions calling for an election to establish the district.

oOo

Development of a portion of the Richmond water front into a yacht harbor similar to the San Francisco Marina will be studied shortly by the city council.

oOo

War assets administration revealed the Fewel Bros. of Fresno were only bidders on the Visalia Dehydrating plant located 3 miles southwest of Exeter. The plant was built at a cost of $163,000.

oOo

Decision to jointly sponsor immediate establishment of a hard ball baseball diamond at Elmhurst school grounds with the Oakland board of education was made last night by directors of the Oakland playground board.

oOo

The Coneland Water Company has offered to sell its holdings to its water users for $150,000. Gordon Leaf, president of the company, made the offer.

oOo

City Manager O. W. Campbell yesterday ordered an immediate survey of San Jose's municipal airport in an effort to bring its approach angle into conformity with current civil aeronautics administration regulations. An authority said that an additional runway would probably have to be built parallel to the 4200-foot strip now in use to achieve a 40-to-1 approach angle.

oOo

A million dollar long-range program for municipaly - operated parking facilities today was recommended to Alameda business representatives by planning engineers making a traffic and land-use survey of the island city.

#

RELATIVE SCARCITY OF BUILDING MATERIALS IS DISCUSSED IN CONGRESS

WASHINGTON.—A Commerce Department statement submitted to the senate judiciary subcommittee hearing testimony on export control continuation, states that some building materials will continue to be scarce through 1948.

As to building materials in general, including lumber, a Commerce spokesman said controls may be removed at the end of the 1947 building season.

"Some of the scarcest items," he added, "will clearly be in short supply through the building season of 1948. There is little likelihood of alleviating the coal and coke supply situation before June 30, 1948," he reported.

This indicates clearly the need for continuation of the export controls now in effect on steel and pig iron. Discussing the export situation with regard to steel mill products, the Department said controls will probably be required until the second quarter of 1948.

California Governor Pleads for Restitution Of Reclamation Funds

WASHINGTON. — Among the western state governors in Washington to protest the Interior budget curtailments in the appropriation bill now before congress were those from California and Colorado.

The Colorado chief executive told the subcommittee yesterday that results of such a severe restriction in allowed funds for operations over the next fiscal year would prove disastrous. He named three features which particularly spell trouble if passed:

1—Reduction of the investigation funds from $5 million to $125,000;
2—Elimination of the underground water surveys;
3—Reduction of the funds for stream gauging.

He asked more money for the Big Thompson project, urging that the figure be increased to $10 million, including carryovers. The senate would have to raise the house figure of $6,815,000 by some additional $2 million to reach the $10 million with the carryover.

'Build CVP Rapidly'

Unless the Big Thompson is given more money than now provided, some construction contracts will have to be canceled and work will have to start all over again at a later date, the Colorado governor said.

Governor Warren of California, in his subcommittee testimony, told senators the $6,900,000 now provided for the Central Valley project in California is grossly inadequate to get the project underway and supplying power in paying quantities. Originally, he asked that $40 million be allowed so that the entire work might be completed and the system be put on a paying basis as soon as possible.

In his latest testimony, Governor Warren pointed out that the relatively small allotment now carried in the appropriations bill would not permit construction in sufficient quantity to make the Central Valley a paying thing for many years to come. The area needs more water right away, he added.

His estimation that the slow construction required under the smaller authorization of $6,900,000 now proposed would not permit completion for at least twelve years, indicated the loss to which the project might be subjected in terms of revenue return. With a maximum of $20 million it is estimated the work can go forward on a paying basis and be completed in four or five years.

No one would advocate that the entire $40 million be appropriated at once for it would be impossible to let contracts for that volume of construction in one year. But Governor Warren wants enough money authorized so that construction on

(Continued on Page 7)

HOLC WILL WIND UP SHOWING SOME PROFIT

WASHINGTON.—Final figures on the operations of Home Owners' Loan Corporation to last January 1st reduce the corporation's losses on its properties and give further assurance that final liquidation of HOLC will be accomplished without loss to the government, it was announced today by John H. Fahey Commissioner of the federal home loan bank administration.

About ten years since it completed refinancing a million past-due mortgages and embarked on the more formidable task of collection, the Home Owners' Loan Corporation reported that it had liquidated it $3.492 billion investment down to $637 million, or by about 82 per cent.

Andrews Bill Sets Up $127,800,000 Naval Construction Program in California, Hawaii

GROOVER AND I

HOLD YOUR HATS, BOYS!

The late Brigadier of the Palace Guard is reported to have said: "The people are too damned dumb to know what is happening to them."

☆ ☆ ☆

I have finally figured out why that remark maxes me mad. It is on account of the high truth content. . .

☆ ☆ ☆

Henry Wallace has suggested that we start on another giving-away spree and stake the balance of the world to one hundred and fifty BILLION dollars. (Henry believes in everything for free except "free speech"—he received $2.40 "tops" for admission to his Wednesday lecture.)

☆ ☆ ☆

We laugh at the way Henry boyishly rides on the port outrigger of the economic canoe, but he may have guessed an accidental truth—perhaps we HAVE started on the 150 billion dollar spree.

☆ ☆ ☆

Hold your hat. You won't have shoes, sox or an undershirt—but you can still smile because—

☆ ☆ ☆

You will look funny as hell walking down the street wearing only a hat and a pair of Paris or Sidley garters.

#

Improvement of Trainee Program To Be Demanded

A vigorous demand for early action on an effective apprenticeship program will be submitted shortly to the San Francisco board of education. This action was decided upon at a joint meeting of labor and management leaders in the refrigeration, plumbing, and steamfitting trades last weekend.

Further conferences are planned to draw up a detailed list of space requirements, equipment and facilities to train about 250 apprentices in the three trades. The program will be carried out in the old Ford Building on 17th Street which is expected to be renovated shortly by the board of education. Equipment will be provided by government subsidy.

A spokesman for the joint group stated that some trades were dissatisfied with present accommodations and charged that GI educational subsidies in some instances were being wasted because of lack of proper equipment.

#

ALLOCATE 261,000 TONS TO HOUSING

WASHINGTON. — Representatives of hte steel industry have agreed voluntarily to allocate 261,000 tons of steel in the third quarter of 1947 for those housing items which the office of the housing expediter considers critical.

That amount of steel will be chipped to producers of plumbing and heating, builders hardware, wiring devices, window sash and frames and other critically needed housing terms, as well as industrially-made houses, panels and sections.

WASHINGTON—Of all the construction bills in congress at the present time, that introduced by Congressman Walter G. Andrews of New York (H. R. 3314) and now before the armed services committee is among those calling for the largest appropriations for public works.

Congressman Andrews' legislation would appropriate $127,800,000 for the construction of public works inside and outside the United States authorized by the secretary of navy.

The sum provided for naval installations within the continental limits of the U. S. is $67,300,000, including $3 million for the correction of deficiences in existing or approved facilities, for emergency projects and repairs incident to casualties to these facilities.

An additional $60,500,000 would be authorized by this act for public works outside the United States, including $3 million for deficiency corrections and emergency projects. All of this money would be set aside for use in the fiscal year 1948.

The bill as drawn contains brond powers of administration, giving full leeway to the Secretary of the Navy in use of funds.

It states: "Any such appropriations shall be available, under the direction of the Secretary of the Navy for expense incident to construction, including administration, overhead, planning and surveys, and shall be available until expended."

The bill itself does not stipulate amounts for proposed projects but lists the various installations under consideration as naval public work jobs.

Most of the construction covered by Congressman Andrews' legislation lies on the east and west coasts, and outside the United States in Hawaii, Guam, Alaska, Canal Zone and Puerto Rico.

Section 3 of H. R. 3314 deals with floor area limitations for navy personnel.

For flag officers, 2,100 sq. ft.
For captains, 1,670 sq. ft.
For commanders and lieutenant commanders, 1,400 sq. ft.

For warrant officers, commissioned warrant officers and commissioned officers through the rank of lieutenant, 1,250 sq. ft.

For enlisted personnel and non-commissioned officers, 1,080 sq. ft.

The armed services committee has just received the bill and does not expect to begin hearings on it for at least two weeks more.

Following are California, Alaska and off-coast jobs outlined in the pending legislation:

Continental United States

Naval air station, Alameda: Test cells for turbine engines.

Marine training and replacement command, Camp Joseph H. Pendleton, Oceanside: Asquisition of land, 575 acres.

Naval ammunition depot, Mare Island; Vacuum system housing, Building A-216.

Naval air station, Mojave; Acquisition of land, 28 acres.

Naval ordnance test station, Inyokern: Acquisition of land, 60,000 acres; aerodynamics field laboratory (aerodynamics range) ground range, external ballistics, and electranics experimental installation.

Amphibious training base, Eleyro Bay: Acquisition of land, 96.23 acres.

Postgraduate school, Monterey: Development of postgraduate facilities, including buildings and accessories.

Naval air missile test center, Point Mugu: Sea test range, and test and evaluation facilities, including supporting facilities, services, and accessory construction.

Naval Construction Battalion Center, Port Huenome: Acquisition of land and imporvements, 62.46 acres.

Naval electronics laboratory, Pt.

(Continued on Page 8)

Republicans Waver In Face of United Western Rec Stand

WASHINGTON — (Exclusive). — There is a move on foot in the senate to restore the "force account" provisions in the vast interior department appropriations bill, it was learned here.

Largely through the efforts of general contractors, the house of representatives accepted a committee proposal in removing the force account provison from the appropriatios bill as it passed the lower body. This action, if seconded by the senate and allowed to become law, would remove virtually all improvement work on large scale projects which for years have been undertaken thru the force account method—that is, without advertising the work for bids.

A test instance in the senate attempt to amend the house bill to restore the force account method probably will be a spillway improvement at Cedar Bluff dam.

Political Motive

Another straw in the wind indicated possible support for this restoration. The house, in passing the Interior appropriation bill, did not vote to instruct conference members. This lack of instruction to conferees may well result in a softer bill than the rigid measure put through the house recently.

A delegation of conservative senators called on Representatives Martin and Halleck just before the house voted. It is not generally known but accurately reported that this delegation pointed out to key representatives that the Interior appropriations bill is looked upon as an indication of whether or not the republican party wishes to establish a "solid west" as well as a "solid south". This delegation of republican conservatives were doing spade work with their call on Martin and Halleck while liberals were making speeches on the floor. "Vote the bill as you please, but don't instruct the conferees", they are quoted as saying.

This call, in large part, is responsible for the Columbia River basin fund being upped by $2 million on the house floor.

(This is the first time in its legislative history that the house of representatives ever raised a bureau of reclamation item from the figure recommended by its committee.)

Dinuban Testifies
On the Central Valley Project

(Continued on Page 6)

MOTION TO RECONSIDER A. B. 2117 LOSES IN ASSEMBLY BY 4 VOTES

SACRAMENTO, May 16.—Following a bitter fight, the assembly passed and sent to the senate today a bill permitting state departments and agencies to let contracts for state projects to private architectural, civil engineer and contracting firms.

The assembly defeated, 35 to 31, a motion by Assemblyman Chester Gannon of Sacramento, to reconsider the vote by which the measure previously had been approved. This action removed the temporary barrier in its path to the upper house.

Gannon assertel the bill's passage "would ruin civil service, and if this is the kind of measure we're going to pass, then we may as well 'farm out' the running of our prisons and hospitals to private firms".

Successfully opposing Gannon's attempts to kill the bill were its author, Thomas W. Caldecott of Berkeley, Richard H. McCollister, Mill Valley, and others.

Work to include new exterior to

The builder who thinks of tomorrow

Plans for built-in telephone outlets now

One sure way to provide for your clients' comfort and convenience for years to come is to plan for built-in telephone outlets before construction starts.

Here's why.

The location of the telephone can be changed, or additional telephones added without drilling through the flooring or running wires along baseboards.

The convenience of well-placed telephone outlets will be appreciated year after year.

And, built-in telephone outlets add little to building costs . . . much to building value.

Call or dial your local Telephone Business Office. Ask for Architects and Builders Service.

The Pacific Telephone and Telegraph Co.

three-story building and alterations to elevators.
